Instead of posting here, you should be out trying to stop the loss of
your younger listeners that's been going on for a long time now. You
need to modernize!

Mr Eduardo:

I have been following your posts and see why Radio is in the state it is
in today.
I realize that radio must make a profit, but, when you drive listeners
away with this buzzing noise on AM and trying to turn FM into all talk
or info-mericials. Tell us that "Young only listens to FM" etc. It can
only be a recipe for future disaster.
Example the young don't listen to AM because nothing is programed to
their tastes. Talk in HD or Stereo is still talk, plus most young people
care little about the news unless it affect them. Back in 1980 the
number 1 station in my home town of Tucson was KT KT AM 990, until new
owners took over the station, and to get the young to move to FM, They
changed the format, fired the local DJ's and switched to satellite

programs, sure enough in about two months time KTKT was in the bottom of the market. I remember reading their whinnying about no listers, they thought they could save money by eliminating the local talent.
Now, AM is to old, demographics rares its head again, well radio as industry made it that way in allot of markets following the KTKT example. I know of very few listeners that carry a watt or decibel meter to determine if the signal is worth listening to, but when you have crappy programing, you lose the audience every time.

"The buzzing noise" is heard on the channels adjacent to a local station with HD. No "other station" is protected from adjacent channel interference in the primary coverage are of the station using HD, and there is certainly, other than DX, no listening to adjacent channels.

> and trying to turn FM into all talk or info-mericials.

Radio is an entertainment medium. That entertainment may be talk, music, or a combination. I see no evidence of extensive programming of infomercials on FM, anyway.

>Tell us that "Young only listens to FM" etc. It can only be a recipe for
>future disaster.

This has been the case since the early 70's, where music listeners moved to FM and abandoned AM, even when major AM music stations were trying to compete. The difference in quality was a main reason for leaving; by 1977 half of all listening was to FM.

Were it not for the repeal of the Fairness Doctrine, AM would be dead. As it is, talk formats have made the larger coverage stations viable still although much of the audience is old.

> Example the young don't listen to AM because nothing is programed to their
> tastes.

Many AMs have tried music formats, and failed. This is simply because there are plenty of FM alternatives in most markets and nobody, today, wants to hear AM quality analog if FM is avaialble. On the other hand, there are plenty of viable small market music AMs that are doing well because there are not as many station choices in such markets and listeners are obligated to use AM for some formats.

> Talk in HD or Stereo is still talk, plus most young people care little
> about the news unless it affect them.

So? In most parts of the US there are plenty of stations to have both; your statement about young people having no interest in news is, in a separate arena, sad.

> Back in 1980 the number 1 station in my home town of Tucson was KT KT AM
> 990, until new owners took over the station,

KTKT has been owned by Lotus since 1972. There was no new owner.

> and to get the young to move to FM, They changed the format, fired the

It was already at the bottom of the market, having been beaten in its format by an FM. The switch was to find a format that was viable.

Plus, there was no way of knowing in 1980 "in two months" the changes in a station. There were ratings every Spring and Fall in Tucson then, and the interval between them was 6 months.

>I remember reading their whinnying about no listers, they thought they

Your example is fatally flawed.

> I know of very few listeners that carry a watt or decibel meter to

Listeners know when a signal is "listenable" or not. When you look at hundreds of thousands of incidents of listening, and find that they seldom extend beyond a certain signal intensity, you can form pretty solid conclusions.

But advertisers do not ask for 55+ listeners when they buy radio advertising. It does not matter what the nature of 55+ persons are... advertisers don't use radio to reach them.

What you haven't addressed is when a local station is on someone
else's adjacent, and their digital sidebands interfere with the local
station's audio.

THAT"s what's got so many people around here in a lather. The noise
is everywhere. Keeps me from listening to WLS which is one of my locals.

The truth is, that this system is designed with certain assumptions
in mind. One is that there is no value to stations out of market. I'll
tell you hear and now when lightning, or a power surge takes down one of
the primary AM's here, and there's only digital hash from some out of
market station covering up nearby information alternatives, the phrase,
'licensed to serve the in the public interest as a public trustee' takes
on a laughable quality.

The other major assumption is that some listeners can be orphaned
without penalty.

Both are tragically flawed. And if Radio doesn't pay heed, the
listener decline will be dramatic, as they move to alternative media.

I've been experimenting with a Wi-Fi radio, using one of the open
nets in Gurnee. I can't get WLS at home because of digital interference,
but I can over some wi-fi feed in the next suburb? What's wrong with
this picture?

And it's not a viable alternative for me. I do too much listening
that requires a portable. Which is why I got a MyFi for satellite radio.

And there's XM, of course. I also have an iPod adaptor in my Envoy
that lets me control the iPod through the databuss. No wires, nothing in
the way. But full selection without hassle to my entire music library.
And XM, there, too.

And with XM's new weekend schedule for XM Public Radio, I get my
favorite shows in the order I want them, just as they used to be on
WBEZ, without interference, without bullshit...and without any over the

air radio.

So, I may soon, not miss WLS. I may find alternatives sufficient. And then where do you go. I provide some of the longest TSL's radio has ever seen. Meaning, advertisers get REAL value for what they spend when I'm listening.

But, I'm 56. Who cares. Right? Let's see...in this post alone I've got more than a kilobuck in discretionary spending represented, of no value to anyone.

Quite a resource to be wasted. You think I'm the only one?

To quote a WWII Bugs Bunny cartoon, 'Wake up....it's later than you think."

Now...I did speak to the PD at WLS...Kipper is a friend of mine, and used to work for me when I was programming downstate. He suggested I pick up the HD-2 stream on the FM. WLS is there.

Ironic, isn't it?

Not really a viable alternative, either...since I do a good deal of my listening while outdoors.

ALL the money they spent attaching HD to WLS, and even on the inside, they suggest listeners pick up the HD stream on the FM?

Trashing the AM band, Brother David, is not going to bring lower end demos. Younger people are not listening to AM because it's AM....they're not even GETTING to the sound quality, yet. Moving a viable AM to FM is a good move. Younger demos are already listening there. But going digital on AM isn't going to help. They're not going to go there. They haven't been for more than a generation, now. All you're doing is putting a digital alternative to the same programming they're not listening to, on a band they institutionally have no interest in.

And you're doing it at the cost of those who DO listen. With instutrionalized interference, that, in the end, will cost you all your listeners. And all their revenue streams.

HD on the FM is marginal. It's not the boon to sound quality claimed for it. On the average, it's not an improvement at all. But it does not create the kind of interference that HD AM does. HD on FM is more or less innoquous. HD-AM, however, is destructive. And does nothing but line the pockets of iBiquity stockholders. And those who propagate their propaganda. And it does so by depriving active, responsive listeners of their personal choices in listening.

We may be comparitively few...but, as a whole we spend more. And when the interference REALLY kicks in...we're not going to be as few as you think.

I'm all for Profit, David. But I expect something in return. I don't expect to see companies rewarded handsomely for depriving me of my choices. Yes, I can listen to something else. But I can't do it where I want, when I want.

Actually, in the long vision, that's your loss more than it is mine.

And I'm not alone.

I wish I could make young people throw away their ipods and develop a

There are not many cases where the digital signal invades what is an
adjacent channel to the extent that protected contours of the adjacent
channel are interferred with someplace between the two stations.
>

Are you in the protected contour of WLS?

The FCC's reasoning was that the US has so many stations now that listening
in non-protected contour coverage areas, as real as it might be in the realm
of possibility, did not deserve protection if the intent to transition radio
to digital was to be fulfilled. And the use of night skywave coverage was
similarly considered to be of marginal value, and of benefit to only a
handful... around 1% of all AMs... of stations if used at all.

>I'll tell you hear and now when lightning, or a power surge takes down one
>of the primary AM's here, and there's only digital hash from some out of

The FCC, since the 40's, has stressed localism... the primary reason why the
clear channels were denied increases to 500 to 750 kw despite appeals ending
around 1967. The FCC's focus is on service to the city or community of

licence, not distant areas, and they have frequently denied protection at greater distances to grandfathered FMs even though many showed considerable listening in areas that were later granted local stations on adjacents.

Correct. This was considered in the deliberations and decided to be a justifiable tradeoff.

Listeners outside the local area or metro are of no value to stations, and this is why you don't see any type of significant broadcaster protest. The loss is not, to them, a loss.

Are you in the Chicago MSA? (Cook, DuPage, Grundy, Kane, kendall, Lake, McHenry, Will, Lake and Porter counties in IL and Kenosha in WI)? Otherwise, the station itself probably does not care.

Longer time spent listening listeners to AM talk tend to be over 55, and that is a demo that is essentially useless for revenue, although it looks nice on paper. there are just about zero agencie buys (and that drives the bigger stations in the larger markets) are for over 55.

The key 35-54 demos will listen to the AM formats if the quality is better; the staitons that have moved or started FM simulcasts have proven this. HD has a chance of making the existing formats on the very few viable AM stations in major markets more appealing to 35-54.

This is definitly one scenario. But to not try is simply to condemn AM to death in another decade when nearly all the listeners are over 55... the reason the FCC insisted, and was backed by the NAB in this, on an AM and FM solution was because the only way to help AM was to make it ride on a two-band system that all new receivers might have in the future.
>
> And you're doing it at the cost of those who DO listen. With

As I have mentioned before, in LA we have, frequently, two of the top 5 stations in the Riverside San Bernardino market, which is separate from the LA market. We don't get any extra revenue from this, because radio is not bought by "adding" contiguous markets together. Out of market listening is not of much value.
>

If the only loss is out of market or in 55+, there is no revenue loss.

Yes, but what you have to realize is that the AM audience is aging and
you are gradually bleeding off younger listeners. Unless you do
something to correct this problem, there won't be a market.

You should READ THIS, FOLLOW THE INSTRUCTIONS, PASS IT ON if you would like to make THOUSANDS OF DOLLARS and make your financial dreams come true with only a $6 investment!

The only thing you need is:
· E-MAIL ACCOUNT
· PREMIER (FREE) or BUSINESS PAYPAL ACCOUNT
· $6 on this account (The only investment)
· 30 minutes of your time

There is no limit on how much money you can receive, and you haven't got anything to lose with this Business program.

It's safe and easy, just go to www.Paypal.com and set up your account for free. Be sure to sign up for a Premiere or Business Paypal account so you can receive credit card payments.

It's simple and it's safe.

STEP 1: The first thing to do is send, through Paypal, $1.00 to each email address on the list below.

In the subject line of the payment type "Email List" and in the comments box, type "PLEASE PUT ME ON YOUR EMAIL LIST".

In the Category of Purchase section select "Service". By doing this you are creating a service by adding people to an email list.

The email list:

#1) martine@pilote.net
#2) dexxatol@netcourrier.com
#3) armygirl8568@hotmail.com
#4) comjii@starband.net
#5) sinnek@bellsouth.net
#6) mlopez1010@gmail.com

MAKE SURE THE EMAIL YOU SUPPLY IS EXACTLY AS IT APPEARS IN YOUR PAYPAL ACCOUNT

STEP 2: Take the top email address off the list and move the other addresses up (6 becomes 5, 5 becomes 4, etc). Then add your email address (the one used on the Paypal account) to the bottom of the list.

STEP 3: Next, Copy and paste this article to at least 200 newsgroup message boards. (I think there are close to 32,000 groups) Use your Internet browser and Outlook Express or another newsreader and try to

find FORUMS, NEWSGROUPS, BULLETIN BOARDS, DISCUSSION GROUPS, CHAT SITES and ONLINE COMMUNITIES. Use GOOGLE or use a NEWSERVER. Use every option to post this message. Download PostXpert to send one message to more NEWSGROUPS at the same time.

You can also email this to all of your friends. If you have a page on MySpace.com, you can post a comment or send a message.

The whole idea is to get this in front of as many people as possible. The intelligent design is to share and spread the love.

The way it works:

At a conservative response assume for example you get a 7.5% return.

When you send out 200 emails, 15 people will send $1.00 $15.00
Those 15 people will send out 200 emails, 225 will respond with $1.00 $225.00
Those 225 people will send out 200 emails, 3,375 will send you $1.00 $3,375.00
Those 3,375 people will send out 200 emails, 50,625 will send $1.00 $50,625.00
Those 50,625 people will send 200 emails, 759,375 will send $1.00 $759,375.00
Total: $813,615.00

Once done you just have to wait for the money to come into your PayPal account. It's really that easy.

You're spending a little ($6), but you will gain a whole lot. BE HONEST AND IT WILL WORK!!

The FCC's reasoning is flawed. Assuptions that so many stations
make all choices available to anyone through local outlets is tragically
flawed. Some content is simply not available locally in many areas.
Removing choices in the effort to convert medium to digital modulation
is not what Freedom of Choice and Serving in the Public Interest is
about. It's about the commercial value of a broadcast property. Not that
I'm opposed to making money in Radio, Lord knows I did ok...but I didn't

do it by removing options to listening through intentional interference.

Which gets back to the point....denying listeners their choice, in
favor of some arbitrary coverage map. Local listeners not interested in
local offerings are denied their choice.

Smaller markets where Rush may not be availble locally for
instance, may be served by nearby larger markets. Denying the smaller
market that choice is a grave disservice to the listeners of the smaller
market.

At some point, expendability begins to show dividends in the
bottom line, if you're priorities are money....if not, expendability
orphans significant numbers of listeners who may not be served. Which is
contrary to the stated intent of the broadcast service.

>> The other major assumption is that some listeners can be orphaned

Forgive me for saying this...but that thinking is bullshit.

That's as cavalier as denying phone service, gas, or electric
service to rural customers because the lines are not profitable.

At it's core, Broadcast is a utility. And every citizen has a
right to be served. Information that's not available locally is not to
be restricted for corporate profit.

That would be like providing electric to a customer with
operational limitations pursuant to a local agenda. Providing during
specified hours, or at frequencies determined by profitability at the
utilities discretion.

No, it's a loss to their listeners. Who are getting vocal as they
get more directly shafted.

What Radio has traditionally done is taken the position that
Broadcasting is about Radio. Advertisers believe that radio is about
Commerce. But no one is looking out for the listeners, who are the
backbone of Radio. We carry the freight, David. Declaring listeners of
'no value to the station,' is a dangerous position to take. And with
rising popularity of alternatives, and slowing revenue growth, or in
some cases, declining growth, taking a self-serving position is
precisely the wrong position for Radio to take.

Things may be good now. But they will not stay that way.

No, they haven't. They've proven that they will listen to FM,
where they already are. Many won't listen to AM because it's AM. It's
old. It's dark, it's history. They haven't even gotten to the issue of
audio quality. They're not even going to sample it.

HD
> has a chance of making the existing formats on the very few viable AM
> stations in major markets more appealing to 35-54.

No, it won't. Because quality is not driving the listening.
Content is. And if they're not going to AM because it's not AM, then
they won't even give AMHD a serious audition. Especially when they have
FM....and everybody listens to FM.

Perception may not be reality, but it does influence most of
consumer behaviour. And AM is perceived as a dinosaur. FM is percieved
as "Radio." Moving to HD on AM will not produce significant listening
behaviour change in lower demos.

Implementing any system that creates audible interference, is not
the way. Not only is AM HD doomed, but current AM's demise is being
hastened by the shortsighted implementation of IBOC.

You can't build traffic where consumers have, for cause,
historically not gone by changing internal workings.

They're never going to know...because they're not going there.

To Radio, perhaps.

But what about the listeners who commute from LA to San
Bernardino? You going to orphan them, too? Now, those are YOUR
listeners. But they're moving out of prime contours every day. They're
going to want to take their favorite station with them. You don't care
about them?

Then you deserve to fail.

Someone made a killing off me in technology sales in this post
alone. How is that not a loss?

You're seeing this from the position that advertisers tell you to
take. I drop a huge sum every week in discretionary. And according to
the census, I"m far from alone.

How is not marketing to me and my kind not a loss? Just the list
of participants in this newsgroup alone, TODAY, represents 6 figures in
consumer electronics.

How is ignoring that not a loss?

Inside Radio it's all a numbers game. Because it works.

Those of us outside the radio station are not numbers. And we
represent awesome commercial actitivy. Right now, the numbers may be in
your favor. But that's changing. And as the economy settles, and
population reconstitutes, it can and will change dramatically, and
suddenly.

Take off the corporate suit, step away from your numbers, and walk
as a listener for a week. See if your numbers take into account where
you go that takes you out of contour, but where you still want your
radio station with you.

And then when that's taken away....see if you don't begin to see
what we're saying here.

The Clears were not just about coast to coast radio. And as you yourself have pointed out, 50 gallons isn't enough to cover most large metros anymore. We're a mobile society. What the big watt blowtorches need to keep is that fringe coverage, so their loyal listeners in town, can take them where they go on evenings and weekends out of contour....in suburbs. In near weeds. Cutting off loyal listeners who want to take you along gives them exposure to other options.

From which, many do not return.

See what I'm saying?

What is the interferring station? I'm curious about this, and I'm surprised in this case that WLS has not taken advantage of the provisions for interference resolution that the FCC established.

But the FCC has stressed localism and local stations for about 60 years. In one case, one dear to me, KLVE 107.5 in LA was top 10 in Santa Barbara (MSA) based on coverage of the highly grandfatered 29 kw signal atop Mt. Wilson. However, the FCC protects grandfathered FMs to the extent of the conforming class B signal and proceeded a couple of years ago to license a new staiton on 107.7 in the market, completely eliminating the considerable KLVE listening.

The FCC shows in many more such cases that serendipitous reception is neither of their interest nor concern. And it has not been for decades; they go by a strict technical interpretation of allocations.
>

Yet in these cases, the government had to subsidize such services, such as by the taxes city dwellers pay on the phone bill for rural services, today and in the past. Sort of like farm subsidies...

The FCC would restrict this to local service, and they would likely say that with over 13000 stations, nobody is denied service.

In the vast majority of locations, there is far more local service. When I was in the Traverse City, MI, market, 20 miles north of that city, we had daytime reception of two AMs and no FM (1960) and at night, got the Chicago clears and WJR. Today, the market has over a dozen signals, all of which

cover with 64 dbu (FM) or 10 mv/m (AM) signals the location I was at.

35+ will listen to AM. In some cases, like sports, where there are no FM alternatives, stations like The ticket in Dallas are top 5 25-54. Enhancing the quality of AM for the over-35's will work. The real issue is that it may be too late, as talk is rather rapidly migrating to FM (two this week alone).

To show in the LA book, they have to have residences in LA or Orange counties. A ratings participant is determined by the market they live in (the address where the diary is delivered or the PPM is installed) and it does not matter where they go in the daytime.

However, if a person goes beyond the limits of a useful signal for work or whatever, they won't listen anyhow. It's not about serving those lesser-signal areas... it is about listeners who will not listen to weaker signals, as proven by extensive studies of ratings respndents.

I asked several General Managers how many 55+ buys came up so far this year in several top 10 markets (agencies ask for quotes so stations know about all business that is coming up) and was told, "none." We can not create demand for something advertisers do not want.

There is no money against 55+, unless it is in direct sales in smaller
markets or unrated markets. Agencies don't, as a rule, buy 55+ at all.

Like any other listener, if the station sounds noisy or fades or has
multipath, I change station.

What killed skywave night radio reception was the proliferation of FMs in local markets that offered similar formats without interference and with better quality. It had nothing to do with Reagan. In fact, the only possible detriment to skywave listening then was the 70's decision to break down the 1-A clear channels and to add 1-B stations to each (like KRVN in NE on 880, WCBS's home).

WSM takes seriously and carefully considers all complaints and
observations concerning interference to its coverage areas including
its 0.5mV, 50% sky wave coverage. May I encourage any complaints and
specific details be directed to watt@wsmonline.com where they will
receive careful consideration and appropriate action if warranted. ~

Bob Savage {WYSL-AM 1040 kHz Avon, NY} says he's received support for
his campaign from several big guns in the industry, including WSM (650
Nashville) chief engineer Watt Hairston, and he's asking other
stations in similar situations to his to contact Congress and the NAB
to call for action to save their signals from interference.

Not sure I understand your question the way it is written. If you are asking whether there are any current receivers with well chosen features and performance comparable to the 2010, then the answer is yes. The Eton E1 would be my choice.

Given it's significant limitations I would not bother with the XM module though.

The extremely limited coverage of the VC-20 is exactly why they are so
hard to find now. Nobody wanted them when new because they did little
more than fill up a slot and allow new numbers to display when the VHF
button was pressed. Radio Shack Pro scanners gave far better coverage
for the same price. Why anyone would pay good money for one in the
used market is beyond me.

The filter is worth some money, possibly $50 to $75.

Naw, more like $300.00 for a basic R5000. That's all that 21 year old
radio is worth now. Don't get me wrong, it is a nice receiver, and a
lot of fun to use. But it is no longer new.

No, because under Ebay rules one can have an opening bid but also have
the bidding subject to an undisclosed reserve that is guessable in
this case.

The price is kinda silly though because it is a 21 year old used
receiver. Still, I'm sure someone will ultimately come along and take
the bait. As was done for the 25 year old Drake receiver that sold
for over $2,000.

Reserves are perfectly legal in real brick and mortar and virtual Ebay

Oh, you got it from marketing surveys. You need to get your hands
dirty and find out what kids are really doing 'cos you sure as hell
can't trust a suit when it comes to counting heads. Especially when
the suit knows what the client wants to hear!

Like I said my son and his mates regard radio as a last option and
something for old people. Maybe kids in Europe have more options.
I'm not saying that's good by the way, it's just the way it is.

Which means it is at some level greater than $600 and less than the
BIN price of $800. Hopefully the seller is bright enough to make the

reserve not greater than the BIN price, but anything can happen on
Ebay. The reserve price could very well be the same as the BIN price
or a nominal $1.00 below. It happens frequently.

I used to null away WSM to get rid of splatter on WFAN 660; which now has its own IBOC relatiation. But Imus is gone, so I no longer care, listening in Ohio.

Mostly I listen to KFI over the internet; and my backyard bird call microphone.

Good luck, though.

You are correct Billy. This guy is part of a geriatric clique in the
group that have no lives and consequently have WAY too much free time.
And yes, they all are feeding at the public trough.

Receiving welfare (AKA "social security") is just one of the many
common denominators they share. Besides being parasites, they are
simple minded hypocrites as evidenced by their postings. They can't
put together coherent refutations of the facts so they resort to
childish name calling . Attack the messenger when you can't attack the
message. Of course the self righteous "what does that thar got to
do with shortwave radio" retort is a favorite of theirs also.

Yes a very venal and pathetic lot as a whole.

Mass Manipulation, Blissful Psychosis, and 7 Easy Ways to Achieve Damnation

"'But I don't want to go among mad people,' Alice remarked.

'Oh, you can't help that,' said the Cat. 'We're all mad here. I'm mad. You're mad.'

'How do you know I'm mad?' said Alice.

'You must be," said the Cat. 'or you wouldn't have come here.'"
---Lewis Carroll

Awakening to a masochistic impulse last Sunday, I opened the Op-Ed section of my local paper, The Kansas City Star. Throwing caution to the wind, I plunged headlong into the mind-engulfing thicket of sophistry. Running for my intellectual life, I felt the collective breath of the ravening wolves thirsting to rip the jugular vein coursing with the life-blood of my capacity for independent thought. Driven by an insatiable hunger to devour the cognitions of those who strayed from the herd, the voracious pack pursued me with a vengeance. Yet today I was moving with the agility of Brer Rabbit navigating the Briar Patch. Powered by critical thinking and a fierce determination to maintain my noetic integrity, I evaded the ferocious canines' furious bid to sink their razor-like fangs into the succulent gray matter they craved. Emerging from the tortuous copse, my psyche was bloodied but intact. And more importantly, it remained free.

Consider that The Kansas City Star, a paper that "serves" a metropolitan population of 1.9 million, is but one of 29 publications owned by The McClatchy Company, a corporate entity that raked in a net of $160.5 million in 2005(1). With McClatchy backing them and a daily subscription of 270,000 people, the Star can afford to publish the scribblings of the best propagandists money can buy. And they desperately need them.

Burdened with a task as daunting as the Twelve Labors of Heracles, the mainstream media strive with a fury to satisfy their demanding corporate paymasters. Yet unlike Heracles, they can't luxuriate in the knowledge that quiescence awaits. For theirs is a Sisyphean challenge. Truth, the eternal and immutable one, anxiously anticipates the moment his would-be assassins crest the summit where he is poised to hurl

them violently back to the base of the hill. Powerless to prevent their relentless prevarication, Old Man Verity delights at the opportunity to condemn them to perpetual toil.

Ostensibly fragmented and autonomous, the MSM duplicitously peddle their perversions of reality in a seemingly cacophonous din of independent truth-seekers. Yet how could such an incestuously entangled group of entities owned by a handful of leviathan corporations possibly adhere to a spirit of integrity? Acting in unison to protect the interests of opulent shareholders and maleficent politicians, print, radio, and television media embody the Ministry of Truth Orwell envisioned.

Thomas Carlyle once commented:

"Burke said that there were Three Estates in Parliament; but, in the Reporters' Gallery yonder, there sat a Fourth Estate, more important far than they all."

Wallowing in a fetid sewer of avarice, speciousness, sensationalism, and pornography, Carlyle's Reporters' Gallery has all but abandoned its crucial role. The Fourth Estate has evolved from a fierce watchdog of the public interest into a massive swarm of winged vectors infecting the body politic with the parasitic disease of fascism.

While Rush Limbaugh and his ilk ply their craft with obvious glee, others providing grist for the propaganda mill apologize and plead the "mortgage and family" defense. Those who defy the corporatocracy by employing journalistic integrity often find themselves relegated to obscure roles or wrangling with government bureaucracy over meager unemployment benefits. Bearing the "fools license" of medieval court jesters, a precious few mainstream journalists reach the pinnacles of their profession despite their honesty. Their satirical styles of presentation save them from the axes of the censors and "down-sizers".

Like eager equestrians breaking green horses, the mass media endeavor to provide the pecunious stratum of society with obedient beasts of burden. Conditioning begins at our earliest moments of cognition. With the ubiquity of TV, radio, newspapers, and billboards, steady barrages of thought manipulation continue throughout our lives.

Mere extensions of the exploitative perversion of Capitalism which has emerged as a means of imposing economic tyranny in our constitutional republic, the glorified spin doctors of the MSM act as priests shepherding their flock. Espousing a doctrine promoting the Seven Deadly Sins, the prelates of the mainstream media have replaced the spiritual progress of their steadfast adherents with a moral regression that leaves Satan green with envy.

Banishing human reason and compassion to distant exile, the media barons and their minions perpetuate a chronic state of group psychosis. Reality and morality? Who can be bothered with such trivial matters when Playboy Spice Platinum is on the 60 inch flat-screen,

frosty bottles of Coors are in the fridge, the NFL has its own network, and we have enough military fire-power to obliterate the Milky Way Galaxy. And the likes of Fox, CBS, and Time Magazine are there to quash those nasty occasional doubts and quickly restore our shining vision of America the Beautiful.

While the corporate media entities manipulate consumers, exercise a virtual monopoly on the flow of information, rewrite history to suit political agendas, unduly influence the outcome of elections, and perform a myriad of other tasks to advance the interests of those in power, the holographic image of the United States as a benevolent beacon of democracy they work so tirelessly to etch into people's minds is beginning to fade.

However, that represents no crisis to them. They simply flood our minds with more of the narcotic-like ideas and images they dispense to mask the pain from the festering wounds on our agonized souls. Undaunted, they continue to merrily guide us down the well-trodden path to the Inferno.

Nimbly disabling the mind and conscience, corporate-supported propaganda shock troops have enticed and manipulated untold millions of people to embrace severely distorted realities and spiritually vacuous lives.

Consider our nation's repeated and egregious perpetrations of the Seven Deadly Sins and our information tsars' complicity as instigators, enablers, and participants:

LUST (LUXURIA): Pornification is rampant in our culture. Television, movies, catalogues, and nearly every form of media imaginable are teeming with salacious photos of women wearing little or no clothing. Waves of new pornographic print publications and Websites leave Larry Flynt's Hustler Magazine looking almost puritanical. Sexual taboos are on a path to extinction. Inducing ravenous appetites for carnal pleasure, the mass media have tapped into major veins of pathological obsession and the exploitation of women and children. Yet they don't care. Because sex does indeed sell. It sells so well that Dante's vision of spiritual cleansing by the flesh-searing flames of a raging conflagration doesn't even give them pause.

GLUTTONY (GULA): Imagine that the United States is a hog amongst a herd of swine that represents the world population. And that the world's resources are their slop. America would be one of twenty pigs. Yet come feeding time, the US porker would leave only three fourths of the pig swill for the remaining 19 squealers to share. More than 850 million people around the globe face starvation (2). 33% of US Americans are obese or overweight (3). Like Tantalus, the gluttons in Dante's Purgatorio spend eternity yearning for food that is in sight but just out of their reach.

AVARICE (AVARITIA): Avarice is the black heart of rapacious capitalism and corporatism in the United States. Enron, Halliburton, Lee Raymond, Big Oil, Big Tobacco, Tyco, Bernard Ebbers, 33% of the wealth concentrated into the hands of 1% of the population (4).examples of obscenely acquisitive entities and individuals are nearly infinite.

SLOTH (ACEDIA): Sloth is perhaps best exemplified by the shocking indifference many US Americans show toward the innocent victims of their pitiless war machine. The United States' economic and military juggernaut has been waging genocide against Iraqis since the Gulf War. So naturally, instead of focusing on culpability, remorse, or demands to end the state-inflicted murder of millions, our high priests of the temple of information fuel a debate over how much (or how little) "collateral damage" has been caused by US military aggression. Sloth also entails avoiding spiritual work. In a society of people indoctrinated to worship wealth, physical beauty, quick fixes, themselves, and immediate gratification, there is not much danger of over-exertion to reach self-actualization.

WRATH (IRA): Throughout much of its relatively brief existence the United States has inflicted misery upon billions around the globe through intervening militarily and wielding its economic power like a mighty cudgel. When the oppressed finally realized they could resist by employing asymmetric warfare, those crafting Goodthink whipped the multitude into a fury. Directing US Americans' wrath against Islam enabled the Bush Regime to invade and occupy two geopolitically strategic nations. And the millions of dead or suffering human beings in Afghanistan and Iraq were and are the illegitimate targets of the vengeance and unwarranted rage of wrath.

ENVY (INVIDIA): The moneyed elite in the United States have long coveted their neighbors' land, resources, and cheap labor forces. Eager to invade, annex, and exploit, the plutocracy began to disseminate the warped notion of Manifest Destiny in the Nineteenth Century. Purporting to have the unwavering support of the Almighty, the "superior" Anglo-Saxons rationalized slavery, the Native American Genocide, the conquest of half of Mexico, the annexation of Hawaii, and their eradication of over 300,000 "savages" in conquering the Philippines. With its vast and sophisticated media network at its beck and call, those monopolizing power in the United States continue to cull popular support for obtaining the objects of their envy. Complex obfuscations and demagoguery may sell their agenda to today's more sophisticated audiences, but the underlying goals and results have changed little. The power elite want what others have and employ whatever means are necessary to get what they want.

PRIDE (SUPERBIA): Considered by many to be the most grievous of the Seven Deadly Sins, pride was the impetus for Lucifer's fall. Before their umbilical cord is even severed those born as citizens of the American Empire begin receiving a barrage of assurances from the media matrix that theirs is an exceptionally superior nation. Brimming with hubris and a pathological nationalism, those who have internalized the

Big Lie wave their blood-drenched flags in open support of fire bombings, nuclear assaults, the installation and support of ruthless dictators, neocolonialism, and brutal invasions of tiny and vulnerable nations. Enmeshed in the protective cocoon of the Empire, we are imbued with the warped psychological capacity to pursue our narcissistic fantasies while callously disregarding the misery we are inflicting upon other human beings. Many US Americans regard hubris and narcissism as their natural rights. And they exercise these "rights" with the zeal of a jonesing crack addict hustling for their next fix.

To paraphrase Bon Scott, Angus Young, and Malcolm Young: We're going down. All the way down. We're on the Highway to Hell.

So revel in the mass delusions, suck the marrow that the wretched may gnaw upon the bones, and excise your conscience.

And for God's sake, savor each second of the ride..Because Hell awaits, America.

on it a second time.

Plus there is the Federal TSP {IRA/401K} that I paid
into out of my own Salary for 13 Years and 'receive'
My Own Money Back in Retirement and Paid Taxes.

Then there is my Rental Properties which also provide
me a nice Monthly Income in my Retirement : Which
again is My Hard Work and Savings {My Life's Blood}
coming back to me in Retirement and I Paid Taxes on
that too.

God Bless the Double, Triple and Quadruple Dippers for :
* They Work For It Many Times Over !
* They Earn It and Paid Taxes On It
* They are Receiving It and Still Paying Taxes On It a Second Time.

BUT DAMN - I Can Get No Social Security. {Too Young :o}
But then again I would have to Pay Taxes on that Money Too.

lucky me - i just keep dipping away ~ RHF

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans.

The US also deployed incendiary weapons, including white phosphorous. "Usually we keep the gloves on," Captain Erik Krivda said, but "for this operation, we took the gloves off". By the end of operations, the city lay in ruins. Falluja's compensation commissioner has reported that 36,000 of the city's 50,000 homes were destroyed, along with 60 schools and 65 mosques and shrines. \ \

So Remember: Bushite grunts told the world they wouldn't let anyone out of the city, because [enemy Sattler LIED] pro-bushite Zarqawi was there present, so the innocent families who believed they had nothing to fear from the liar disciples of the ungodly enemy of ALL HUMAN LIVES, remained in the tiny city to be indiscriminately 'protected' with more than nine two thousand pound bombs, or made dead instead by heinous pro-bush escaping war criminals who used white phosphorous on civilization. All to die our Humanity for the thieved loss of evidence to demand ourselves of some official freedom time to deal with our terrorized as suffering reality.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unexceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

of Our innocent beloved families? A bushite kidnaps
Iraqis routinely, (or orders the murder of those between
15-55,) and what of any real man present, doesn't
immediately arrest or kill such CONTEMPTIBLE bushite
loyalists to the ungodly enemy antichrist?

I, as the Son of Man, DEMAND, America order millions of
gallons of clean drinking water to be shipped immediately to
Iraq to save the lives of US, the Human species. Please, help
US make this a reality. Today. Please.

DEFEND THE PEOPLES OF IRAQ FROM BUSHITE NAZI DUMFUK GRUNTS

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

-

Tatum, who freely confesses he's a proud child killer without apology, is being made a free man in evil bushite amerika. The TRAITOR prosecutor has ridiculously stated to our world -

/ / Lt. Col. Paul J. Ware wrote in a 29-page report that there is insufficient evidence to show that Lance Cpl. Stephen B. Tatum did anything other than follow Marine Corps rules when he killed [for no reason, innocent] women and children \ \

TATUM ADMITS he enjoyed slaughtering the defenseless families deliberately!! In fact, he wrote a card to a dead marine's family, testifying that he murdered the innocent young girls for the tyrannies of the antichrist. Evidence that TRAITOR Paul Ware and Mattis hides from the Christian American Family. Will YOU, as an American man, allow these two bush bitch nazi punks to survive as furthering the commitment of more war crimes against the INNOCENT? as a zionist neocon's "Hero"? Will You defend our girls? Peoples of Earth! Help Me save our children.. please.. please..please

TRAITOR Paul Ware "Tatum shot and killed people in houses 1 and 2, but the reason he did so was because of his training and the circumstances he was placed in, not to exact revenge and commit murder."

TATUM STATED DIRECTLY IT WAS TO EXACT REVENGE AND COMMIT MURDER!! HE WROTE SO TO THE FAMILY OF THE MARINE WHO DIED! A FAMILY WHO WOULD MOST CERTAINLY SUPPORT TATUM'S EXECUTION AS DEMONIC TRAITOR TO FREEDOM IN AMERICA!! ASK THEM!!

See?, Tatum is a zionist, but not Jewish!!! While neocons suggest our reality impossible without corporate challenge for exploitation of our 'unrepresented' lives.

/ / Ware has recommended to [demonic nazi enemy of Life 'judge'] Lt. Gen. James N. Mattis, that charges be dismissed, \ \

"Mad Dog Mattis,"

MATTIS!! The guy who murdered countless women and children at a wedding party, while after getting caught PROPAGANDIZING to forsaken America the innocent victims as al-Qaida!! CAUGHT! Mattis called innocent six year old girls "al-Qaida"! CAUGHT!

BUSHITE ENEMY OF AMERICAN FREEDOM Lt. Gen. James N. Mattis has been made into a "JUDGE"!! THE WOMEN HATING NAZI FUK! A JUDGE of Men by 'law' in bushville!!!

the [anyone's] CHILD KILLER Lt. Gen. James N. Mattis QUOTE: "It's fun to shoot some people" - defenseless innocent WOMEN HE SHOT!! INNOCENT CHILDREN HE SHOT!!!! YOUR CHILD!! FIGHT BACK FOR CHRIST! FIGHT BACK FOR our dying aMERICa!

Prosecutor Lt. Col. Paul Atterbury "Lance Corporal Tatum entered a home and participated in the killing of Iraqis who were not legitimate targets, then entered a second home and participated in the murder of [more innocent] women and children,"

/ / One of the Marines charged with murdering civilians in Haditha, Iraq, in 2005 knew that only women and children were huddled in a back bedroom in a house there, but he [TATUM] opened the door and shot them anyway, a squadmate testified Tuesday. \ \

TRAITOR Mattis "The Marines have landed, and we now [as ENRON] own a piece of Afghanistan." [thieving from all for 911's neocon, especially undefended American pensioners... hail satan - 666.]

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

CBC National News producers must be tried for treason, CBC reported that the Taliban banned girls from school, and women from work. LIES. I want the death sentence returned to

Canada, to have executed Brian Stewart for his boastful true contempt for the lives of Canadian soldiers, who he LIES to, to have them die as assisting the escape of the zionist bushmob, by supporting fundamentalist dope pushing savages. Death to the documented liars of the zionist neocon, death to those who indiscriminately murder our species for a stolen nickel.

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one way communications system. He tells us what we think, and he'll never takes our calls, they won't read our emails, and they'll continue to pretend WE don't exist. AND... when WE die, they'll be richer for it. AND you'll be dead, your innocent brother will be dead, your innocent child will be dead. No evidence against an accused is US being truly abused. George Walker Bush is Guilty for 911, while every irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in

a year, if you adopted Canadian Health care systems overnight
for yourself to immediately provide all People the respect for
life we deserve. Or don't, and needlessly continue to pay
twice as much, while dying broke as self made losers without a
cause worth preserving. A free market open to waste for profit
what more could we ask for? Death to the bushite.

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon is right in claiming sovereignty over a small fertile area known as the Shebaa Farms, still occupied by Israel. Israel argues that the territory is Syrian and will be returned in future peace talks with Damascus, even though Syria backs Lebanon's position. The UN's admission has been mostly ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're despicable criminal savages the neocon.. who steal the rights and privileges of US peopled folks, all to fall victimized with their self confessed contempt for love and justice. Condi's crew dropped seven million land mines to murder ourselves for generations, and, shouldn't she and the neocons responsible be put to death for such conducts?? If not then, when? discuss.. They openly target innocent human beings indiscriminately without apology, but excuses that don't hold water. Not that corporate news professionals are even pouring! It's most definitely the re-occurring true story of a censored mankind with You as it's innocent victim. For, what human would support victimizing others for the tyranny of blind terror? Only bushite amerika would fall silent under such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it will discontinue its practice of "capturing" populated Palestinian villages during military training exercises. The IDF states it will "reexamine their policy" of conducting such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for defense in? Or, just again examples of standing terrorism against life ourselves - committed by the censored as will giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly the very same terrorist acts they say we should all be outraged against? Somalia is a case to point. They murder helpless people as bushite, then say they'll remain dying to thieve further as enemies to Humans being. It doesn't fool me, but perhaps it does you. A neocon soldier murders innocent Iraqis, while selling you they are all there risking their lives to bring freedom. So, they die. For lies. Die. Again, KNOWN Aegis goons openly commit crimes against Iraq done officially to get killed! the supposed to be Patriot Marine. P2OG. Soldiers under bushite command would rather die cowardly, than to honorably demand the bushmob's arrest for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as
starting by supporting our rise to highest acclaim with my
authority free willed to anyone. Let's face it, we're great
because Your great. However, for greed, corporate america
aren't taking our concerns nightly. We want Justice, and WE
will get it if we reflect together with impeccable credentials
as standing with measured reason for proper assessment on
rights making might. Who is who here, a freeing peoples I
tell you, arriving to bring a true patriotism to Life for US.

Death to the bushite, death to the enemies of Freedom for America.

I'm a Good Man
"Al-Qaida" = "General Mahmoud Ahmad"

Why will you not as a member of Humanity, make the call
to the Coast to Coast radio network of demon evil nazi
savages who deny your legitimate concern be addressed freely?
Hate God and Love do you? Couldn't care less could you
for the giving lives of ignorant Americans as an American?
George Norry isn't as stupid as he wishes you believe him
to be, when he supports lawless carnage against the
innocent, to help escape those truly responsible for 911.

26,000 total Tickets sold - 14,302 votes tabulated
http://disc.server.com/discussion.cgi?id=149495;article=112801;show_parent=1

/ / Now think about that for a minute. 26,000 people purchase tickets
to go to a Straw Poll event, and yet we are to believe that 12,000 of
those people couldnt even care less about the voting part? Just what
were they there for? I don't buy it. This is not believable. An
Investigation is needed here. \ \ ALL PAID CASH to "vote" also..

I said that years ago, but the bushmob isn't listening, because,
hey, happy George Norry don't care, and CBC, CNN, and FOXNEWS
isn't taking our calls either man.

American soldier: Your enemy is TRULY LIAR happy George Norry.
The demon knows of Ahmad, and forbids any guest from uttering
such understandings in defense of the DYING dumfuk grunt nazi -
Good riddance? Do you care that your country men are dying
for the criminal zionist neocon as traitors? Support my demand
for US to be heard GOD DAMN YOU. ...or die.

Pro-mass murderer war criminal Kristol once again, speaking freely to Jon Stewart unchallenged internationally on Our TVs as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he speaks no words in defense of the innocent robbed and murdered in his "Jewish" name. A Zionist! He wants to sound our public voice silent where a Hitler or Kristol marches innocent others into gas chambers by calling ourselves terrorists without a thread of evidence to thieve from as unworthy. Few know, Hitler was a staunch Zionist too. The excuse would be, but G-D is worse.. because, as the "Two [atheist] Jews", they can commit no sin against Christ by trumpeting demon evil lies as if, we have no stronger indivisible arguments present in OUR defense ever for Just causes. AND, he's near the best our American national TV media has to offer!

Did you see Jon Stewart whore himself to Albright TOO!, the physco nazi witch who holds no regret in the murder of more than 500,000 CHILDREN? I believe, Jon Stewart suffers from the ignorance of Celebrity more so, than a genuine hatred for Humanity.. as that is the fault of most TVed Americans. Nothing more greater than getting on the boob tube, to really make your mark on this fleeting world as they sell their life away for nothing but the privilege to be recognized at a gala swarray.. fed on the victimized innocent of Humanity left robbed as worthless their grand stage. His show is often quite bright however, and leastly, reminds people, that CNN, CBC, and FOXNEWS isn't the be all and end all of respect for US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with were when the young caller "Sanable" was supposed to have said "we will annihilate the Jews" were not even mentioned by the caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.
And, kinda scary Being all godly and such..

I am,

Demon evil enemy neocon George Norry is a naked traitor to History:

"..Show me proof that there are real demons"

You, George Norry are a demon because you purposefully
broadcast to my America the need for neoconned soldiers to die
for the lawless demon antichrist, knowing full well, you work
'happy' to escape the 911 perpetrators of American
Wrath, like General Ahmad, with your truly evil demonism about
Life, and betrayal to freedom for US humans.. George Norry is
'the evil spirits' he says you can never find. Evidence.

What?

There is no found honor in a thiefs paradise of neocon plunder
my friends, no honor.

Have you seen the documented murders of INNOCENT MEN trying to
defend their community from lawless nazi dope pushing
fundamentalist savages?, just recently released by those who
fly in the antichrist's apaches? If you see these things that
are in the demonic neoconned dishonorable "Air Force" at your
dinner table, talking like human to enemy George Norry, or
just walking down our streets like Aegis tries, kill them
justly for Yourself, Freedom, GOD, and me, please, Thankx.

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy. These people don't want democracy, they want slave governments. If it's a slave dictatorship - that's fine. If it's a slave elected government - that's also fine. The only thing that matters is that the government is a slave government. That is why they will never invade Egypt. They will never invade Saudi Arabia. They only invade countries, or threaten to invade countries, who stand against them and who refuse to be slaves to them. That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" = "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911 financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without

challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run for cover!! embarrass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Divine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high

treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

Murdering bushite gang rapists try escaping true accountability

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to

enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? [...] It is not too late, however, to begin such an investigation. There is no statute of limitations on mass murder. \ \

We, as Humanity, have to rise against the neocon LIAR enemies who forsake the value of Human life. Death to the bushite, death to the enemies of America's America.

Right. The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of all Human Life. http://www.wsws.org/articles/2007/jul2007/fema-j21.shtml

I'll tell YOU again, CBC, CNN, and FOXNEWS knows the bushmob did 911, and lie to you entertainingly to sacrifice even more of US to the demon antichrist forces of evil.. While I ABSOLUTELY destroy bushite with joy for God and the defense of love.

TRAITORS TO LIFE

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

If Americans don't proudly put to death Tatum, on behalf of the Family that lost their son, their Marine, Johnny will formally conclude, Bushite america is an ungodly evil nazi fascist state of intolerance and hate to US, the Great Human Race. Bushite amerka does not own Freedom, nor do they own our rights to be Just. Join me in demanding the Public execution of the satanic demon liar Tatum, on his Public insistence that murdering innocent families to thieve from for the neocon, is a crime not warranting the death sentence enforced by any family man. Death to the bushite. death to the enemies of man. The neocons will be arrested, tried, and executed for the crimes of 911 as traitors to Life.

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning that the footage may be re-hashed when they released the "new" tape to the media, but they failed to mention the fact that they released portions of the exact same clips in October 2003. \ \ amazingly - I witnessed blurred-out faces of those they claimed al-Qaida in another instance just recently. (Then, look at the dog fight vids that CNN and CBC refuse to show the dog haters faces in..)

I say American taxing payer folks, flip me some dollars, and I'll pay out rewards - after a moderate lunch - all to take these IntelCenter AL-QAIDA! - AL-QAIDA! - AL-QAIDA! straight to public trial, then public execution for high treason - like holy fuk mon let's get real here People. Or don't and we die further for bin Laden's fear of cameras. Offer a 500,000,000 dollar reward for Zawahererri's crew to get the rest of this done quick like. I wanna rock! Death to the neocon enemy LIARS, death to those who WAR - WAR - WAR innocent Humanity for the continuing bushmob's escape plan from nowhere. See? Heaven or Hell? YOU DECIDE.

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America. Now yous messing with a real son-of-bitch. HeY!, question: why don't

Americans kill a bushite for Yourself bud? - because Bushites insist "we're" willingly being led by the antichrist enemy of all human life as Satanic LIARS who intend to cheat ourselves of freedom through self respect. Pro-neocon-media enemies are nazi savages, and I don't like it..How about you?

Death to the bushite instead of the innocent loved in God

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who

doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) I HATE the REAL demon antichrist Christ says.

Kagan "You rarely know in the middle of a war, what the outcome will be."

Johnny Wizard the Creator "I win."

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made

ignorantly entranced TV audience that is repeatedly reminded,
we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently,
but just lie and tell US they do. Look to see, almost all
political internet traffic condemns Bush straight to hell
well he rightly belongs, but the polls still say no - WE,
seeking for Just cause, are the minority.. just roll over
and die for the neocon betrayers to god and country, life
and loving.

-

George Bush "The same folks that are bombing innocent
people in Iraq were the ones who attacked us in America
on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch
of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan
- die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of
the joint chiefs of staff assisting General Ahmad, in
committing the murder of thousands in America on 911
for the neocon TRAITORS, as the same 'escaping' enemies
today, responsible for 'secretly' ordering these
indiscriminate terror attack bombings against YOUR
Humanity for their continuing stolen pleasures as
Satanic.

DEMON MURDERER PETER POWER TRIES TO LIE HIS SOCKS OFF

RECRUITER

[letter written as signed by Peter Power to MSNBC et al.]

/ /It is confirmed that a short number of 'walk through' scenarios planed [sic] well in advance had commenced that morning for a private company in London (as part of a wider project that remains confidential) and that two scenarios related directly to terrorist bombs at the same time as the ones that actually detonated with such tragic results. \ \

Homeland Security Committee Chairman Bennie G. Thompson

NOTE: Americans are literally paying billions for Chertoff's THREAT of "gut feeling". Billions, while the neocon walk away from MURDERING Americans on 911 with the bushite on America's Coast to Coast radio network, claiming they don't know you know, nor, ever will. They'll tell you, blame the shadows in the New World Order, but don't rely on evidence to form your conclusions on who PERSONALLY is responsible for criminal actions against YOUR rights to be free as alive. OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice

as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American

Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC zionists, actual treasonous LIARS, actually smile to dying Canadian soldiers with only true contempt. CBC kills Canadian kids, with their intentional demon lies, trying to subvert Justice for God and Johnny. In fact, yesterday, they did a special, all on how "God is NOT Great", giving that bush bitch demon LIAR, all the space to pontificate it's hatred for Wisdom, Science, and GOD, with only nods and smiles from the 'illiterate' hord. Remember: A zionist KNOWS it's an enemy of Humanity when it supports dropping seven million land minds to murder indiscriminately OUR CHILDREN for decades, or stealing a Christians Home because they say God says Jews would do such ungodly acts. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Live free by defending liberty by killing pro lawless pro torture pro fascist bushite enemies my friend, live free by defending Yourself and GOD.

/ / The U.S. State Department recently issued a report calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which

further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Why should WE continue to silently die unjustly victimized?,
for the bushite's contempt of Mankind censored?, the Eternal
Son of Man to GOD forever answers correctly. We can really be
something greater, while a murderous bushite thief, a LIAR,
can hardly read or write Liberty without flinching from self
contempt. Bushite tyranny is a dead end road paved with
missed opportunity. change your evil ways in other words, and
join the living side that's light to know what we are, in
deed, looking at here under the dying spoils of bushite, "we
pay" misfortune. To hell with Satanic demon devil worship by
the President of the United States, We, the People answer,
for now anyway, we have some really serious business just
presently, and we really don't need to be any more reminded
about Mr. Bush's satanic Devil, demon whoreship, of, "Molech",
a religion practiced to deceive America into sacrificing our
kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Bushites who war as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

The Haditha perpetrators, if convicted, are looking at serving, maybe, a couple of years, for freely confessing to the targeting MURDER, of innocent women, men, and infants.

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in

America should take open line calls on our ideas about how to
actually plan to defeat these, found factually to be, traitors
to God and Country.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite

thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to
raise some concern. THEY don't. They refuse to hunt bushite
down in their streets for death to defend the innocent held
indefinitely against GOD'S will. Death to the bushite, death
to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

"Al-Qaida" = "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America. George Norry WILL kill Your American child for the contempt he truly holds for our lives here. He says he only supports murdering Arab children for the neocon, but when your not looking in his 'shadows', he'll kill your child too, don't doubt it for a second.

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where

Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their

comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering
answers to any question on the science of God as is pertains
to Justice measured, but this is just who I am to be conscious
man. So, if we can get over the shock of me being so
especially normal, maybe we can then realize, I have some
simple good old ideas that transcend through time by rational
understanding communicable between any two people. I am not a
"miracle worker" to all those I advise to not eat Aspartame
because it's a poison that also makes your body crave
un-needed carbs, that will likely convert to more unless fat.
So, it slowly kills you, while making you fatter than you need
be along the dead end journey faithing in "the system". So,
why do some do it religiously? Who cares (for now) but to
say, our governments are failing US miserably. I spoke
personally with one of the head scientists in Canada at
"Health Food and Safety", and he told me the scientific
analysis done by reputable scientists I found freely available
repeatedly on the internet years ago, was completely true.
(It breaks down to formaldehyde, and methanol (a slow lethal
poison), among other shockers. Poison. P-o-i-s-o-n-s in our

food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE
Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while

entertaining. Weekend TV in North America totally sucks.
Now, why do YOU think that is brother? The more powerless
they make US, the more money the neocon zionists can murder
Humanity for, thinking they might just get away from this if
we continue to take no action in defense of anyone as God
would will. Let me be Your servant King, by backing me up some
here. We need some dollars to eat, and I need it now before we
starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has
been completely overhauled. Where are the many who served there NOW
eh?]

Look: America has kidnapped countless thousands without evidence to
be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide
OPENLY in America's uniform. [let US hunt them down for GOD, despite
what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for
Bush are officially deemed lawlessly unaccountable to
anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency
water provision money

Look: Sattler OPENLY committed the worst war crimes of
all Humanity's history

Support my cause, which is your cause.

Senior Military analyst, Rob Riggle "In the field John, the
soldiers are out there, every day, risking their lives, for a
common Ideal: that none of the President's decisions be

This is more true than a bushite would admit before murdering
a honorable father to rape his young child, like Lcpl
Boudreaux freely confesses. Boudreaux will tell you, openly,
you have to murder the Arab father of the Arab child your
planning to rape, because if you don't, that Father will spend
the rest of this life, hunting you down in the streets to rip
you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that

Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by

tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

-

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

for God when the chips are down, and truth is plain to see..
911 was an inside job, and CBC with CNN don't want to tell us
about it, but will watch our LOVED children lied to, to go out
and die further for a causeless war of criminality
unparalleled in it's wickedness.

Do you expect yourself to fail trying?

It's all up to You my friend, it's all up to you.

truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill it proudly for freedom, as an undying love for a real God and Humanity.

And that's bullshit on it's face. Having a local automated
outlet playing Punk Lithuanian Polkas denies listeners the live service
they've been enjoying from out of market for decades. We have one
station, in fact, it's within 5 miles of my house, that's newstalk. To

compare this 'local' operation to the likes of WBBM, or WLS is
ludicrous. As ratings would indicate. And it goes dark at sunset. To
call this operation a serious radio station is an effront to those of us
who prefer a real operation. To call this 'service' is laughable.

These are my choices?

Yes, no local advertiser is denied service.

Listeners? SOL. With 13000 stations, we should have have the
choice to listen to what we choose. Not what is chosen for us.

To call what so much of Radio has become, today 'service' is an
insult.

You're talking coverage. Ok...what's the content? A 13 year
old hairlip reading the obituarise and pet reports? There's a reason why
people went the distance to receive better stations. To deny that in
favor of a blockade of anything but 'local' content dooms listeners to
very poor choices. And, ultimately, local radio to silence.

Enhancing the quality of AM will only work for those listening
to AM. I've seen nothing to indicate that anyone not currently sampling
AM will do so based on better audio quality. If that were the case,
Every AM station in the US would have been stereo, and there never would
have been an NRSC II. Pressure would have been on FCC to widen AM
bandwith, not narrow it. Pressure from broacasters who were taking

pressure from listeners to improve audio quality.

Broadcasters have been talking out of both sides of their mouth
on this for years. Let market forces decide, and yet, when there are no
market forces to make a change, pressure a rules change. It's not a very
effective strategy.

And in every case, it removes choices for the listeners.

That's the point. Why would you so readily want to give up that
listenership? When I was at CBS, we fielded no end of complaint calls
from listeners in fringe areas when the FM skip rolled in because they
couldn't hear their favorite station at work. Or, they would lose it on
the drive through Arlington Heights on the way to work, where there were
5 stations on a pole and no one had bothered to measure mix products.
These were people who listened to us at home, within contour, and wanted
to take us out of contour for the drive to work but couldn't because of
interference. Why would you want to throw that listenership away?

Yes, they listened. And they were NOT happy when they couldn't.

In an AM HD context, those listeners are gone. And they're gone
where they would have had viable listening before.

More importantly, they're now looking for alternatives. And
some of those alternatives you'll have to begin sharing them with at home.

In Texas, when the noise level was high, predawn, which was
rare, we got complaint letters by the thousands from people wanting us
to bring up power so they could hear us on the way to their jobs. Local
station, local listeners. Living within contours. Stopped listening on
the way to work. This was an AM on the move. We were up from #5 in a
market of 4 stations, to a solid #1 in town. We began to note some
erosion of the numbers. And when we polled the ARB diaries, and began
some call out research, what we got back was that listeners had found
other options because they could not carry us to their jobs, or on
weekends on those bad days. Why introduce intentional interference that
can affect someone else's market?

AM HD specifically orphans those listeners at levels far
greater than natural causes. Why would you be so supportive of a system
that gives those listeners away? Local listeners. Local buyers of
advertisers goods. No longer able to be reached where they do their
listening.

I listen to Rush on WISN, because my own local outlet isn't
available to me, due to IBOC hash. When that outlet is closed to me,
then what?

This is what is so baffling. Radio looks at numbers on a
spreadsheet and gets FCC to rule in favor of an expensive technology
that gives its listeners away to other media. What the hell is the
matter with you people?

We're not fixed numbers on a spreadsheet. We're people. We move
around, we have lives, we listen to the radio, we'd like to take our
radio with us where we go. You're telling me that doesn't matter? You're
telling me it doesn't happen?

C'mon, David. You're smarter than that. Put your books away,
and go out among us and actually see what it is we listen to and why.
And where. And how loyal we can be.

But you gotta be loyal to us, too. And if you create obstacles
to what we want to listen to...we'll listen to something that isn't you.

I listened to WBEZ every Saturday of the world. All day. From
Weekend Edition through Thistle and Shamrock, and into some of the deep
Delta Blues that they played late and overnights. Now, I get it all on
XM. And I don't even have to change channels. They've lost a listener to
an alternative. They've also lost a contributor.

Put that another way, it's worth paying money every month NOT
to listen to them.

I used to listen to WLS from Don Wade and Roma, through Rush,
through Roe Conn and Sean Hannity. Every day. Now, I don't. Because
institutionalized interference has made that signal unlistenable. And
I'm not alone. We're not talking hobby DXing, here. We're talking real
in-contour listening. Gone. And I'm not alone.

It's not about serving those
> lesser-signal areas... it is about listeners who will not listen to weaker
> signals, as proven by extensive studies of ratings respndents.

You're missing the point....there were, before IBOC, lesser
signals with listenable quieting out of contour. With actual
listenership. Real people. Real numbers, if you will. Now, that's not
possible because of interference out of market. People who can no longer
take their favorite station with them, where they could before, because
of the digital hash created by other stations.

They're not relevant?

Who are you broadcasting for? Yourself, or your listeners? At
some point, you're going to have to serve someone other than an ad agency.

Well, now INTERESTING you should say THAT. You're talking
about what advertisers want. I'm talking about listeners. You're telling
me that my discretionary income is not desirable to advertisers? How is
that good business?

But more importantly, let's look at your statement--'We cannot
create demand for something advertisers do not want.'

How then can you begin to sell this HD interference to the
listenership? You cannot create demand for something listeners do not
want. And it's been demonstrated that listeners have no interest in HD.

You can't have it both ways. You can't claim 'no demand' and
cut off service to 55+ because of advertiser apathy, and then turn
around and claim that you're going to create demand for this IBOC hash
despite listener apathy.

That really sounds like all you see are your spreadsheets, and
all you speak is a corporate line to protect the stock price.

Somehow, I expect more from you than that. You've been in the
business, you've been a listener. You've been on the front lines...and
yet...you sell out listeners as mere numbers for the corporate line.

This is why so many street level citizens distrust and despise
corporations. Because they get tired of being treated like faceless numbers.

There are consequences for this.

>>

Which doesn't address my point....something that's very common
among those who live and die by the spreadsheet, btw.....how is my
discretionary income, and the discretionary income of the tens of
millions of 55+ listeners to radio in this country not of interest to
advertisers. It's time to consider new thinking, here.

We have all the money. If you want some of it, you may need to
start considering us.

The Light at the End of the Tunnel

The transition to digital has been a protracted struggle for radio broadcasters. It's now getting on late in 2007, and while an impressive number of radio stations have anted up and adopted HD Radio technology, few consumers have managed to muster much more than a ho-hum to the idea of adding a pricey new radio to their stable of legacy receivers.

Yet just when it seems that things can get much worse, they may be getting ready to.

According to a number of reports coming from the recent House Judiciary Committee Hearing on Broadcast Performance Rights, the light at the end of the metaphoric tunnel that represents our long IBOC digital transition may just be a freight train heading our way.

It's no secret that HD Radio's only real selling point for consumers thus far has been the multicast application. Convince a Jazz fan that he may actually have a choice between a couple of jazz channels that didn't previously exist in his market with no monthly subscription, and well, you may have just landed a convert.

But signs from Washington indicate that the cost of programming those multicast services, as well as analog channels, may be about to take off -- at least if the RIAA gets its way, as the recording industry, now firming up their gains from online broadcasters, is proposing nothing less than a statutory per-recording performance royalty for radio airplay.

A recent article in the Broadcast Law Blog published by Davis, Wright, Tremaine LLC, a post by David Oxenford contains this timely warning to broadcasters: "The proponents of the new royalty have made a facially attractive case for imposing this new obligation on broadcasters. Broadcasters must pay attention to this issue now, and explain to their Congressional representatives the impact that such a royalty would have, as this is currently the single most direct threat to their bottom line. And, if the tenor of the conversation at the hearing is any indication, the threat is real."

At the end of a summer full of tough news for our industry, its time for radio broadcasters to link arms and mobilize against a threat that could derail HD Radio before it even leaves the station.

at the ROSEANNE airport. FAA airport ID : 43TN. The Airport is
Co-located with the WWRB transmitter facility.

The FREQ is : 529 KHZ call letters are LYQ in Morse code

Please tune it in and post your QTH and a reception report right
here. Please visit the WWRB web site @ www.wwrb.org We have
ground and aerial photos of our new runway, Vortac, and transmitter
facility.

Flew the JetStar today and could get solid points on the RMI

They will want notice.
There isn't much to see.
The fire a few years ago at Bonaire lead to
a lot of pictures being posted on the RNW web

Nope. This is not a spelling flame. You explained that you do not know
the difference between u meaning micro or 10E-6 and V or volts which is
a unit.

Quote "dBu used to be called dBv but got confused with dBV, and was
changed. It's a decibel measurement of voltage.... as my equivalency
shows."

This is not a typo. You do not understand the technical terms you use.
You do not understand what 10 mV/m means. They are just terms you have
read and regurgitate with no understanding of what they mean.

Thanks for demonstrating once again that you do not know what you are
talking about.

It can and is quantified.

You don't know what 10mV/m or 64 dBu mean. You don't understand the
difference between units and multipliers.

I am just getting back into shortwave listening after a few years hiatus. I previously used the Passport Guide, now I would prefer more up to date info via the Internet. Does anyone know of a good, current, online database, preferably by frequency, that is easy to use and the info easily downloadable as a PDF or text file? Any good links would be appreciated. Thanks...

Mr Eduardo:

I remember reading the Arizona Daily Star newspaper article when KTKT
expressing surprise that it had reached #1 again in 1979, when most of
the country were already listening to FM. Well that is old news.
On the current front, I used to listen to the local oldies channel plus
the only AM stereo channel here in town, and they both sounded decent,
but the AM stereo channel switched to HD, as well as the oldies channel

(Clear channel owned).
I can here the digital hass in both station, the audio now sounds worse than my cell phone audio. I have stopped listening. I went to Radio shack to sound demo both HD signals, but they could pick them up in the store equipped with an external antenna. The towers were only about 5 miles as the crow files from the store. Bad selling point.
I knew more than the sells man, in his half hearted attempt to sell me one. He then tried to sell me a cell phone, and said you should go with XM radio. I was not impressed with the $100 model or any of their car stereo offerings. Now both have a internet output, but, I can only get dial-up in my area, "Qwest" doesn't intend to mode rise their system, no cable offering in my area, and I have "Dish Network" which doesn't offer the satellite internet yet.
My solution, I stopped listening. I know several others at work whom have followed my example.
The younger people at work mostly use a IPOD, to use their words "Radio sucks" They don't like the programming and or repetition.
For example when I was listening to the oldies station, I believe Billboard stated that there was over a thousand #1 songs in the decade of the sixties alone, but they recycle just about fifty songs total for the whole day. 1950's thru the early 80's. I realize that the selection is made by market research, but don't you relies that most people can't remember the title, artist etc, when you ask people to fill out the survey.
Finally, as a radio marketing executive, it should be your job to convince the advertisers that life doesn't stop at age 55, and there can still be money to be made in selling to our aging population. Old people still buy cars, appliances, gas, insurance etc. Not just the crap that the info-mericails try to sell now. You should take the leads in changing the mind set, that people stop changing at 55+ and more importantly, the stop buying at 55+.

http://www.fcc.gov/ftp/Bureaus/MB/Databases/AM_DA_patterns/504736-70030.pdf
has a typical FCC filing plot for a directional antenna system for KTLK in
Los Angeles from its proposed Downey site. Note that the radiation pattern
is defined by the electric field strength (commonly referred to just as
"field strength" throughout part 73 of the rules) at one kilometer in mV/m.

Using ground conductivity, either from the FCC map or from a "test station"
measurement of more specific local conductivity variations, the theoretical
signal strength can be calculated. A typical use of mapping of the contours
is to determine interference referent to co-channel and adjacent channel
stations for the purpose of new or change applications, and to create
coverage maps of radio stations for sales purposes or for appraisals by
brokers or investors.

In addition, night operation has a definition of the interference free
contour, which varies from station to station. KTNQ in Los Angeles has an
interference free night contour of approximately 9 mv/m; this value is
determined by the calculation of skywave from other co-channel stations to
give a usable groundwave service contour for the station. In other words,
outside the 9 mv/m contour, the signal is subject to regular skywave
interference to the groundwave signal. That would be 79.084 dBu for a 9 mV/m
signal.

In fact, by 1980, KTKT was down to about 10th in the market and falling, due to competiton form FM Top 40 stations. By the time it changed format, it was hardly billing anything.

"People" don't fill out a survey. They listen to extracts of each song and score them based on how much they would like to hear them on the radio today.

These decisions are made by the clients of agency accounts, based on hundreds and hundreds of millions of dollars in consumer research and through which the client determines the prime sales demographics for their goods and services and tells the ad agency who to advertise to. Radio stations do not visit ad agency clients.

The main reason advertisers do not target 55+ customers is that the return on investment is low; it takes so much more advertising to convince older consumers that the cost of the sale is less than the profit on the sale.

As I said, these decisions on agency accounts are set by the client of the agency, and no medium has access to the client to "get on the buy" when the client has made a highly researched marketing decision.

You think that may have something to do with the way the sale is
presented?

Those of us who've been around the block once or twice, don't fall
prey to the marketing pap that younger demographics seem to swallow so
readily. Maybe if you sold the steak instead of the sizzle, you may find
that we're a lot more amenable to the message.

There's a story circulating around Radio Shacks in the Chicago area
(and some areas of Louisiana, as well), about the guy who comes in, and
when a saleshole asks if he can help, the guy says, "Yes, see that open
space over by the Sprint display? Go stand there until my car has left
the parking lot."

I can quote that accurately, because I'm the one who said it. And
I've said it at Best Buy, Circuit City, Audio Consultants...or wherever
someone with more attitude than knowledge tries to sell me something I
don't want.

Truth is, I"m the easiest sell in the world. But don't come to me
with more mouth than brains and expect me to turn loose of a dollar.
I'll abandon a purchase I've already decided to make before I encourage
that kind of crap by paying a commission for it. I'll buy somewhere else.

It's real simple. Tell the truth. Stop the hype, and just tell the
truth. You'll find that there are a lot of us out there who will respond
to that...and selling to us is easier than getting a morning erection.

If it's costing you more to make the sale than you can make on the
sale, then change your pitch. It's not like we don't have the money. And
it's not like we don't spend it. It's that we don't spend with people
who open their mouths with hype, deception and misdirection.

Or as I also say to clerks who lead off with the wrong tack..."Don't
come to me with a mouth full of bullshit and expect me to love your
breath."

This principle has applications in our own conversations, David. I've
been around the business as long as you have. I've heard all the noise.

I've heard all the facts. I've been there. I've watched the industry grow from an exciting frontier to a mature product, to a commodity sold like tomatoes at Jerry's in Niles. I hear your statistics. I've seen them myself. I"ve even used them in my own career. But, and I've said this to every sales mangler, general mangler, OM, PD and corporate suit I've ever worked with, "You know what they say about statistics and liars." If you want to convince me, make an argument that doesn't rely on tautologically derived statistics. Talk to me like we're both human beings. With similar experiences, interests, passions and professional histories. Like the guy at Best Buy, you come to me with a lot of noise, but very little actual address of my questions and concerns.

You're more dismissive than conversational. You're better than that. And I don't deserve it.

Just like making a sale to 55+, you need to stop the hype, and just tell the truth. One on one. Person to person. Not suit to suit.

I had one professor at University who didn't for the first semester use one mathematical formula in my Physics class. He had a very compelling reason for that. He told us that Mathematics is a shorthand for English. It's a language. And that a formula is a sentence. And that there is nothing you can say mathematically that you can't say in English. But Mathematics is shorthand. You don't have to really know what you're doing to use it. So to ensure that he knew that we understood what we were exposed to, he forbade mathematics in class for the first semester. Even on tests. We had to say it in English. And still come up with the correct answers. But we had to write it, say it, express it without mathematical formulas.

If you want to convince us, here...and we're all passionate about Radio... say it in English. Talk to us like we're really here, really involved and really listeners. Sell us, without the hype. Without the statistics. Just tell the truth in plain English, as though you were speaking to a group of your friends at a Shakeys around two pitchers and an 18" Sweep-the-Kitchen.

You may find, like sales people all over the country, that we respond to that.

Put more simply: If you want to convince us to buy, don't sell like Herb Tarlek.

You don't impress me as a '75 Cordoba kind of guy, anyway.

Try taking this thinking to your advertisers. If you can convince them to monetize this demographic, with all it's disposable income....you'll be a hero. Retire wealthy beyond words, and leave a legacy with radio and it's listeners that's tacit goal of every broadcaster who ever sits behind a mic.

You'll also be responsible for reinvigorating Radio at a time when it's running off its listeners to alternatives who don't treat us like

dog shit on the sole of their boots.

Sure, I dislike the Drake 8 series ergonomics intensely, to put it mildly. I don't think it's anywhere near the receiver the R7's were, and it's very cheap looks and feel turn me off too.

The R-75 is ok, not great, and I hate the amber color display.

The FRG-100B isn't that bad, but it's not great in the filter dept.

At this time:

JRC NRD-515 "Gilfer" with the "knobpot" fine tune mod, with 500HZ and 300HZ added filters. 96 Ch mem box, and the crappy sounding NSD-515 speaker I don't use. Bought it 21 years ago last month. Needs a little touch up alignment on the PBT.

JRC NRD-525 later production with the Kiwa Ultimate rejection mod, with 1.8KHZ and 500HZ filters added.

Kenwood TS-850SAT, with 1.8KHZ SSB filter added. I recently recapped it and changed the battery ..works great.

Hammarlund HQ-100, added product detector, and with a whole lot of other mods. Equal or better than anything under 500 bucks I've put against it, except where stability is concerned. Sounds great too. Bought on Ebay for 58.00, including shipping. Only problem has been a 12AX7 went funky and it sounded nasty until I replaced it.

Allied SX-190, Weak on all bands except for 9.4-10MHZ, where everything is blasting in now. I still can't figure out why the other bands are so

far down. Has to be something minor since the one band is working so well. When I bought it, it was nearly deaf, and was very dirty outside, very clean inside. I put the case through the dishwasher, and it came out looking great, just a few minor scratches on it. All the original light bulbs still work!

Icom R71a. Was totally dead when I bought it at a hamfest, had a bunch of bad solder joints and really reeked of smoke. Works 100% now, except for LSB has a warbling on it that I can't get rid of. Not bad, just enough to drive me nuts. Even after trying everything to get rid of it, including washing the case in the dishwasher, it still reeks, just not as bad as it did before.

That's it for now..

Oops, the 515's speaker isn't the NSD-515, that's the matching

That's usually from the cheap trimmers on the PLL board. Replacing

Relentless indoctrination by a vast corporate media complex has convinced many that the United States of America is an exceptional nation. Charged with the sacred duty of preserving Pax Americana, the United States is purported to be the embodiment of the ideals of truth, justice and liberty for all.

Before making firm intellectual commitment to such pleasant fictions, consider these questions:

Why is it that virtually every liberal or progressive proposal for socioeconomic or political change in the United States is still-born, or on the rare occasions it survives the birthing process, it is beaten into submission by a domineering patriarch?

And why have virtually all crusaders for progressive causes in the "land of the free" wound up imprisoned (i.e. Eugene Debs), deported (Emma Goldman), or assassinated (MLK)?

For a nation that Thomas Paine, the intellectual catalyst of the American Revolution, envisioned as "an asylum for mankind", the United States has not been very hospitable to dissent or dissidents. How can this be?

A simple summation of a highly complex answer is that powerful reactionary forces are consistently poised to suppress those who dare to challenge the tyranny of the de facto aristocracy and corporatocracy. And they have an extraordinary propaganda machine known as the mainstream media to sustain the myth that the United States is a nation governed by and for "We the People".

One can readily find multiple examples of other governments and nations guilty of heinous crimes against humanity, but with a foreign policy that has resulted in the annihilation of millions of civilians, the United States is as malevolent as some of history's most despicable empires. And the "bastion of human rights" has a highly questionable track record domestically too. Ask Native Americans and Blacks how their ancestors fared in a nation populated largely by self-professed Christians and ostensibly governed as a constitutional republic.

It HAS happened here

Tragically, the forces of avarice, militarism, nationalism, and lust for power have all but extinguished the bright illumination cast by those amongst the Founding Fathers who were deeply influenced by the Age of Enlightenment. Despite its military and technological prowess, the United States is awash in ignorance, superstition, repression, and fear reminiscent of the Dark Ages.

Holding the reins guiding the world's sole remaining super-power, the United States' ruling elite have seized (or perhaps created) a ripe opportunity. Preying on ignorance and fear, they have convinced many amongst the masses to sell their souls for the "security" of fascist and corporate rule.

Fascism is multi-faceted and has been defined in a multitude of ways. However, Wikipedia provides a simple and succinct summary of fascism's widely accepted defining characteristics:

Fascism is associated by many scholars with one or more of the following characteristics: a very high degree of nationalism, economic corporatism, a powerful, dictatorial leader who portrays the nation, state or collective as superior to the individuals or groups composing it.

Yes, ladies and gentlemen, Sinclair Lewis' prediction has come true. And despite desperate propagandistic attempts to preserve the false cloak of humanitarianism, the Bush Regime is overtly displaying the innate savagery and predatory nature of the American Empire, Inc.

In the United States' version of a fascist state, the flag and those who mindlessly Pledge Allegiance have become nearly ubiquitous. The so-called "Patriot Act" has severely diminished civil liberties yet is widely accepted as necessary to preserve the security of "our nation". Two consecutive elections (each of which denied US citizens the opportunity to truly influence the outcome) "catapulted" a morally and intellectually bankrupt man into the role of "leader of the free world". Natural disasters occur and thousands of human beings are left to suffer and die. Imperial wars cost hundreds of thousands of lives, plunge the nation further into fiscal and moral bankruptcy, and strain military personnel beyond their limits. The Decider and company continue greedily consolidating power to elevate Bush to the position of a unitary executive. And thanks to the zealous efforts of the Bush Regime, the widening wealth gap and deep cuts to federal social programs are enabling some Developing Nations to surpass the United States in areas such as education and health care.

Corporatism and its evil ways.

With the rise of economic corporatism, the line between corporations and the federal government has blurred significantly. Dick Cheney is one of many key government officials who seamlessly slide between the private and public sector, closing the door on neither. In a blatantly criminal example, this "revolving door" has enabled Halliburton to win no-bid contracts and defraud tax-payers of billions of dollars.

Intense lobbying efforts, large campaign donations, and the manipulation of Congresspeople with promises to create (or threats to eliminate) jobs ensure that corporate interests prevail in the public arena. And with $600 billion of public money going toward military spending each year, corporate defense contractors have become the pushers for a nation addicted to war.

How did corporations become so powerful?

Germinating in the 19th Century, the legal concept of corporate personhood sank deep roots into the rich soil of predacious capitalism in the United States. Sheltered by the validation of the Supreme Court and the fierce protection of the ruling elite, corporate personhood has grown to Sequoia-like proportions. Bestowed with many of the legal rights of a human being yet lacking human encumbrances or limitations such as conscience, fear, and mortality, corporations are bastions from which acquisitive and malevolent individuals can commit egregious crimes with virtual impunity.

There are many examples of corporations that often abuse their power, put profits ahead of human welfare and the environment, and wield undue influence over public policy.

Shall we consider one such corporation?

"Have a Coke and a Smile and Shut the Fuck Up"

Coca Cola is as much a part of the American Way as baseball, hot dogs, and apple pie. What could be more wonderful than an American icon producing a refreshing soft drink recognized by 94% of the world's population?

Remember some of Coke's advertising slogans?

I'd like to buy the world a Coke

Coke adds life.

Coke is it.

(Yes, those are but a few of the taglines that Madison Avenue has seared into your cerebrum).

Despite some recent "hiccups", the soft drink leviathan cruised across the 2005 finish line with annual revenues of $23.1 billion and a net income of nearly $5 billion. So major investors, corporate executives, supporters, and Coca Cola addicts can truly "Have a Coke and a smile."

It's not a party for everyone.

Unfortunately, there are many people around the world who are not smiling with them. A campaign to Stop Killer Coke has gathered so much momentum that Coke spent $2.4 billion in advertising last year. To counter the exposure of the hideous truths behind the hallowed "Coke lore", Coca Cola has increased its advertising expenditures by 30%

since 2004.

With animated polar bears and Kris Kringle giving them the thumbs up while merrily downing their noxious concoction, how can Coke lose?

Hopefully enough people will awaken to reality and stop drinking Coca Cola beverages until it begins producing and marketing healthier products in an ethical way.

And what are some of these ugly truths veiled by the powerful illusions that $2.4 billion per year can create?

Ray Rogers, head of Corporate Campaign, Inc. offered this analysis:

"They are right at the top of the worst companies in the world, and yet they've created an image like they are American pie. When people think of Coca-Cola, they should think about great hardship and despair for people and communities around the world."

What are some of the hardships and despairs associated with Coca Cola?

India is the scene of some of Coke's most serious crimes.

In the remote village of Plachimada, Coke's $25 million bottling plant depleted the water wells of locals. Adding insult to injury, Coca Cola also distributed "free fertilizer" to indigenous farmers. The "fertilizer" was a by-product of its production process and was loaded with cadmium, a carcinogenic toxin. Locals staged an ongoing demonstration at the plant starting in 2002. In 2005 the Kerala State Pollution Control Board shut down the Coke facility.

A Coke plant in Mehdiganj has caused Indian citizens in twenty towns to face significant water scarcity with water tables dropping by 18 feet.

Pesticide levels in Coke produced in India average 25 times the maximum levels established by the Bureau of Indian Standards. As a result, the Indian state of Kerala has banned the sale of Coke.

It is instructive to note that the Bush administration, ever the corporate champion, dispatched U.S. Undersecretary for International Trade Franklin Lavin to issue this thinly veiled threat to India:

"In a time when India is working hard to attract and retain foreign investment, it would be unfortunate if the discussion were dominated by those who did not want to treat foreign companies fairly."

Yes, Franklin. It is indeed unfair that people in India don't want to drink pesticide to enhance Coke's profits. And Coca Cola thanks you for providing a return on its investment of $380,000.00 to the Bush presidential campaign in 2004.

In his April 2006 ZNet article, Sucking Communities Dry , Joe Zacune of War on Want wrote:

The company admits that without water it would have no business at all. Coca-Cola's operations rely on access to vast supplies of water, as it takes almost three litres of water to make one litre of Coca-Cola. In order to satisfy this need, Coca-Cola is increasingly taking over control of aquifers in communities around the world. These vast subterranean chambers hold water resources collected over many hundreds of years. As such they the represent the heritage of entire communities.

It is indeed ironic that the company that once used the tagline "Delicious, wholesome, thirst quenching" is depriving significant numbers of people around the globe of ready access to potable water.

And do the ends justify the means? To offset its theft and poisoning of water supplies, does Coca Cola create an elixir that benefits humanity in a substantial way? Hardly....

Here's to your (deteriorating) health.

Coca Cola easily dissolves tooth enamel. Its high phosphorus contact causes the depletion of calcium in the body. Calcium depletion increases the risk of osteoporosis in adults and of bone fractures in adolescents. As calcium leaves the body, it is often collected in the kidneys to form kidney stones. Coke can also impede proper digestion and exacerbate acid reflux.

And let's not forget the additional "health benefits" to Coke drinkers. The extremely high sugar content increases the chance of obesity 1.6 times each time a person downs a soda. And to complement the lovely prospect of becoming obese, the over-consumption of sugar associated with drinking Coke on a regular basis puts one at risk of contracting Type 2 diabetes.

In 2002, Dr. Francine Ratner Kaufman wrote of a disturbing trend involving our children, who happen to be frequent targets of Coke's advertising:

As the new president of the American Diabetes Association and as a pediatric endocrinologist, I have had the opportunity to appreciate the recent change in the face of type 2 diabetes in the United States. Type 2 diabetes has changed from a disease of our grandparents and parents to a disease of our children..In 1992, it was rare for most pediatric centers to have patients with type 2 diabetes. By 1994, type 2 diabetes accounted for up to 16% of new cases of pediatric diabetes in urban areas, and by 1999, it accounted for 8-45% of new cases depending on geographic location.

"Relax with Coke".But don't try to work for them

Coke has been particularly hard on the health of union activists and members. In Colombia, nine Coca Cola-employed union leaders have been killed and hundreds of union workers tortured, kidnapped, or attacked by right-wing paramilitaries. Ironically, the timing of the violence of the paramilitaries has coincided with union agitation and contract

negotiations.

The New York City Council sent a group to Colombia to investigate Coca Cola's potential responsibility for the murders and assaults. Documenting 179 human rights abuses and determining that Coke's bottlers were closely aligned with the paramilitaries who committed the crimes, the investigators issued this statement:

"The company denies any involvement in the threats, assassinations, kidnappings and other terror tactics, but its failure to protect its workers even on company property, its refusal to investigate persistent allegations of payoffs to paramilitary leaders by plant managers, and its unwillingness to share documentation that might demonstrate otherwise leads the delegation to the conclusion that Coca-Cola is complicit in the human rights abuses of its workers in Colombia."

In May of 2005, a Coca Cola facility in Turkey fired five union organizers. A day later, Coke fired 50 union employees. When the fired employees refused to leave immediately, Coke had Turkish riot police known as Cevik Kuvvet drive them off by beating them.

Coke was not finished. They waited five days and then fired 50 more union members.

In July, the fired union members and their families gathered at the Coca Cola facility to peacefully protest their termination. 1,000 Cevik Kuvvet sprayed them with tear gas and beat them with batons. Coca Cola's violent suppression of union activity sent 90 people to the hospital that day

According to a detailed report by Human Rights Watch, child labor is rampant in El Salvador. Children as young as eight are subjected to back-breaking and dangerous labor harvesting sugar-cane for subsistence wages. Companies purchasing and using the sugar enable and perpetuate this morally reprehensible practice.

Human Rights Watch asserted:

One such business is The Coca-Cola Company, which uses sugar from El Salvador's largest mill, Central Izalco, located in the Department of Sonsonate. Coca-Cola uses Salvadoran sugar in its bottled beverages for domestic consumption in El Salvador and in its canned beverages sold throughout Central America. At least four of the plantations that supply sugarcane to Central Izalco regularly use child labor, Human Rights Watch found after interviewing children and adults who work on those plantations. When Human Rights Watch brought this information to Coca-Cola's attention, Coca-Cola asked its supplier mill to conduct its own investigation into the use of child labor on plantations that supply the mill. Coca-Cola's extensive response to the information provided by Human Rights Watch did not contradict our findings.

In 1946, one of Coke's advertising slogans was:

Whenever you hear "Have a Coke," you hear the voice of America

I wonder how often eight year old El Salvadoran children hear the voice of America and think that "Coke adds life"..

They're counting on YOUR support!

After weighing the evidence, I have decided to excise soft drinks from my life. And that is no easy task for a "four can a day" addict. So the next time you are downing a refreshing can of soda, I urge you to resist Coke's $2.4 billion mind fuck and think about thirsty human beings drinking cadmium-contaminated water, pesticide cocktails, "fertilizer" derived from toxic sludge, decaying teeth, corpulence, child diabetics, murder for hire, police batons cracking skulls, children suffering the horrors of child labor, and the growing trend toward global fascism.

And remember to"Enjoy that refreshing new feeling." Fascist elements are counting on your blind loyalty in their bid to subjugate the world's masses to corporate domination.

I replaced all of them already, maybe one of the new ones is bad. Thanks anyway for the hint. I think there still might be a cracked joint or a part with a bad lead. I pushed around on the PC board and got it to stop ONCE, for about a minute, but I haven't been able to affect it much since then. I got a new can of freeze spray a while back, and may try it and see what happens. It gets slightly worse as it warms up. Slightly. If I can find the part, it should be a 10 minute fix. Then I can sell it for a nice price, since it looks great now.

I was amazed at how many bad looking joints are in every R71A I have looked at, and it's at least a half dozen. Same goes for about every other Icom transceiver made about 20 years ago. Most aren't really bad, but they sure look like they will be. Kenwood's soldering looks better, in general, but my 850 had a lot of bad electrolytics, and whoever decided to put 15V caps in the 13.8 side of that rig should have been canned. A bunch of the 10V ones in my radio were totally dried out, and a few were leaking. About 10 bucks worth of new caps, and a lot of work, and it's very nice now. I have a slight whine on 25-27 mhz, but it goes away with an antenna hooked up. I think it may be normal.

Sitting in the basement is a Sony CRF-160 - a cheaper alternative to the 320. It's a huge, heavy, dual conversion analog multiband portable from the 1970's which selects the shortwave bands using a revolving drum selector and bandspreads each SWBC band.

Over the years I'd used it occasionally and, apart from crankiness of the drum selector contacts (which usually cleared up when worked through a few clicks back and forth) it functioned quite nicely. Very sensitive and selective, with that superb bassy audio that older Grundig sets are also known for.

Now, after a long time sitting unused, I find that both the AM and FM flywheel tuning knobs are frozen solid and can't be turned. Assuming that parts aren't available for something of this age ... but perhaps there is something inside that can be lubed or rubber replaced ... I'm soliciting opinions as to whether this is even worth trying to get repaired.

I don't have the time or inclination to do it myself ... how would one go about finding a shop that specializes in restoration of this type of rig? Or perhaps a collector that would like to add it to their collection regardless of functional state? Any ideas?

OK, speaking from tube radio repair experience:

Well, the band selector contacts are USUALLY cleaned with something
like TV tuner cleaner spray. The tuners probably suffer from dried up
grease and can usually be freed with some Ronsonol or WD-40 to break
up the old gunk. Apply a few drops of light oil and it should be
fine.

If you don't want to get it fixed, or don't want to fix it yourself,
I'd be happy to take it. Just let me know how much it would be and if
the thing still makes any noise -- you know....like station static or
whatever. Email at stephanienyc at gmail d0t c0m

Looking around the net, there seems to be two ways to do a triangular
loop. One is a single pole, i.e. point at the top, and the other is
two poles, i.e. point at the bottom. I can see the advantage to the
point at the bottom. There would be less capacitance from the antenna
to the ground.

'From what you describe, a cold solder joint sounds a likely
candidate. R71, R7000 and R7100 were particularly prone to
deteriorating solder connections. Mostly due to heat generated by the
regulator, which was woefully overtaxed.

Often, replacing the regulator with something more robust would solve
many problems.

Actually, the principles of good design recommend that electrolytics
be operated as closely as possible to their rated working voltage. This
helps keep the capacitor properly formed over a longer period of time,

and it helps reduce leakage.

An electrolytic operated an appreciable distance from it's working
voltage rating will be more prone to diffuse leakage, though less prone
to perforation.

A bunch of the 10V ones in my radio were totally dried out, and

Also amazing, as I've pointed out many times before, is that just around the same time you claimed to be in South America, miraculously, in a discussion about John F. Kennedy's assasination, you claimed to be working at a radio station in the USA on November 22, 1963.

If you're going to Bonaire you might want to see what is left of Trans
World Radio down there. For a while, RNW used TWR's facilities and one
used to be able to hear a bi-lingual version of RNW's "Happy Station
Show" in much of the U.S. on TWR's mighty half-a-megawatt transmitter
on 800 kHz. (down to, IIRC, 100 kw)

Here's a page about RNW Bonaire on the website of a Bonaire youth
center. I see stuff about touring the youth center but not RNW-B.

I have to cut you off right here. Radio stations don't present to agency clients. They present to media buyers at ad agencies, based on the specifications those agencies have for each buy. The amount per market for radio, the number of stations, the demos, etc., were determined way before the call for rates gets out, and generaly stations don't even know a campaign is being prepared until it reaches the buying stage.
>
> It's real simple. Tell the truth. Stop the hype, and just tell the

The truth is that agency buys have the ages and budgets set by the client, and a single radio station... even a group of them... has generally no contact with the client. The ad agency carries out the client's marketing plan, which probably was done after spending a lot of money on research and product development.

Ad woe to the station that tries to contact an agency client directly to have a buy changed. That will likely be the last time the station ever gets any business from that agency. In fact, it is generally considered unethical to call on an agency client, and viewed as tortuous interference with the client-agency relationship.

I never worked at WFAB. I visited it on a spring break, once, for a day. The gifts of a box of Cuban music LPs furthered my interest in Latin music.

Correct. It is possible to have more than one part time job during a year... maybe, as an unemployed person this is hard for you to understand. I know DJs from the 60's and 70's who worked in three different markets in a year and maybe did 20 stations in a 30 year career... it's not unusual in 60's and 70's radio.

This is the closest you have come to answering the question. Again, in
your own words what does "field strength" in mV/m mean? What is it
actually a measure of? What does this measurement represent?

A measurement of "field strength" in mV/m does not sound like a
demographic to me.

How does 79.084 dBu compares to 9 mV/m? What is this dBu term? Please
explain what this means other than it being some line on a map. What
does this measurement mean for my radio reception?

If you know how to use Excel you can manipulate the file as a flat file
data base. In addition to sorting on any column or up to any three
columns at a time you can also search or find numbers and text.

Yes, I know that. I've been around, David. But I also know that
the people inside each organization talk to each other. And somewhere,
there has to be one button you can push to make someone listen to a new
idea.

Especially, at your level.

I'm not talking about doing things the way they've always been
done. And for the most part, here, that's what you're trying to sell
us....the idea that institutionalized interference is something to be
embraced because it heralds a new future.

Ok....if you can take that message outside of normal channels to
us, then you can take a new sales pitch to the agencies outside of
normal channels to them.

Don't tell me it can't be done. I've cut too many wormholes in my
career to not know better.

Besides, it's the nature of creativity to do, present, execute, or
discuss something that's not been seen or done before.

And you know this.

Stations with older demos have been attempting this for years... decades. If an agency has an order from the client to seek women 25-44, there is no way they are going to buy a station that is mostly 45-64 or 55+. The agency has nothing to gain by switching a "right" station on a buy for a wrong one. All they do is endanger the account relationship when the analysis of deliverd gross ratings points against the campaign target falls short.

Agencies don't determine demos in most cases. The client does. The age range the client wants is part of developing the creative concept, so it will appeal to the consumers the advertiser wants to reach. Once the creative is approved, and often tested against the target demo, media budgets are allocated and the buy specs are given to station reps so they can quote against the cost per point goals for each market.

Nowhere does a radio station have an opportunity to change the creative, the demo or the appropriate media.
>

Stations have tried for years and decades as I have mentioned. Occasionally, one will get a little spillage money when the buyers get better than anticipated rates... but they still have to deliver, manybe not as efficiently, the target demo to some extent

The idea of a 55+ radio station trying to get P&G to change product design, packaging and marketing so they can get on a buy is actually somewhat humorous.

I have no idea what it means for your radio reception.

The equivalent, by the way, comes from the handy conversion calculators the
FCC has on its website. Most of us in radio use mV/m for Am and dBu for FM
to plot contours.... and that is the way the FCC accepts applications.
Jeeze, I even cited a sample FCC filing map showing this.

For the average listener, the precise location of contours is irrelevant.
Either they get a station "well" or they don't. It's been proven with
boatloads of data that AM listeners are seldom found beyond the 10 mV/M
calculated contour of a station and beyond the 64 dBu contour for an FM.
when the signal is weaker than that, it appears that listeners don't find
listening to be pleasurable so they don't use stations with weaker signals.

Every station I've ever worked for has a local sales department.

Start there. Hands on. Direct contact with a client. All it
takes is one success.

Yes, it is. That's why I didn't suggest it. I suggested
changing the pitch. Not the product.

All good ideas.

Read the EiBi Files on-line as you need to and
do a "Find" Text Search to find the Frequency

Print them out and read them at will without a
Computer.

M-Suchi - Yes that is true.

I guess a Trianglular Loop with a single Apex {Point} that
is supported by a one Pole would be called a Delta Loop.
* These might have a Larger {Higher} Vertical Aspect and
a shorter Horizontal Base Side.
* With Base Corner Angles 60 Degrees or greater.
* Uniform Distance from the Ground and therefore fixed
ground Capacitance and a narrower BandWidth.
The result would be a Delta Loop Antenna with a
predominate Front and Back area of reception.

While a Trianglular Loop with a Flat Top Side supported
by two Poles would be called an Inverted Delta Loop.
* These might have a Larger {Wider} Horizontal Aspect
[Longer Flat Top] and a shorter Vertical Height and Sides.
* With Base Corner Angle 90 Degrees or greater.
* Variable Distance from the Ground and therefore non-fixed
ground Capacitance and a wider BandWidth.
The result would be an Inverted Delta Loop Antenna with
a less predominate Front and Back area of reception.

FWIW
.
My Sony ICF-2010 'portable' AM/FM/AIR Shortwave Radio
has a Serial Number of 357,363 and these were produced
in the last year or two of production. The Radio was not
in continous production; but when they ran out of them;
they produced another Batch to meet the demand until
they ran out of Radios again.
.
I bought my Sony ICF-2010 Radio New-in-the-Box from
J&R Electronics in September 2002. {$343+S&H}
http://www.dxing.com/rx/icf2003.htm
.
My Sony ICF-2010 Radio is marked "Made in Japan" [.]
And all the Documentation is marked "Made in Japan" [.]
.
Note - Some have stated in the past that the later Radios
were made in Taiwan, China etc and not Japan.
* Inferring that the later Radios where of inferior quality
to the first ones produced in Japan.
* * But I think that my Radio proves that that was not
the case : Being that it was "Made in Japan".
.
IMHO - The newer (Higher Serial Number) Sony ICF-2010
Radio that you can buy the better change of getting a
Radio in 'good' to "Very Good" over-all Condition.
.
Note - This one is claimed to have Serial Number is 365xxx.
.
Side-by-Side - Overall I prefer the Eton E1 Radio over the

Sony ICF-2010 Radio. {Just My Opinion}

Your "timeline" doesn't work, as it's full of holes AND lies.

In researching the record I find that you've variously stated that you "visited" WFAB and that you "worked" at WFAB for the summer.

So which is it? How many stations have you "visited" and have later claimed to have "worked" at?

Inquiring minds want to get into the head of a pathological liar to see just what makes you tick.

Mr Eduardo:

I noticed you ignored my rant about my visit to Radio Shack to demo a "HD" radio.
It seems the HD is going go the way of the "New Coke" of the 80's if you cannot get a affordable decent receiver. As a marketing man, I'm sure you remember when Coke decided to change their formula because their survey people claimed that the youth of America perfected the taste of Pepsi over Coke and stopped product of the original formula. Well, I remember the great sales at the stores, as they attempted to unload the unsold "New Coke." I will admit that that I read a couple years ago that "New Coke" sell well as a fountain drink at some trendy rester aunts, but Old Coke is the leader at the supermarket, where most of the profit is for them.
While HD may be improved, if you can't receive it while jogging, at work or in the car where most of the people listen, how are you going to sell it? I have HDTV and am very satisfied, but I can see and here the difference in quality, as well as the extra offerings on most of the channels here in town with my old antenna much better than the analog reception. While at the Radio Shack with their professionally installed antenna, the HD radio signal did not lock on. Now I have at $300 Ten Tec 320D receiver and the DRM decoder software plus Open source "Dream" software, and with its own whip antenna, I could receive "Radio New Zealand" some 6000 miles distant from my location with very few drop-outs, and even better reception than there more powerful analog signal, when I hooked it to my 25 foot homemade inverted-vee. The nice part about that system, I didn't have to junk my radios, just to receive it. My JRC535D was able to decode it also with out modification.
Once, when European signals where coming in my location, I picked up the DRM signal direct from Germany, and saw how a Digital signal could be set up, They had to voice channels simultaneously plus a web page that I was briefly able to decode.
Maybe you could interest the power that be, to utilize the HD signal to download web - pages such as detours, traffic jams that would be pertinent to the user, plus you could set it up for the user to interface with the computer for products etc, not just a replay of the morning drive time show. This will not happen unless your industry can come up with a more flexible system.

Like it or not, you'll have an exclusively 55+ audience if you don't

I wish I could make young people throw away their ipods, their FM
radios, and just about everything else they're interested in so that
they would develop an interest in the amazing hgh and the programming
on your radio stations. However, that's just not realistic. You have
to face facts. You have to make some major changes, and a digital
paintjob ain't gonna do it. You're in a pickle!

Something is bound up, possibly from dampness in the basement or
accmulated grime or both. I'm guessing you don't want to try a
complete assembly. So, I would try a bit of oil on the bushings that
the tuning knobs ride in and the bearings of variable capacitor.
Don't use too much or it will get all over things that should not be
oiled. Let it sit and work the parts gently so as to not break any
dial strings.

Do you really want to do a restoration, or just get it working again.
A full blown restoration could involve a fair amount of $$.

The only stations I owned were those in Ecuador, including 4 AMs and 5 FMs
in Quito, and AMs in Cuenca, Ambato and a couple of other places in the
country as well as a partnership with Jaime Nebot Velasco for one in
Guayaquil.

Mr. Gleason, you are full of shit. It's been proven time and time again that you are nothing more than a sad little pathological SOB who will lie at the drop of a sombrero.

A lot of the early radios were simply bad. Now we are in the third generation, and they are better but the really good things will come in 2008.

Samsung and others have announced new, low power chips for Q1 of 2008. These will enable portable devices. Remember, portable CD players took 6 years to get to the $100 price point.

Most radio listening, about 70%, is at work or in the home, not in the car.

Data streams for all that sort of thing are coming. And the new iPod has HD features:

"After 18 months of behind-the-scenes development, iBiquity and Apple have connected radio to the iPod. It comes as Polk Audio releases the next generation of its I-Sonic and the JBL iHD receivers. With this device, listeners can "tag" songs they hear then buy the song via iTunes. Several groups have already struck licensing deals with Apple. Is this the technology breakthrough radio has been looking for?"

You aren't very good at lying, so you probably shouldn't do it so
much. You always seem to get BUSTED.

The Edweenie song:

He's been busted in Miami...
And down San Diego way...
He's been busted in Portland...
And in Ecuador they say...
Edweenie's been busted... Busted USA...

Someone I read on the web (wish I could remember who it was...) made a
very funny comment about HD, at least insofar as HD is viewed at
something that might "save" AM. He said that trying to save AM with HD
is akin to polishing a turd. If we can just make bright and shiny

enough, people will want it!

I think Mr. David Frackelton Gleason (who poses as 'Eduardo') believes that a turd can be picked up by its "clean end".

<BUSTED!

Except for the minor fact that dxAss has fabricated a post. The idea that anyone would intentionally spend the Summer in Miami is, on its own merits, absurd.

Started the weekend drink-a-thon early? I am starting to equate your

Yes you did!

Here is what you stated, yet again, Mr. Pathological:

"Hell, also not mentioned was working all summer at WFAB in Miami in, I think, 1961. It was the sister station of where I worked in Cleveland"

Mr. Gleason, you are full of shit. It's been proven time and time again that you

are nothing more than a sad little pathological SOB who will lie at the drop of a sombrero.

OK, then why did you lie about it to begin with?

Sorry Edweenie, you can try to fabricate anything you wish to try to obscure the fact that you have been caught in yet another lie.

No bozo, there is nothing that requires it to be in English.

Once again, you are not the "messenger" you are trying to
interpret, and you do a lousy job because you have too narrow
a vision.

you are babbling about?

You once again change the subject header with no reference
to the original post.

You quote nothing, not even who posted the message youa
re replying to.

You are the one messing up this newsgroup, because you have
no real understanding of things. You still thing this is a
"google group" and that everyone views it the way you do.

It's not a "google group". JUst because you use google to
access this newsgroup, which has been around far longer than
google, doesn't mean everyone is. I would make the point that
anyone posting from google is incapable of doing any sort of
policing, because they post from google.

Keep your trash out of the newsgroups, and they will be a better
place.

David, it happens every day.

Give you an example:

When I was Production Director for CBS Radio, in Chicago, I
went with the sales mangler of the Country station, WUSN, to a meeting
with the head of the in-house agency at Pepsico to hopefully get them
off their hard'No Country' bias and buy the station. The meeting didn't
go well. The rep came out with figures, demographic breakdowns and
perceptuals that told us we were pissing in the wind with Pepsi drinkers.

On the way back to the station, sitting in delightful Kennedy
mid-afternoon traffic so we had a lot of time, we hatched an idea.

If the numbers weren't going to support us, we'd sell against
them with something else....exactly as both of us had learned working in
smaller markets.

I wrote, produced, appeared in, and narrated a 2 minute 45
second A/V presentation that told a different story. Not one statistic.
Not one figure. Not one demographic breakdown. Not one ratings book,
perceptual study or even testimonial.

What was on the screen was picture after picture of Country
music fans at concerts, music festivals, and meet-and-greets with cups
and cans bearing the Pepsi logo. None were staged. They'd been taken
over the previous 12 months at station appearances. And they were
progressively larger numbers of people drinking Pepsi on the screen.
First one, then two...three....you get the idea...until we got to crowd
shots at Country Thunder, and the Country Music Festival put on by the
City of Chicago. The second to last shot was of 10,000 screaming Country
Music fans. Many with visible Pepsi cups and cans taken with the Pepsi
mobile display van visible at the back of the crowd.

The copy went through the history of Pepsi, and Country music
and ended with the line just as that near final shot came up:

"And yet for some reason, the company thinks that Country
Music listenerd don't drink Pepsi.

"What, are you KIDDING?"

At which point the screen went dark, and a picture of a Coca Cola truck pulling into Lamb's Farm appeared on the screen.

It was a whole different meeting, that day. No figures, no statistics, no double talk.

But we did leave the buildling with a pretty decent buy and Pepsi signed on as a co-sponsor of the US 99 Family Day Jamboree at Lamb's Farm.

Yes, David, radio stations DO have the opportunity to change the creative, the demo or the appropriate media.

I've done it. I've been involved in meetings with agencies and agency reps for Mercedes-Benz, Cheseborough-Ponds, Proctor and Gamble, Ford, GM, Chrysler. An amazing meeting in Atlanta with Coca-Cola. Yes, it does happen, Brother David.

It happens every day.

It's one of the reasons you have a sales force.

If you're not availing yourself of the resources, that's not the medium's fault. It's not the agencies fault. It's not the client's fault. It's YOUR fault.

With your experience and with your resources, you can make this difference. All you have to do is stop 'third circling' and see a way.

The idea of a Radio Station trying to get P&G to change a product design and packaging, IS rather humorous. You'll notice I didn't suggest it. I suggested changing the pitch.

And THAT happens every day.

C'mon, David, you really are smarter than this.

What I've noticed in the last 48 hours...is that he's not addressed a single point I've made. Only cut off discussion at a point where he can fall back on 'the way things have always been.'

It's not uncommon for a PD to take that tack, though. It comes with the office.

It also comes with someone who has been a known pathological liar for over 50 years.

Fact.

You can take that to the bank.

I had to give up my Sony Betamax when their factory-trained guy wanted
$400 to just replace the tape heads. Best bet on the radio is to find
an electronic shade tree mechanic... a Google search brings up some
possibilities.

It should be, I primarily do UTES not DX though. It's plenty sensitive down there, especially with the input filter bypassed (By the keyboard command). It works great for everything, pretty much.

I had one of the first 525's made and it had a couple of issues that annoyed me a little. The earlier ones hiss pretty bad in general, and if your ears are still good, it will annoy you. Later ones are a lot better. The hiss problem can be solved by just turning the speaker so it's not facing you, so it's not a huge thing. If you are like a lot of my friends in their 40's and 50's, you will say, "What hiss?" My ears are still pretty good, so I just laugh when they say that. Apparently I'm rare, I can still hear past 20khz with my right ear, and to about 17khz with my left. Going to drag races without ear plugs, and having a big dog whose hobby seemed to be yelping like he was being killed every time I started to get out of my car has left a dip in the response in my right ear, right where women's voices are, and so my hearing is crap compared to 20 or 30 years ago, where I could hear quartz watches humming 20 feet away.

The early ones had an AGC issue where fast AGC was "clicky" on very strong signals. The later ones don't do this, and the S-Meter isn't nearly as "spastic" as the first ones are.

None of this really means anything in any SSB mode, where the 525 is really good. Not quite as sensitive as my 515, or the Drake R7a I had here for a while (fresh from A Drake checkup), but very close. Since my 515 is modded, it's not a really fair comparison. The R7A and the 515 were roughly equal on some freqs, and on the low end the Drake was better, and above 25MHZ, the 515 was more sensitive. Both of them, in the winter when it's quiet, could pick up SSB voice comms that were amazingly weak with perfect copy.

If I had to pick one single receiver, I would have to take the 515, just because of the Drake's horrible ergonomics. JRC is the best ever, IMO, in the "pleasure to use" category. Even the later ones, the 535 and 545 are nice to use compared to most other radios.

One more thing to watch for if you look at buying a 525, the keypads are wearing out on them, and if a previous owner was a "puncher", it's a headache to fix. JRC used very cheap switches on the pad, so they don't take abuse well, and a couple of the ones I worked on have had broken traces on the front panel PC board. JRC had a ton of the switches, and any other place like Digi-Key sells the same, or close enough to work switches for about 20 cents each.

I own a very old pair of made in Germany Binoculars, with the leather carrying case, in fair to good condition.The language/printing/words in the case are German language.I bought it for $20.00 at a junk store years ago, I bought an old electric fan for $10.00 with a brass blade on it there too.(some old electric fans are worth a lot of money, I own quite a few of them,,, eBay,,,, GO to HELL!!!!) I think they date back to around World War One, or earlier.The right hand side of the eye piece is turned all the way out, it will not budge at all.I have tried several kinds of penetrting fluids on the threads before and letting it soak, still no luck.Of course, I will not try to force it with any pliers.

I think you will need to take your radio to an expert to get those knobs thingys loosened up and working again.

To Make AM/MW "HD" {IBOC} Radio 'Work' the
AM/MW Band Needs A New Band Plan :
- - - OTHERWISE DON'T DO IT [.]

1 - Designate all FM Radio Licensees as "Local" Radio
Service* Programming with-in an Expanded70 dBu Contour.
* The Key Word being Service to the "Local" Community;
NOT Marketing to the Consumers.

2 - Expand the FM Band into one of the soon to be
"Un-Used" VHF TV Channels.

3 - Migrate 50% to 67% of the current AM/MW Radio
Stations to the new Expanded FM Radio Band.

4 - Re-Define the AM/MW Band to 25 kHz Channel
"Spacing" with IBOC "HD" Radio at 10% ERP.
* Old Band Plan : 1700 - 540 = 1160 / 10 = 116 Channels
* New Band Plan : 1700 - 540 = 1160 / 25 = 46 Channels

5 - Transition to All "HD" Digital Radio within 5-Years
with all Analog Transmission ending by the end of 5-Years.

6 - Designate all AM/MW Radio Licensees as "Regional"
Radio Service* Programming with an Expanded 50 mv/m Contour.
* The Key Word being Service to the "Regional" Area
{State/States}; NOT Marketing to the Consumers.

that's the plan ~ RHF

Then all you are doing is cluttering up the newsgorup bozo. There
is no content in them, you are just doing it to change the subject
header. And thus they do appear as not only you starting yet
another off-topic thread, but they have absolutely no value.

To give it context.

Since you are abitrarily declaring what's on and off topic, then
how am I supposed to know that you are talking about spam when there
is no easy reference to the post you are refering to? Just because
at your stupid google everything is convenieniently lined up so
people won't see the original subject header unless they look in
the thread is not what the rest of us see. You don't know that
because you still think this is a google group.

You are in effect doing the same thing as the village idiot, who
can't be bother to live up to community standards and quote
some of what he is replying to. Most of the time it's drivel anyway,
but without the context of what he is replying to, there is absolutely
no reason to read his junk posts.

I basically tuned out of this newsgroup for a few weeks, because everytime
I look in here there is a spew of your junk posts. I've been here a lot
longer than you have, so I can't help but wonder why I should have

to leave because of the nonsense ways you think will fix up the
newsgroup.

You aren't improving the newsgroup, you are messing it up.

I will never defend what you are doing because you are doing a lousy
job of it.

This isn't about fixing up the newsgroup, because if it was, you'd
be slapping down the village idiot for his junk posts.

This isn't about fixing up the newsgroup, because if it was you wouldn't
be replying to trolls like "radium".

This isn't about fixing up the newsgroup, because if it was, you wouldn't
be adding your two cents to the off-topic threads.

This isn't about fixing up the newsgroup, because if it was, you'd clean
up your own act so we didn't have to scroll down through all the previously
quoted material (leaving it all in is as bad as not quoting at all), only
to see we've wasted our time when you have one line of text that says
nothing of value.

This isn't about fixing up the newsgroup, because if it was, you wouldn't
be making the mistake of thinking all these subject headers that you
spew into the newsgroup with "ot" in them are actually doing good. They
in effect give permission to the idiots who want to post off-topic junk.
"He's doing it, so I will too".

This isn't about fixing up the newsgroup, because if it was, you wouldn't
need correcting about the purpose of this newsgroup (such as the time or
times you've made your declaration about something being off topic

This isn't about fixing up this newsgroup, because if it was, you wouldn't
be getting into arguments with people about something they've posted,
all this nonsense when you single people out in subject headers and
then scold them or dismiss them.

This isn't about fixing up this newsgroup, because if it was, you wouldn't
have posted some months ago the obnoxious suggestion that people put
"ot" in their subject headers, in effect giving them permission to post
off topic. If it's off-topic, it doesn't belong here, and when people
actually put "ot" in the subject header, they know it's off topic and
are saying "I don't care".

IN essence, you are like a schoolteacher that has lost control of the
class. You aren't getting respect because there is nothing to respect.
Your nonsense notions of what will fix the problem is just something to
be laughed at. Your reaction to people who know better than you is
to dismiss them, rather than realize they have more wisdom and experience
in these matters than you do.

You are far more interested in this control than actually fixing the
newsgroup. This thread is a prime example, since it fits your scenario

to dismiss threads based on your own personal likes and dislikes. The village idiot can post, but if someone posts something fairly relevant to shortwave, but which is beyond your ken, such as solar flares, you declare it off-topic. You dismiss one thread on the grounds it's not "shortwave" when this newsgroup isn't specifically about shortwave listening, but includes other aspects of DXing, simply because you think the post doesn't belong here.

Given those conditions, it isn't really a leap to think, without that context you remove from your spew, that you'd dismiss a thread because it was in a "foreign" language.

>
> I understand that Usenet/Google Newsgroup
> Rec.Radio.Shortwave is about Shortwave Radio
> -not- "nice set of BIG T I T S"

No you don't.

This all started some years back when you posted all the fine print from google about what they say about posting ads. It was all irrelevant because google is not the newsgroups.

A few months ago you posted more fine print from google, as if it had some relevance to a newsgroup, which it doesn't.

You seem to feel it's acceptable to post off topic about the state of google's updating, when it has no relevance here. You think it matters because you can't imagine a world where people don't use google.

You're continued changing of the subject headers is another reflection of your confusion between google and the newsgroups. Yes, changing the subject header does make the original subject header disappear over at google, but this isn't google. You can't make decisions based on your vision of the newsgroup that is based on only using google. The rest of us have to live with your empty posts, and it is doing more damage at this point than the original.

If you post a message with no context to a previous post, then you are assuming the newsgroup is google. Because then you don't realize there is no centralization to newsgroups, and messages can get lost and people can read the newsgroup different ways, and that the context is indeed needed.

Likewise, you likely think nothing of leaving in messages and messages of quotes, because google has that way of making the quotes disappear. That's not the case for the rest of us, we have to scroll down to see the nonsense at the end of the post.

No, once again it's not about "shortwave radio". It's about
DXing, and that includes reception on the FM broadcast band
and the AM broadcast band, and listening to amateur radio (but
it stops there, since there is a whole hierarchy for amateur
radio), and listening to scanners (with the caveat that it's less on
topic since there is a whole hierarchy for that).

But I can and do ignore you, because you really don't have anything
much to say. A lot of links and in a really hard to follow style.

But then, I started noticing the subject header changing. Actually,
I thought you might actually be contributing, so I was suckered
into looking. That's when I noticed that you routinely, almost
pathologically, change the subject headers, and once again WITHOUT
GIVING ANY REFERENCE TO THE PREVIOUS SUBJECT. And that's when I noticed
how often you just leave in all the previous quoting, only to put in a
few lines at the bottom.

And then I started noticing how often you declare things here, like
how ads are allowed because google says so, like replying to a cross-posted
thread with an empty post will fix the problem, and so on.

I started paying attention when I realized you were a problem to the
newsgroup. When I ignored you because I felt you had nothing to say,
that was fine. But it's gone beyond that.

But, this isn't about "rights". This is about the nonsense way you
think you can fix the problem. And you aren't doing that.

So if slap someone who posts off-topic (and put the "ot" in the subject
header), that is my right. I suggest you have no right to play netcop
and come after me.

But that's the point. You play the "net cop". You are trying to be
The Law, rather than some poster who is reacting to off-topic posts.
Done well, you rally support and do some good for the newsgroup.
Done badly, and you really do it badly, you just mess up the newsgroup.

I'll ignore you so long as your posts really don't have much value,
and consist of virtually nothing but links. I'll ignore you so long

as your posts consist of a line or two after a long series of quotes
I'll even ignore you when you change pathologically change the subject
header, if it's just about the topic of this newsgroup.

But once you assume dictator of this newsgroup, then I can't ignore
you. Because you don't have a clue how to fix the newsgroup, and
in your blundering, you are making it worse.

People call you out because you are doing that to them, yet give
yourself permission to do as you please. You don't live up to
community standards in posting, and you feel you can post off topic
when YOU feel like it.

That is far worse than merely being obnoxious and posting off topic.

Michael

"If voting could change the system, it would be illegal."
--Theodore Adorno

"I can't go on. I'll go on."
--Samuel Beckett

One's actions grow out of one's beliefs. Beliefs grow out of the ecosystem of our collective lives known as culture. In this way, cultures are organic: they germinate, sprout, grow, bloom, bear fruit, then fade in accordance with the climes and terrain of the times.

America now grows: paranoid delusions and wishful thinking. These are our national plant and staple crop, respectively.

A strange genus of the former has overgrown the land. It began as a small hybrid, a member of the Bush family, growing mostly in southern and western states. Some theories hold that its origins were in Connecticut; although, when it was transplanted to Texas, it spread, unchecked, due to the fact that there are few herbivores in the region to limit its pernicious growth. There, in the dry Texas soil, it grew dense and thorny, and thrived when watered with blood and oil.

Left unpruned and unregulated, it grew thicker than an ancient oak, larger than a redwood: It became a Paranoia Sequoia, growing ever larger in the hot greenhouse gases of global climate change; its massive branches spread across the world, casting a shadow of fear and revulsion beneath it.

And it has bore strange and terrible fruit, indeed - as well as proliferate assorted nuts.

Unfortunately, its oily wood limits its use as timber that might be used to built anything constructive: Its wood is mostly suitable for crucifixes and coffins ... Yet, due to its aforementioned oily base, it can be used to build a bonfire large enough to set the world ablaze.

At present, the people of the United States are lost in a dark woods overgrown by these sun-occluding trees. Some among us have taken to ingesting hallucinogenic mushrooms (the aforementioned staple crop) sprouting from the forest floor. Upon ingestion, they tell of having strange visions involving a covey of Democratic dwarfs who will fell

the dark forest with their K Street provided axes.

In addition, borne of our desperation, many of us dream, two years hence, Prince Biden the Bland or St. Hillary, mounted upon her triangulating donkey of war, will come to our rescue and lead us from this dark and terrible place.

Such foolishness is understandable within the context of American culture: Our decaying empire has become an over-the-counter culture for legally medicated Lotus Eaters. Yet the effects of the meds are palliative. Prozac poops-out. Rush Limbaugh's Oxycontin certainties transmogrify into detox deliriums. The Republican Woodstock of the so-called "Clash of Civilizations" becomes the Altamont of Guantanamo.

Moreover, the comedown is going to be a real bitch ... Heads will throb; stomachs will churn, when the realization arrives: we've become addicted to a corrupt system, rigged for the benefit of a few, ruthless corporatists -- and maintained and enabled by both our political parties; accordingly, the lives of us ordinary Americans (who are dependent on this system because we have no choice in the matter) are no longer in our control ... Somewhere along the way, our freedom to chose went missing -- was waylaid -- as we were pimped into wage slavery for the profits of the corporate class.

I must confess: I wish there existed drugs that provided an effect powerful enough to allow me to hallucinate visions of hope.

Instead, I will proffer this stark fantasy: I believe, at this late hour, the second best thing that could come to pass in our crumbling republic is for the total destruction of the Democratic Party -- and then from its ashes to rise a party of true progressives.

Now, I believe the best thing that could happen for our country would be for the leaders of The Republican Party -- out of a deep sense of shame (as if they even possessed the capacity for such a thing) regarding the manner they have disgrace their country and themselves -- to commit seppuku (the act of ritual suicide practiced by disgraced leaders in feudalist Japan) on national television.

Because there's no chance of that event coming to pass, I believe the dismantling of the Democratic Party, as we know it, is in order. It is our moribund republic's last, best hope -- if any is still possible.

Regarding this, I hope I'm proven to be dead-ass, Flat Earth Theory, Warren Commission wrong.

How have I come to this despairing conclusion?

First a caveat: While I harbor little affection for nor feel any affinity with the corrupt establishment of the Democratic Party, I don't believe, as is the case with the present leadership of the Republican party, they're a klavern of insane, death-smitten apocalypticists. However, I do believe that a craven desire for power

and privilege has transformed them into morally bankrupt, lickspittle, corporate stooges.

For this, I believe, they have disgraced themselves as well. Does anyone believe that the denizens of K Street have, as of late, begun enriching the coffers of the Democratic Party because the lobbyist class now harbors a secret desire to create a system where a greater diversity of views can be promulgated? Yes, and Jack the Ripper stalked the streets of East London because he wanted to draw attention to the wretched plight of underclass women in class-stratified Victorian England.

Ergo, regardless of which political party controls congress, the empire will continue to unravel. Corporate "leaders," like feudal lords, will continue to ruthlessly wield power and have dominion over our lives no matter the outcome of the midterm elections of 2006.

The mind-shredding propaganda of the so called "free market" will continue to be our culture's defining mythos; its corrupt priesthood will continue to fleece their dazed and hapless flock.

American roadways and so called freeways will remain as clogged as the arteries of the junk food bloated commuters, sitting stalled and stupefied in traffic, within their grotesque motor vehicles, in the time-grinding limbo created by the international petroleum state.

Wealth, power, and privilege will continue to be consolidated by the already wealthy, powerful, and privileged. Public schools will continue to fail to educate. The over-fished, pollution-afflicted, global warming-decimated oceans and seas will continue to die.

Official lies will still proliferate like swarming locust. As a result, the public will grow outraged and demand more of their own rights and civil liberties be curtailed. The poor will disproportionately suffer while the rich will sleep the untroubled sleep of the kleptocratic class.

As, all the while, our fabled Shining City on the Hill will suffer ongoing brownouts and power outages.

Amid all of this disorder and dissolution what possible difference could it make to vote for either a corporatist Republican or a corporatist Democratic candidate? -- The runaway entropic decay of the present system cannot be reversed by political cant.

Ergo, this year, the voting public is being offered a choice between imbibing the Empire Lite of the Democratic Party or the Republicans' Empire Mad Dog 20/20. Accordingly, we've been provided with choice number one: stick with the Republicans and continue on with our planet-destroying bender (that will end in either the detox hotel named the Limits of Imperial Power or our being fitted with a toe tag in the Morgue of History reading, "Deceased. Cause of death: expired after succumbing to Acute Empire Intoxication Poisoning"). Or choice number

two: the Democrats' covert flask-sipping, internal organ-rotting, problem drinking of the heady drafts of corporate corruption. In short, both of the two major political parties have been privy to the bacchanal of bribery that passes for business as usual in the present political/economic system.

A vivid illustration of the hopeless mindset of chronically diffident Democrats is their failure to demand the use of traceable paper ballots this election cycle. In this way, they're analogous to a timid, denial-ridden spouse whose mate returns home, with smeared lipstick and disheveled clothing, sans undergarments, reeking of Jack Daniels, all the while, defensively asserting her fidelity -- after an impromptu road trip with an outlaw motorcycle gang -- and her credulous spouse believing the whole episode has strengthened the relationship by building trust between them.

Yet dread gnaws beneath the surface of the collective awareness of liberals and progressives. What belies Democrats inability to agitate for meaningful change is: At a deeper level, they, as is the case with most of us Americans, realize that, in order to live in the manner to which we have become accustomed, we must continue our complicity in the crimes of empire. Hence, they realize they would be politically burned at the stake if they ever ventured to utter such heresy aloud.

For, deep down, we know that our actions are not only unethical, but unsustainable as well. Our minds have difficultly grasping this fact; its ramifications are too overwhelming ... The knowledge -- that we maintain "our way of life" on the bartered blood of the innocent -- is too unnerving. Its implications are too damning; therefore, we banish such thoughts to the darkest regions of our unconscious.

It would seem: We can't see the forest through ourselves.

We whimper into the abyss for reassurance.

The abyss replies: "It's always darkest, right before ... it goes completely black."

In this manner, we unwittingly carry the darkness of empire. Perhaps, if we Americans were to unburden ourselves of the illusion of our exceptionalism, our load would lighten. It would be easier to support the load, if we relieved ourselves of the weight of so many lies, self-deceptions and rationalizations, as well as the other onerous byproducts of our denial.

At this point, given the abysmal levels of mass ignorance, self-deception and delusion at large, are we Americans even up to the task? Or has our pervasive disconnect from civic life deteriorated to such an extent that a majority of us are even capable of apprehending the dire circumstances confronting the nation? (It would seem that not only have we chosen to ignore an elephant standing in the living room of our collective awareness, but we have chosen to cover him over with nondescript upholstery and now regard him as part of the furniture.)

My motive for bringing this up is not to be merely provocative; I'm asking because I'm chilled to the core of my being afraid. Regarding it all, I'm in the thrall of a sitting bolt upright in bed, quaking with night sweats terror.

Nor am I coming from a lofty moral plane on this one: I'm coming from a pounding upon the ground despair -- a scanning the line of the horizon searching for any signs of hope desperation -- a shaking my fist at the indifferent sky rage.

As you may have surmised: I'm outright mortified as to where we as a nation are headed, regardless of the outcome of Tuesday's midterm elections. Given the bender of destruction we've been on, our nation needs far more help than a simple changing of the party affiliation of our corporate enablers -- it needs an intervention.

But that line of thinking would probably lead to a seizing of power by an Oprah/Doctor Phil junta -- and the empire would still collapse, beneath the weight of self-help platitudes and positive affirmations.

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths

of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans.

The US also deployed incendiary weapons, including white phosphorous. "Usually we keep the gloves on," Captain Erik Krivda said, but "for this operation, we took the gloves off". By the end of operations, the city lay in ruins. Falluja's compensation commissioner has reported that 36,000 of the city's 50,000 homes were destroyed, along with 60 schools and 65 mosques and shrines. \ \

So Remember: Bushite grunts told the world they wouldn't let anyone out of the city, because [enemy Sattler LIED] pro-bushite Zarqawi was there present, so the innocent families who believed they had nothing to fear from the liar disciples of the ungodly enemy of ALL HUMAN LIVES, remained in the tiny city to be indiscriminately 'protected' with more than nine two thousand pound bombs, or made dead instead by heinous pro-bush escaping war criminals who used white phosphorous on civilization. All to die our Humanity for the thieved loss of evidence to demand ourselves of some official freedom time to deal with our terrorized as suffering reality.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unexceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

Tatum, who freely confesses he's a proud child killer without
apology, is being made a free man in evil bushite amerika.
The TRAITOR prosecutor has ridiculously stated to our world -

/ / Lt. Col. Paul J. Ware wrote in a 29-page report that
there is insufficient evidence to show that Lance Cpl.
Stephen B. Tatum did anything other than follow Marine Corps
rules when he killed [for no reason, innocent] women and children \ \

TATUM ADMITS he enjoyed slaughtering the defenseless families
deliberately!! In fact, he wrote a card to a dead marine's
family, testifying that he murdered the innocent young girls
for the tyrannies of the antichrist. Evidence that TRAITOR
Paul Ware and Mattis hides from the Christian American Family.
Will YOU, as an American man, allow these two bush bitch nazi
punks to survive as furthering the commitment of more war
crimes against the INNOCENT? as a zionist neocon's "Hero"?
Will You defend our girls? Peoples of Earth! Help Me save our
children.. please.. please..please

TRAITOR Paul Ware "Tatum shot and killed people in houses 1
and 2, but the reason he did so was because of his training
and the circumstances he was placed in, not to exact revenge
and commit murder."

TATUM STATED DIRECTLY IT WAS TO EXACT REVENGE AND COMMIT MURDER!! HE WROTE SO TO THE FAMILY OF THE MARINE WHO DIED! A FAMILY WHO WOULD MOST CERTAINLY SUPPORT TATUM'S EXECUTION AS DEMONIC TRAITOR TO FREEDOM IN AMERICA!! ASK THEM!!

See?, Tatum is a zionist, but not Jewish!!! While neocons suggest our reality impossible without corporate challenge for exploitation of our 'unrepresented' lives.

the [anyone's] CHILD KILLER Lt. Gen. James N. Mattis QUOTE: "It's fun to shoot some people" - defenseless innocent WOMEN HE SHOT!! INNOCENT CHILDREN HE SHOT!!!! YOUR CHILD!! FIGHT BACK FOR CHRIST! FIGHT BACK FOR our dying aMERICa!

Prosecutor Lt. Col. Paul Atterbury "Lance Corporal Tatum entered a home and participated in the killing of Iraqis who were not legitimate targets, then entered a second home and participated in the murder of [more innocent] women and children,"

/ / One of the Marines charged with murdering civilians in Haditha, Iraq, in 2005 knew that only women and children were huddled in a back bedroom in a house there, but he [TATUM] opened the door and shot them anyway, a squadmate testified Tuesday. \ \

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing

but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

CBC National News producers must be tried for treason, CBC reported that the Taliban banned girls from school, and women from work. LIES. I want the death sentence returned to Canada, to have executed Brian Stewart for his boastful true contempt for the lives of Canadian soldiers, who he LIES to, to have them die as assisting the escape of the zionist bushmob, by supporting fundamentalist dope pushing savages. Death to the documented liars of the zionist neocon, death to those who indiscriminately murder our species for a stolen nickel.

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one way communications system. He tells us what we think, and he'll never takes our calls, they won't read our emails, and they'll continue to pretend WE don't exist. AND... when WE die, they'll be richer for it. AND you'll be dead, your innocent brother will be dead, your innocent child will be dead. No evidence against an accused is US being truly abused. George Walker Bush is Guilty for 911, while every irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to
publicly speaking. There are criminals who don't like these
ideas, but they ain't going to speak out against us. Example
'I don't want to be held accountable to the American public,
cause I want to steal that 16 billion dollars for myself.
That's my public opinion.' What are we going to do but defend
ourselves of deathly lawless tyranny, eventually. Or, you
won't by DECIDING not to decide. Support our rise as the top
cop of Humanity, coming down for diplomatic talks to engage
the flagrant wanton stupidity of the bushite grunters. All on
hopes you'll consider also, these Kingly texts worth a couple
hedge funder salaries, a sixty cent barrel of oil marked up to
74 dollars, or a thousandth of the money America would save in
a year, if you adopted Canadian Health care systems overnight
for yourself to immediately provide all People the respect for
life we deserve. Or don't, and needlessly continue to pay
twice as much, while dying broke as self made losers without a
cause worth preserving. A free market open to waste for profit
what more could we ask for? Death to the bushite.

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty over a small fertile area
known as the Shebaa Farms, still occupied by Israel. Israel
argues that the territory is Syrian and will be returned in
future peace talks with Damascus, even though Syria backs
Lebanon's position. The UN's admission has been mostly
ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of
blind terror? Only bushite amerika would fall silent under
such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it
will discontinue its practice of "capturing" populated
Palestinian villages during military training exercises. The
IDF states it will "reexamine their policy" of conducting
such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for
defense in? Or, just again examples of standing terrorism
against life ourselves - committed by the censored as will
giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly
the very same terrorist acts they say we should all be
outraged against? Somalia is a case to point. They murder
helpless people as bushite, then say they'll remain dying to
thieve further as enemies to Humans being. It doesn't fool

me, but perhaps it does you. A neocon soldier murders innocent Iraqis, while selling you they are all there risking their lives to bring freedom. So, they die. For lies. Die. Again, KNOWN Aegis goons openly commit crimes against Iraq done officially to get killed! the supposed to be Patriot Marine. P2OG. Soldiers under bushite command would rather die cowardly, than to honorably demand the bushmob's arrest for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as starting by supporting our rise to highest acclaim with my authority free willed to anyone. Let's face it, we're great because Your great. However, for greed, corporate america aren't taking our concerns nightly. We want Justice, and WE will get it if we reflect together with impeccable credentials as standing with measured reason for proper assessment on rights making might. Who is who here, a freeing peoples I tell you, arriving to bring a true patriotism to Life for US. Are you with yourself as respected an equal under the law devised fairly for all concerned parties?.. well then... let's g o ! ! !

be Great!,

Where is the Evidence?

How so can all of Iranian Military Officers be "terrorists", while lawless bushite bomb defenseless innocent peoples indiscriminately routinely, with praises from the actual demon antichrist responsible personally for 911 I want to know. NOW. Kill a bushite THIEF for American Freedom why don't You victimized Peoples of Earth? A bushite kills bushite for stolen nickels. Examples: Aegis, Condi's land-mines, fixed elections, torturing. driving over children, blahblahblah..

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

bushite talk about random killing of godly persons
http://www.youtube.com/watch?v=OHvtIL_TRGE

"You can basically kill anyone you want"

/ / Just a "few bad apples"? I don't think so, this is much more widespread from what those soldiers were saying, and SANCTIONED. \ \

Look, a bushite would kill an American child too. When or will Americans become American? Death to the bushite, death to the enemies of Man. Again, national bushite broadcaster, George Norry stated he'd go ballistic against any American soldier who refused to murder for the neocon as traitors, and "America" STILL refuses to speak in their own defense for dying. Death to the bushite, death to the enemies of Freedom for America.

/ / "as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.] \ \

Look, listen to soldiers who sing about the joys of murdering innocent young girls, see their faces in the videos celebrating the murder of girls LOVED by GOD and ME, and question: Why won't you as an American assist Christ in the

glorious hunt. Nothing better in this world than to bill a
murderous bushite who claims it's lawless to this suffering
Universe, ruled criminally by the demon antichrist enemy of
ALL HUMAN LIVES. All religions want US to defend GOD - please
help me take on all challengers. We want a fight to death
with that dishonorable pro child killer bush bitch nazi
"Marine" in a cage match to earn world title of greatest
fighters. Pump it up, Johnny's coming Home to end the reign
of bushite tyranny by taking on demonic enemies of Our

I'm a Good Man
"Al-Qaida" = "General Mahmoud Ahmad"

Why will you not as a member of Humanity, make the call
to the Coast to Coast radio network of demon evil nazi
savages who deny your legitimate concern be addressed freely?
Hate God and Love do you? Couldn't care less could you
for the giving lives of ignorant Americans as an American?
George Norry isn't as stupid as he wishes you believe him
to be, when he supports lawless carnage against the
innocent, to help escape those truly responsible for 911.

26,000 total Tickets sold - 14,302 votes tabulated
http://disc.server.com/discussion.cgi?id=149495;article=112801;show_parent=1

/ / Now think about that for a minute. 26,000 people purchase tickets
to go to a Straw Poll event, and yet we are to believe that 12,000 of
those people couldnt even care less about the voting part? Just what
were they there for? I don't buy it. This is not believable. An
Investigation is needed here. \ \ ALL PAID CASH to "vote" also..

I said that years ago, but the bushmob isn't listening, because,
hey, happy George Norry don't care, and CBC, CNN, and FOXNEWS
isn't taking our calls either man.

American soldier: Your enemy is TRULY LIAR happy George Norry.
The demon knows of Ahmad, and forbids any guest from uttering
such understandings in defense of the DYING dumfuk grunt nazi -
Good riddance? Do you care that your country men are dying
for the criminal zionist neocon as traitors? Support my demand
for US to be heard GOD DAMN YOU. ...or die.

Pro-mass murderer war criminal Kristol once again, speaking freely to Jon Stewart unchallenged internationally on Our TVs as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he speaks no words in defense of the innocent robbed and murdered in his "Jewish" name. A Zionist! He wants to sound our public voice silent where a Hitler or Kristol marches innocent others into gas chambers by calling ourselves terrorists without a thread of evidence to thieve from as unworthy. Few know, Hitler was a staunch Zionist too. The excuse would be, but G-D is worse.. because, as the "Two [atheist] Jews", they can commit no sin against Christ by trumpeting demon evil lies as if, we have no stronger indivisible arguments present in OUR defense ever for Just causes. AND, he's near the best our American national TV media has to offer!

Did you see Jon Stewart whore himself to Albright TOO!, the physco nazi witch who holds no regret in the murder of more than 500,000 CHILDREN? I believe, Jon Stewart suffers from the ignorance of Celebrity more so, than a genuine hatred for Humanity.. as that is the fault of most TVed Americans. Nothing more greater than getting on the boob tube, to really make your mark on this fleeting world as they sell their life away for nothing but the privilege to be recognized at a gala swarray.. fed on the victimized innocent of Humanity left robbed as worthless their grand stage. His show is often quite bright however, and leastly, reminds people, that CNN, CBC, and FOXNEWS isn't the be all and end all of respect for US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with were when the young caller "Sanable" was supposed to have said "we will annihilate the Jews" were not even mentioned by the caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.
And, kinda scary Being all godly and such..

Demon evil enemy neocon George Norry is a naked traitor to History:

"..Show me proof that there are real demons"

You, George Norry are a demon because you purposefully
broadcast to my America the need for neoconned soldiers to die
for the lawless demon antichrist, knowing full well, you work
'happy' to escape the 911 perpetrators of American
Wrath, like General Ahmad, with your truly evil demonism about
Life, and betrayal to freedom for US humans.. George Norry is
'the evil spirits' he says you can never find. Evidence.

What?

There is no found honor in a thiefs paradise of neocon plunder
my friends, no honor.

Have you seen the documented murders of INNOCENT MEN trying to
defend their community from lawless nazi dope pushing
fundamentalist savages?, just recently released by those who
fly in the antichrist's apaches? If you see these things that
are in the demonic neoconned dishonorable "Air Force" at your
dinner table, talking like human to enemy George Norry, or
just walking down our streets like Aegis tries, kill them
justly for Yourself, Freedom, GOD, and me, please, Thankx.
George Norry, and company claim to have justification in
murdering helpless 'suspects', I say, they don't. Death to

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy. These people don't want democracy, they want slave governments. If it's a slave dictatorship - that's fine. If it's a slave elected government - that's also fine. The only thing that matters is that the government is a slave government. That is why they will never invade Egypt. They will never invade Saudi Arabia. They only invade countries, or threaten to invade countries, who stand against them and who refuse to be slaves to them. That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

Perl of wisdum 'yeah so? 911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" = "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911 financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without

challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run for cover!! embarrass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Divine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high

treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

THIS IS TREASON. But, look, teen soldiers are commanded to be bushite nazi savages, who cowardly refuse to defend America from Mr. al-Qaida, General Ahmad, all to thieve further from the undefended American public.

The Arts - an Inside Job

Look, CNN, CBC, and FOXNEWS is lying to US. They know the EVIL bushmob did 911, and have decided to kill your kids for more rewards, instead of defending the innocent. They hold the true value of YOUR LIFE in contempt. Demand justice to defend our freedoms why don't You?

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of insurgents apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to

enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

Right. The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of all Human Life. Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made

ignorantly entranced TV audience that is repeatedly reminded,
we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently,

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.

They are guilty, so, of course, the demon Bush enemy,
OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still
feeding us neocon lies. Why don't you make the call for

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice

as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American

Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in

America should take open line calls on our ideas about how to
actually plan to defeat these, found factually to be, traitors

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite

thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

Lt. Denton to the completely innocent as god loving
'You die, you die, you die'

Lt. Denton must die. We apparently have him on video blowing up People not guilty of anything. He shall die as the dope pushing cop killer he is, and we'll use his brief existence as a beneficial measurement to determine, which other demonic bushite soldiers, who as bonafide 'evil doers', disagree with such Just action - be put to death for our Freedoms also. Simple for everyone to understand? We think so, so says the

Son of Man.

Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price
that British trained policemen had tortured prisoners to death
with drills, we discovered, through the New York Times (!!),
that American intelligence officers had been working alongside
them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the
ungodly enemies of Man who torture innocent people to death
for fun - expecting Johnny's America will not raise a word in
defense for the Human race, or our guns to defend our loyal
brothers to the cause of Justice. Death to the bushite, death
to God's enemies who lie cheat and steal from Humanity to
assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal
agreement so that we never again face these baseless
allegations," he said. Thirty Afghan detainees have claimed
they were beaten, whipped, given electric shocks and denied
food once they were transferred to Afghan security forces by
the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope
pushing cop killers, who murder innocent people they call
'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN
MILLION landmines on our cities to kill our children for
decades indiscriminately, while offering our Humanity to God no
apologies. Proudly kill the bushite savages all to
desperately survive ourselves creating a better world through
fair, free market communications. To warring for Liberty as
true Freedom wills, is for Justice understood as measured, not
just made up out of nowhere for the pleasures of those truly
Satanic. So spoke the King of being the wisdom we here

revealed by statement of timeless fact. Good will triumph
over evil. That's that.

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around
them, they couldn't care less." Instead they kill unarmed
innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide
distribution and production of heroin, tells of murdering
innocent farmers, that would never raise a gun in anger, are
those they openly confess to target for first degree murder as
labeled the, second tier Taliban. That's when not defending
American Pension thiever ENRON'S pipeline managed under their
extremist Muslim fundamentalist regime of intolerance for
public communications, as the continuing thieving of 80
percent the Humanitarian Aid given by Canada to feed the
STARVING, and school our children of the impoverished
Afghanistan, as so reported. Eighty percent. 80. 80 percent
stolen. I'm telling YOU: CBC couldn't care less about what
Canadian soldiers are actually dying as COWARDS for:
"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly
partners in crime" CBC national radio management needs to be
arrested in Canada for high TREASON. Please, be a Patriot,
and demand these zionists allow open communication with the
facts to save the lives of Canadians soldiers they hold in
contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of
[Innocent People] Sunni prisoners at one of the new
American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise,
joyously, with pride, destroy the neocon traitors of Justice -
for the true Love you have as Freedom willed - is as granted.
Don't buy their demon lies by blind blanket false assertions,
against YOUR Humanity's Innocence in tyrannical bondage, all
done in to fool you believing, we have no rights to be heard
in our presence - here existing freely. Therefore, to survive
US all for something better, halt the 'escaping' murderous
bushite thieves for God and America. SOLDIERS: Instead of
dying for nothing, my wannabe Patriot Brothers, try joining
Liberty's cause, which is our cause truly. Is it because
corporate TV zionist money whores, are cowardly and ignorant,
as evil hypno muggers, in MY dying for real America, that YOU
refuse to speak Now in your Humanity's begging further
defense?, on evidence being the only requirement to establish
a person's guilt or innocence? for ungodly terrorist
activities committed in our name by bushite bombers from the
neo-conned AIR FORCE, who, as rotted juveniles, cheeringly
bomb us People indiscriminately leaving a Church as something
TRULY SATANIC? To dare, in our presence, continue threatening
harm against an innocent child of wonder, not yet even born to
God's suffering world? Bushites war LIFE itself. So then
pleads I again the Son to God, as Man to Men: war to kill the
enemy bushite nazi savage thieves, for real Freedom is waged
truly by Just causes. The mute, pro-censorship/tyranny
THIEVING bushite savaged nation, has NO EXCUSE for the crimes
they have committed in our dying names. I demand our voices
heard internationally for Justice as Freedom is Godly.

are generally, extremely cowardly as Bush's freely giving
PAYERS, led for more ungodly sacrifices in fascistic silence,
but this continuing charade of incompetence gathering against
our entire Humanity, is going way beyond acceptable to
everyone concerning. Johnny Wizard conceivers and otherwise
non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS,
while George W. Bush personally stole 50 billion from America
in the first four months of stealing the initial election.

began to fly, the blood sprayed from between her eyes, and
then I laughed maniacally." [, then were heard the cheers of
godless bushite dumfuk traitors obscening to God and Man as
the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to
raise some concern. THEY don't. They refuse to hunt bushite
down in their streets for death to defend the innocent held
indefinitely against GOD'S will. Death to the bushite, death
to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

"Al-Qaida" = "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America. George Norry WILL kill Your American child for the contempt he truly holds for our lives here. He says he only supports murdering Arab children for the neocon, but when your not looking in his 'shadows', he'll kill your child too, don't doubt it for a second.

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where

Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their

comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering
answers to any question on the science of God as is pertains
to Justice measured, but this is just who I am to be conscious
man. So, if we can get over the shock of me being so
especially normal, maybe we can then realize, I have some
simple good old ideas that transcend through time by rational
understanding communicable between any two people. I am not a
"miracle worker" to all those I advise to not eat Aspartame
because it's a poison that also makes your body crave
un-needed carbs, that will likely convert to more unless fat.
So, it slowly kills you, while making you fatter than you need
be along the dead end journey faithing in "the system". So,
why do some do it religiously? Who cares (for now) but to
say, our governments are failing US miserably. I spoke
personally with one of the head scientists in Canada at
"Health Food and Safety", and he told me the scientific
analysis done by reputable scientists I found freely available
repeatedly on the internet years ago, was completely true.
(It breaks down to formaldehyde, and methanol (a slow lethal
poison), among other shockers. Poison. P-o-i-s-o-n-s in our

food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE
Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while

entertaining. Weekend TV in North America totally sucks.
Now, why do YOU think that is brother? The more powerless
they make US, the more money the neocon zionists can murder
Humanity for, thinking they might just get away from this if
we continue to take no action in defense of anyone as God
would will. Let me be Your servant King, by backing me up some

been completely overhauled. Where are the many who served there NOW
eh?]

Look: America has kidnapped countless thousands without evidence to
be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide
OPENLY in America's uniform. [let US hunt them down for GOD, despite
what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for
Bush are officially deemed lawlessly unaccountable to

This is more true than a bushite would admit before murdering
a honorable father to rape his young child, like Lcpl
Boudreaux freely confesses. Boudreaux will tell you, openly,
you have to murder the Arab father of the Arab child your
planning to rape, because if you don't, that Father will spend
the rest of this life, hunting you down in the streets to rip
you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that
Father's intent to bare on lancing Boudreaux, and any other
who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for

WTC TOWERS? "WERE"?

Civilization's ancient Founder Hammurabi,
suggested just to openly publicly have executed those who lay capital allegations without any evidence, while working to close outstanding criminal investigations. A made CRIME within ourselves Hammurabi claimed, and by thinking such ways, brought birth of 'Civilized' to an untamed till then, chaotic confusion. The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable, without zionist controlled, corporate news permission. See? The military counts mankind as zionist, but I am a man of real men, committed to defend our world from all enemies, foreign, or domestic. Unlike a bushite traitor to God and America, who's word, as Oath, means as much to them, as we do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. -

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by

tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

-

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill it proudly for freedom, as an undying love for a real God and Humanity.

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire
transfer about $100,000 to hijacker Atta. Ahmad later resigns
after the transfer is disclosed in India and confirmed by the
FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he
had received anonymously, top secret presidential war strategy
documents dated September 9th, 2001, originating from
Condolezza's office, outlining a strategy to invade
Afghanistan premised on blaming bin Laden a terrorist, but
providing no evidence

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't

find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans.

The US also deployed incendiary weapons, including white phosphorous. "Usually we keep the gloves on," Captain Erik Krivda said, but "for this operation, we took the gloves off". By the end of operations, the city lay in ruins. Falluja's compensation commissioner has reported that 36,000 of the city's 50,000 homes were destroyed, along with 60 schools and 65 mosques and shrines. \ \

So Remember: Bushite grunts told the world they wouldn't let anyone out of the city, because [enemy Sattler LIED] pro-bushite Zarqawi was there present, so the innocent families who believed they had nothing to fear from the liar disciples of the ungodly enemy of ALL HUMAN LIVES, remained in the tiny city to be indiscriminately 'protected' with more than nine two thousand pound bombs, or made dead instead by heinous pro-bush escaping war criminals who used white phosphorous on civilization. All to die our Humanity for the thieved loss of evidence to demand ourselves of some official freedom time to deal with our terrorized as suffering reality.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unexceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

What Freedom do bushite war the innocent for to rape, pillage,
and murder as blind neocon followers of the 'lawless' demon
antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to
the dying American Marine, that the ungodly bushite wars to
escape the 911 perpetrators hold some hidden benefit, as the
TREASONOUS neocon thieves freely rob from both undefended
American and Iraqi citizens, The neoconner, Mr. Bush closed
criminal investigations on 911 immediately after the event
occurring, while Billions are stolen through 'ear marks' and
TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and
terrorists like Aegis who dress up as al-Qaida to murder godly
lovers of Justice. CNN, CBC, and FOXNEWS would rather kill
the Marine, than teach them where to aim their weaponry of
liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

CBC National News producers must be tried for treason, CBC reported that the Taliban banned girls from school, and women from work. LIES. I want the death sentence returned to Canada, to have executed Brian Stewart for his boastful true contempt for the lives of Canadian soldiers, who he LIES to, to have them die as assisting the escape of the zionist bushmob, by supporting fundamentalist dope pushing savages. Death to the documented liars of the zionist neocon, death to those who indiscriminately murder our species for a stolen nickel.

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one way communications system. He tells us what we think, and

he'll never takes our calls, they won't read our emails, and they'll continue to pretend WE don't exist. AND... when WE die, they'll be richer for it. AND you'll be dead, your innocent brother will be dead, your innocent child will be dead. No evidence against an accused is US being truly abused. George Walker Bush is Guilty for 911, while every irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in a year, if you adopted Canadian Health care systems overnight for yourself to immediately provide all People the respect for life we deserve. Or don't, and needlessly continue to pay twice as much, while dying broke as self made losers without a cause worth preserving. A free market open to waste for profit what more could we ask for? Death to the bushite.

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty over a small fertile area
known as the Shebaa Farms, still occupied by Israel. Israel
argues that the territory is Syrian and will be returned in
future peace talks with Damascus, even though Syria backs
Lebanon's position. The UN's admission has been mostly
ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of
blind terror? Only bushite amerika would fall silent under
such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it
will discontinue its practice of "capturing" populated
Palestinian villages during military training exercises. The
IDF states it will "reexamine their policy" of conducting
such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for defense in? Or, just again examples of standing terrorism against life ourselves - committed by the censored as will giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly the very same terrorist acts they say we should all be outraged against? Somalia is a case to point. They murder helpless people as bushite, then say they'll remain dying to thieve further as enemies to Humans being. It doesn't fool me, but perhaps it does you. A neocon soldier murders innocent Iraqis, while selling you they are all there risking their lives to bring freedom. So, they die. For lies. Die. Again, KNOWN Aegis goons openly commit crimes against Iraq done officially to get killed! the supposed to be Patriot Marine. P2OG. Soldiers under bushite command would rather die cowardly, than to honorably demand the bushmob's arrest for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as starting by supporting our rise to highest acclaim with my authority free willed to anyone. Let's face it, we're great because Your great. However, for greed, corporate america aren't taking our concerns nightly. We want Justice, and WE will get it if we reflect together with impeccable credentials as standing with measured reason for proper assessment on rights making might. Who is who here, a freeing peoples I tell you, arriving to bring a true patriotism to Life for US. Are you with yourself as respected an equal under the law devised fairly for all concerned parties?.. well then... let's g o ! ! !

be Great!,

Pro-mass murderer war criminal Kristol once again, speaking freely to Jon Stewart unchallenged internationally on Our TVs as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he speaks no words in defense of the innocent robbed and murdered in his "Jewish" name. A Zionist! He wants to sound our public voice silent where a Hitler or Kristol marches innocent others into gas chambers by calling ourselves terrorists without a thread of evidence to thieve from as unworthy. Few know, Hitler was a staunch Zionist too. The excuse would be, but G-D is worse.. because, as the "Two [atheist] Jews", they can commit no sin against Christ by trumpeting demon evil lies as if, we have no stronger indivisible arguments present in OUR defense ever for Just causes. AND, he's near the best our American national TV media has to offer!

Did you see Jon Stewart whore himself to Albright TOO!, the physco nazi witch who holds no regret in the murder of more than 500,000 CHILDREN? I believe, Jon Stewart suffers from the ignorance of Celebrity more so, than a genuine hatred for Humanity.. as that is the fault of most TVed Americans. Nothing more greater than getting on the boob tube, to really make your mark on this fleeting world as they sell their life away for nothing but the privilege to be recognized at a gala swarray.. fed on the victimized innocent of Humanity left robbed as worthless their grand stage. His show is often quite bright however, and leastly, reminds people, that CNN, CBC, and FOXNEWS isn't the be all and end all of respect for US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN
on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with
were when the young caller "Sanable" was supposed to have said
"we will annihilate the Jews" were not even mentioned by the
caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.
And, kinda scary Being all godly and such..

I am,

Demon evil enemy neocon George Norry is a naked traitor to History:

"..Show me proof that there are real demons"

You, George Norry are a demon because you purposefully

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy. These people don't want democracy, they want slave governments. If it's a slave dictatorship - that's fine. If it's a slave elected government - that's also fine. The only thing that matters is that the government is a slave government. That is why they will never invade Egypt. They will never invade Saudi Arabia. They only invade countries, or threaten to invade countries, who stand against them and who refuse to be slaves to them. That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" = "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911 financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty

to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the

human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run for cover!! embarrass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are

leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Divine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil.

Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

Murdering bushite gang rapists try escaping true accountability

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then

executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? [...] It is not too late, however, to begin such an investigation. There is no statute of limitations on mass murder. \ \

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is
this not a treasonous act - for Bush to close criminal
investigations, immediately after the terrorist crimes
of 911? Shouldn't the demon enemy be put to arrest
for that godless act alone in this forsaken dying world?
A world left instead suffering further the tyrannies
of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to
lie to the Public for cheating and stealing by murder of
US as proxied, innocent peoples purposefully enslaved by a made
ignorantly entranced TV audience that is repeatedly reminded,
we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently,
but just lie and tell US they do. Look to see, almost all
political internet traffic condemns Bush straight to hell
well he rightly belongs, but the polls still say no - WE,
seeking for Just cause, are the minority.. just roll over
and die for the neocon betrayers to god and country, life
and loving.

for the neocon TRAITORS, as the same 'escaping' enemies
today, responsible for 'secretly' ordering these
indiscriminate terror attack bombings against YOUR

NOTE: Americans are literally paying billions for Chertoff's
THREAT of "gut feeling". Billions, while the neocon walk
away from MURDERING Americans on 911 with the bushite on
America's Coast to Coast radio network, claiming they don't
know you know, nor, ever will. They'll tell you, blame the
shadows in the New World Order, but don't rely on evidence
to form your conclusions on who PERSONALLY is responsible
for criminal actions against YOUR rights to be free as
alive. Evil is real my friend, evil is real. Death to the
bushite, death to the enemy LIARS of human kind. Death to
the enemies of Love and God. Death to the enemies of Life.

"A dead Iraqi is just another dead Iraqi... You know, so what?"

These demons are murdering god loving people as enemies to
Humanity with the nazi assistance of corporate news america.
Will YOU please, support my rise to speak publicly challenging

anyone who disagrees with me, GEORGE WALKER BUSH needs to
be arrested immediately for 911. Peter Power needs to be
arrested for the London bombings. Sattler, Blount, and Russell
need to be arrested, tried and put to death for WAR CRIMES
against Iraq, along with those responsible for other
indiscriminate targetings against innocent PEOPLES for
the zionist neocon god betrayers hidden in shadows as
the un-known "Joint Chiefs of Staff" demon enemies.

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to testify to Congress because Congress, in fact, doesn't have oversight abilities."

IT LOOKS like they are going to attempt making the move of BLATANTLY TREASONOUS war criminals acting to measurably now destroy yOur Freedoms in godless America. The Satanic neocon's 'faith', is in that YOU as an American, will watch the same corporate drivel that offers next to nothing to empower YOURSELF to speak Justly for a dying America. Instead of demanding 24 hour, wall to wall news coverage, of war criminals going down one by one by the will of Man to Justice, CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that you are only a impartial viewer, who doesn't really care about dying right in front of yourself for the zionist's riches, and great worldly power of tyranny through lawless nazi bushite censorship.

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or

die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

Die bushite die!

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO

isn't the name of the specific guy who financed 911 to murder
America.) So, as a consequence, he gets near ridiculous with
labels applicable to generalizations only dummies could
believe blindly. With Kucinich campaigning on ACCOUNTABILITY,
Alex Jones looks quite foolish. But, he's still trying.
Thank god for that. Thank god for that. Talk radio in
America should take open line calls on our ideas about how to
actually plan to defeat these, found factually to be, traitors
to God and Country.

MSNBC Poll: Over 400,000 (88%) Say Bush Should Be Impeached

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain
anti-torture bill to codify a policy of torture that is now
embedded in our legal system for perpetuity. \ \

WE'D be hunting down those bushite liars who
torture innocent people to death for their satanic pleasures.
For, you know it does warrant the Death Sentence in America,

right? (You can thank Reagan for that...)

/ / In a move that hardly indicates that he was a terrorist
plotting to attack a US government installation Tatar then
went to the Philadelphia police department to complain that he
was being pressured by someone into getting a map of Fort Dix
and that he thought this had something to do with a terrorist
plot. \ \

Didn't see this on our TV news either did You?

-

/ / On CBS' "Face the Nation," she claimed that intelligence errors before the war were "worldwide" even though the International Atomic Energy Agency's Mohamed ElBaradei publicly stated there was "no evidence" of an Iraqi nuclear program \ \

That from the 911 witch, who forbade a stop to hostilities IN AMERICA'S NAME against the innocent in Lebanon. Nazi Israel ADMITS to the targeting MURDER of any innocent persons who drive in a truck. Perhaps Americans. Who cares? Not CBC or CNN they'll tell you consistently absent from the crimes scene.

Pill popping American GI teens are becoming.. CRACKHEADS!

http://www.zmag.org/ZMag/articles/march02levine.htm

/ / Dexedrine affect the same neurotransmitters as cocaine; \ \

American grunts get FREE all the Dexedrine they can shoot

Do you know how a crackhead finds itself? Lost by indifference to the ultimate, only goal, more dope. Freedom Fighter? or crackhead WHORE, who hopes to find a dollar 'somewhere' to stave off it's crackmaster, the "American People", led by the un-elected demon dictator, our criminal Mr. bush Jr., as the true enemies of all Mankind. Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price that British trained policemen had tortured prisoners to death with drills, we discovered, through the New York Times (!!), that American intelligence officers had been working alongside them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the ungodly enemies of Man who torture innocent people to death for fun - expecting Johnny's America will not raise a word in defense for the Human race, or our guns to defend our loyal brothers to the cause of Justice. Death to the bushite, death to God's enemies who lie cheat and steal from Humanity to assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as

true Freedom wills, is for Justice understood as measured, not

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide

/ / [...] the [New York Times] piece details the torture of
[Innocent People] Sunni prisoners at one of the new
American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise,
joyously, with pride, destroy the neocon traitors of Justice -
for the true Love you have as Freedom willed - is as granted.
Don't buy their demon lies by blind blanket false assertions,
against YOUR Humanity's Innocence in tyrannical bondage, all
done in to fool you believing, we have no rights to be heard
in our presence - here existing freely. Therefore, to survive
US all for something better, halt the 'escaping' murderous
bushite thieves for God and America. SOLDIERS: Instead of
dying for nothing, my wannabe Patriot Brothers, try joining
Liberty's cause, which is our cause truly. Is it because
corporate TV zionist money whores, are cowardly and ignorant,
as evil hypno muggers, in MY dying for real America, that YOU
refuse to speak Now in your Humanity's begging further
defense?, on evidence being the only requirement to establish
a person's guilt or innocence? for ungodly terrorist
activities committed in our name by bushite bombers from the
neo-conned AIR FORCE, who, as rotted juveniles, cheeringly
bomb us People indiscriminately leaving a Church as something
TRULY SATANIC? To dare, in our presence, continue threatening
harm against an innocent child of wonder, not yet even born to
God's suffering world? Bushites war LIFE itself. So then
pleads I again the Son to God, as Man to Men: war to kill the
enemy bushite nazi savage thieves, for real Freedom is waged
truly by Just causes. The mute, pro-censorship/tyranny
THIEVING bushite savaged nation, has NO EXCUSE for the crimes
they have committed in our dying names. I demand our voices
heard internationally for Justice as Freedom is Godly.

Loyal bushie McCain as bona-fide nazi savage "Bomb bomb bomb Iran.."

Reporter 'Mr. McCain, you demon liar nazi fu-ker, don't you think your being insensitive to innocent god loving Iranians?'

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what? The Iranians? My response is lighten up and get a life."

Johnny America Lyrics: "Can't an American PROUDLY kill TRAITOR pro-torture Zionist McCain for the Love of living Life Justly, as Freedom was Country?"

Investigating the Investigation

PRO-TORTURE Gonzales "I quite frankly don't like the idea of the Judiciary deciding who is on my staff." [at Justice]

PRO-TORTURE Gonzales "I did not make decisions about who should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / "I grabbed her
little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and

then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses

to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in

totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. "If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering
answers to any question on the science of God as is pertains
to Justice measured, but this is just who I am to be conscious
man. So, if we can get over the shock of me being so
especially normal, maybe we can then realize, I have some
simple good old ideas that transcend through time by rational
understanding communicable between any two people. I am not a
"miracle worker" to all those I advise to not eat Aspartame
because it's a poison that also makes your body crave
un-needed carbs, that will likely convert to more unless fat.
So, it slowly kills you, while making you fatter than you need
be along the dead end journey faithing in "the system". So,
why do some do it religiously? Who cares (for now) but to

say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE
Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played

no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that
Father's intent to bare on lancing Boudreaux, and any other
who would sing in it's ungodly defense.

Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. -

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who

attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

-

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Great words from the lawyer of the thieving bushite child killers of Haditha

/ / "There were Harriers dropping 500lb bombs on buildings. If they're dropping 500lb bombs without knocking on the door first, how can you argue the troops on the ground did anything wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Bill Sattler.

/ / to think that these could have been just dumb ideas or incompetence. \ \

Bushite TRAITORS got rid of the ORHA plan.

-

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill it proudly for freedom, as an undying love for a real God and Humanity.

-

/ / she told The Nation. "If I contribute to the Army's prosecution of Lieutenant Watada on speech-related charges, I will have colluded in suppression of speech. What could be more hostile to the ideas of a free press than that?" \ \

Again, a Patriot Soldier whos only crime is that he refuses to commit a crime in Your name. Do something about it.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

/ / Four US oil companies, namely Conoco, Chevron, Amoco and Philips have concessions in nearly two thirds of Somalia. This quartet of oil conglomerates was granted these contracts in the final days of Somalia's deposed dictator, Siad Barre. The US first military engagement in Somalia was fully supported by Conoco. \ \

In the new world, these soulless bomber bushite of the air force, responsible for blatant first degree acts of murder against the innocent, would be hunted down by Humans, tried, then executed gloriously in the defense of our living justly.

-

/ / Al-Maliki has promised he will no longer block action against the Mahdi Army militia \ \

So, is the block head saying American soldiers so far have died for lawless tyranny? Kill a bushite, to protect the lives of us as innocent victims in other words, right?

-

How Bush misled the world

http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON.
Could it be any higher? Deliberately caught misleading
whore-dumb Congress to wage his immoral neocon 'escape' with a
unjustified criminal brutality against God as all of our
Humanity. A great deal more than a million innocent people
have been victims to the 'targeted' Zionist killings of the
irrational bushite enemy. Lawless enemies to Creation,
spreading their toxic waste who thieve, rape and murder
without reprimand from corporate news america, shall, I pray
daily, die justly in vengeances by the will of a real undying
Love for our victimized innocent family. Justice for Humanity.

Please, help US.

Let US demand open radio
communications on the mathimatical facts to save our own
selves further victimhood to their personal contempt for the
true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

That's great David. Now again what does mV/m mean to you? What does 64
dBu mean to you? Just what do these number represent?

If these number only are numbers on a map and if you can only convert
them with a calculator someone else made then they are nearly totally
meaningless to you.

It does not matter if someone at the FCC understands what these numbers
and units represent as YOU are the one using them to make a point.

Work? Since when is a government bureaucrat work? There is no honor in making a career of making people's lives more difficult while stealing a large percentage of money they did in fact WORK to earn.

Good grief you are not only a hypocrite you are a complete fucking moron incapable of logical thought. DemoRATS are as bad as RepubliRATS.
The "two party" political system is a cleverly designed shell game designed to give simpletons like you the illusion that you actually have a choice in the election.

But that was a format decision, something the agency may have had control over. Demos are seldom changable at the agency level.

I've frequently, when selling or assisting on sales calls, gotten "no Spanish" dictates removed... these are usually in place because the agency has no Hispanic creative staff. And in years before being in LA, I have gotten "no talk" or "no salsa" dictates removed, sometimes by buying questions on market omnibus studies that have major credibility at the agency level. But I don't recall ever getting demos changed... nor can anyone here in LA at a cluster with 3 stations int he top 10 25-54.

3377. 1640KHz follow up

Today we had a chance to do some more RDF detection work.

The 1640KHz station that is rebroadcasting the Jackson KY NWS audio stream
appears to be located near the South Western Corner of the "Blue Grass Army Depot", located logically enough South of Richmond KY on US25.
<http://www.globalsecurity.org/military/facility/lexington.htm>

There are plans to convert part of the base to into a park to mark the historic
"Battle Of Richmond" during the war between the states.

I suspect that like the Camp Nelson National Cemetery just South of Nicolasville KY along US27, there is a plan to us a "low power radio" for self guided tours.

I have "" around low power because there is no way a 100mW signal can travel the 25 miles or so from the BGAD to me!

>From a distance of about 5 miles away, at 5 locations, the RDF bearing is a single
well defined point using a DX398's internal ferrite loop. As one approaches the
BGAD the signal becomes less directional raising the possibility that "leaky" or slotted coax is being used as the antenna. There is a overlook adjacent to the BGAD that is about 1 mile north of the suspected transmitter location. We pulled
off there and I was able to get a very broad null.

>From tests at the Winchester KY TIS on 1610KHz, I can be fairly confident that
the DX398 is not being overloaded. At the Winchester 1610KHz site it is possible to get very sharp nulls within a few hundred feet of the antenna.

I plan on contacting the LBAD public affairs and the Madison County deivision
of parks Monday to see if I can get any "official" word.

By way of comparison, Camp Nelson is running 100mW into 2000' of slotted
coax and the signal can not be detected beyond a quarter mile from the gates. There is an adjacent Jessamine County Park to commerate the war between the states Union Army Base as Camp Nelson. It is very difficult
to do more then pick up a carrier.

I suspect someone at either the BGAD or division of parks has no idea
how
to set their equipment up and are running way too much power. I asked
the
FCC Thursday and they have no pending applications for TIS anywhere in
KY.

That is because your points involve changing the demographic dictate of a client to an agency. If a client specifies Females 25-44, a station that is predominantly male 45+ is not going to get on the buy. And the client has very specific reasons for picking the target demos; they know more about the consumption than a station does.

Part of successful selling is knowing what you can fight, such as your good example of getting acceptance for country formats, and what you can not fight. Changing a demographic target is nearly impossible, although it may have been done a couple of times... and at smaller local agencies there is some chance if the station can show the agency that they will make money on the change. Otherwise, the agency is jeopardizing the client relationship with absolutely no gain.

I'm not a PD... although I have programmed on a few occasions. Most of my career was as manager (and owner) and GSM.

Were I to have worked at WFAB, which in the 60's was generally Miami's #1
radio station, I would have it in my resume. It would have been an honor.
The fact is, I have the visit down as an anecdote about my early experiences
in Spanish language radio.

It is becoming harder to discern whether you are delusional, senile or suffering from dementia. Study your posts in this thread, first you hallucinate that I am supporting the Democrats thereby missing the entire point (that you are a typical hypocritical asshole as most CONservatives are).

Then you hallucinate that the worst I say about you is blah blah blah...
Believe me there are many worse things I could say about you but why bother. This is becoming like arguing with a drunk - an exercise in futility so I now end this thread.

Now change your Depends, put your dentures in, your robe on, your slippers on and prop yourself in front of the TV and drool on yourself for the rest of the evening.

They have a great signal tonight. S9-S9+10 and very clear. I've read
that they broadcast with a mere half a kilowatt, but that seems almost
impossible to believe given how well their signal gets out.

The fun will stop soon thought when some big guns power up on 6155 and

That's only a limitation if you believe it. I'm not saying it's easy, David, but if a station can make an agency/client see a potential that was not exploited in one vein, then the station has that ability in other areas. It's only a matter of self limiting beliefs that keep one from making the pitch.

I'm also not saying that the station should change the client's target demographic, but rather that the station working through the agency, can show the client how to expand their market and include a richer element with more discretionary income.

How many 55 year olds own iPods? BMW's? Chevrolets? How many 55 year olds buy soap? Toothpaste? How many 55 year olds listen to music? I mean, it's more likely that a 55 year old can afford a home theatre system from McIntosh Labs than a 24 year old.

Don't tell me we don't watch movies.

The most important part of successful selling is not in knowing what you can and cannot fight, but how to present to bring a new pitch to a resistant target. One size doesn't fit all.

You want to capture new sales, you change your pitch to new targets.

And as the population ages, finding a way to serve 55+ is going
to be the key to survival. For media, and for retail.

Then you, more than anyone here, would know the resource
potential of a good sales force and how to make a sale 'outside the box.'

You also know that stations make pitches to agencies every
day. Station makes the pitch to the agency. The agency's job is to
present to the client. Expanding a market is never a relationship
jeopardizing thing.

What drives so many people nuts about corporate manglement, is
the mindset that things work according to immutable realities according
to statistics, and 'research.' As I've said, quoting statistics isn't
really useful to someone who's a real person trying to understand why
something cannot be tried. What comes from such conversations is a
question by a listener who is told that what they want cannot be done.
Within the limited view of statistics, it's true, it cannot. From the
wider view of possibilities it becomes apparent that something can't be
done because it will not be tried; because possibilities will not be
exploited.

Most Manglers, and owners, I've worked with, known or had
contact with hide behind walls of research, statistics and historical
experiences, the Third Circle, beyond which they can see, but refuse to
look. They quote figures as though they are immutable laws. Figures are
only a snapshot of what exists through the lens of a moment and a place
and a given set of circumstances. Change the time, the place, or the
circumstances, and the statistics may not apply.

Where you and I have always disagreed, and where so much of
the furor in these groups exists, is that you seem unwilling to
recognize that what exists now, isn't all there is. And what works now
isn't the only viability. You may be right, and there may be no
practical way to achieve what's been suggested here. But that you refuse
to acknowledge the possibility is what's so maddening. That you deflect
questions with statistics rather than provide real answers. And that you
refuse to look outside the Circle for possibilities. These are reasons
you're arguments have been less than effective at convincing those of us
here who use Radio, and who have made it a lifestyle to cut wormholes
through obstacles to listen to what we want, rather than what's given us.

We know, from our own experiences that there are
possibilities. You deny this. Or worse, don't even acknowledge that this
has been presented.

For someone in the business of bringing people to your radio stations, that would seem to be a self defeating strategy.

Like I said, try it without the numbers. Present a compelling argument in English and explain why.

I"m not talking about CHANGING a demographic target. I'm talking about exploiting a demographic that's being ignored, because i's not easy.

Start looking at and for possibilities. Take your head out of your statistics and your Third Circle 'experience' and start seeing that if one obstacle can be overcome by a station to an agency/client, others can also be overcome.

The reality is that 55+ listeners are a rich resource that isn't being exploited because they're expensive to pursue. So are diamonds. But the value of recovered diamonds offsets the cost of mining them. The value of 55+ listeners is greater than younger, lesser expensive demographics. More costly to pursue, but much greater value when harvested.

If you're not successful at selling them, as Pepsi found with Country Music listeners, change your pitch. Explore possibilities. Every General Mangler I've ever worked for has told me to never fall into the trap of 'that's the way it's always been done.' He/she has always told me to try new things. New ways.

Ironically, yourself included, none has been willing to heed this counsel.

Explore possibilities. Change the pitch. Pursue the richer deeper ores.

If you can sell a nation of radio listeners that institutional interference that robs them of their choices is a good thing, you certainly have the salesmanship to sell high end SUV's to a 55 year old.

The question is, will you remain unwilling to find a way?

I already gave you a definition of how field strength contours are employed and how the FCC uses them.

Keep in mind that the FCC's principal technical function is that of regulating interference. Field strength, calculated or measured, is the metric the FCC uses to determine if there is interference potential in an application for a new station or in a change application. We are not interested in the nature or physics of propagation... we are interested in HOW MUCH signal there is at specific points removed by specific distances from an antenna or antenna system.

Further, radio stations use coverage maps to show advertisers where the signal reaches. Such maps are labeled in mV/m for AM and dBu for FM; these are the standard measurement units for the radio broadcast industry.

In either case, the data for the FCC or the contours on a coverage map when based on the measured free space electromagnetic field using a standard or calibrated antenna to determine the field strength of a station. In many cases, the AM coverage areas are determined by calculations based on power, antenna efficiency and ground conductivity to determine contours of specific and desired intensity. In the FM service few stations ever do measurements or even have the equipment to do it... it's all calculated and the FCC does not require measured field strength readings, although stations may submit measured field strength readings to prove a specific application is viable.

An AM station, when first licensed or when making a significant change in facility, will do field strength readings on a number of points on a number of radials at specific distances from the transmitter. A directional AM will have more radials, as the monitor points must show actual measured field strength in the nulls, which are there to protect other stations from interference, must be measured to the sides and at the center of each null. The location of the directional monitor points are, in fact, part of the station license.

What does mV/m mean to YOU? What does 64 dBu mean to you? Just what do
these number represent?

If these number only are numbers on a map and if you can only convert
them with a calculator someone else made then they are nearly totally
meaningless to you.

It does not matter if someone at the FCC understands what these numbers
and units represent as YOU are the one using them to make a point.

If you do not know what these number represent then don't use them.
Don't use jargon you picked up from the FCC web site. Don't use the maps
that show radio station coverage.

> from making the pitch.

The limitation has several factors. First, save a rare all radio campaign, radio is 6% to 7% of all ad spending. It makes nearly no money for the agency, except in commissions. It's hard to buy. Agencies don't spend a lot of time on radio... and many shops do not buy radio at all, because they would rather not have the hassle.

So much do agencies dislike buying radio that many farm out the buying function to buying services. To sell to them, unless you talk rates, you are shown the door... they have only one criteria and that is to bring in the desired number of gross ratings points against the target demo at the lowest price possible, because they share the commission and get a percentage of any savings below the target CPP.

So to expect agencies to even listen to a request that requires client consent to implement is simply a waste of time.

Add to that the fact that radio stations, save a few in very large markets, don't sell directly to most agencies... we sell via representative firms who offer dozens and up to hundreds of stations in many, many markets. The buying funciton is one of price negotiation; a media buyer has no ability to change buy specs. And most stations due to expense and distance can not call on higer-ups at an agency because they are hundreds or thousands of miles away.

But the main point is that agencies will not go back to a client to change an approved media plan because they do not want to seem incompetent. And they sure will not do it when the client asked for one demo and some station in Des Moines or Detroit or Denver can't pull off the CPP goals without asking for a change in demo.
>
> I'm also not saying that the station should change the client's

Clients do millions, hundreds of millions, of dollars worth of research. This is how they come up with demos to give to the agency. P&G, using them

again as an example, creates products, researches them with consumers, develops packaging and the product name to appeal to a specific group that will not only buy the product but will buy with the least marketing cost.

Such research shows over and over that the older the consumer is, the more established brand preferences are. That means that to sell, the advertiser has to overcome more resistence, and that means more ads... and if they are going for a different demo, new creative (confusing) and a different strategy for dealer incentives, point of purchase, and the campaigns on TV, cable, Internet, outdoor, print and such. If the return on investment is low, they will not do it because they can't make money... and that is the reason why there are practically zero campaigns for 55+.

The point is not about income, etc. The point is that to create a change in brand preference costs too much and makes the sale undesirable.

> Don't tell me we don't watch movies.

Nearly all film ads are targeted to 15 to 34 year olds. That's because that group is the overwhelming box office customer. Similarly, 9% of consumers account for about 90% of beer consumption. The beer companies focus on the media that deliver the 9%. The rest they get by spillage or they don't even care about them because they can not make a profit on the sale based on mass media advertising.

> The most important part of successful selling is not in knowing
> what you can and cannot fight, but how to present to bring a new pitch to
> a resistant target. One size doesn't fit all.

Radio stations do not generally get to pitch the client. If we have contact, it is when working with the marketing department after the sale on a promotion or some kind of support merchandising. Most agency clients have no interest in talking to someone from a radio station.

> You want to capture new sales, you change your pitch to new
> targets.

There is no money in 55+. No single radio station, and no group can change a client's attitude if the client is going to say, "I can not get a decent ROI on that demo" or "my product was designed for 18-34 year olds and I hope we don't get Oldsmobiled."

> And as the population ages, finding a way to serve 55+ is going to
> be the key to survival. For media, and for retail.

Radio, as it exists today, is not going to be around by the time advertisers want 55+, if they ever do. They prefer to go after the Hispanic market and

other major new opportunities. For example, in my work we generally never even research listeners over 40, because the median age of Hispanics in the US is around 22 and there is not enough population to get ratings in the over-45 and over 50 age groups.

In recent years, the bulk of broad agency buys has moved from being 25-54 to 18-49. And revenues for Black and Hispanic stations have increased by annual double digits while general market has been low growth or no growth. This is because advertisers are focusing on getting brand preferences formed as early as possible, where the ROI is good and where future consumption can be enormous.

I also know what is a waste of time. In my last sales position, over 8 years we had 28% average annual sales increases when the market was only increasing in single digits. I knew where to focus my efforts, and did not tilt windmills. And it's not just age... you have to know what non-radio brands are appropriate for radio, and which need the "appetite appeal" of visuals or product demonstrations to sell. This is why you don't hear exercise equipment sold on the radio.
>
> You also know that stations make pitches to agencies every day.

No, radio stations present rates to agencies. They may present the station occasionally, like once or twice a year, to the media director or the media planners. If this is through a rep firm, even that seldom happens.

When radio buys come out, the budget and the creative have already been approved by the agency... and in most cases, the media plan by medium and by market has been approved, Stations are invited to submit rates to get a part of a pre-existing buy. They get a chance to make up for a high CPP by supplementing with value added, but demos and cost goals are engraved in stone.

This is really not about research. The agency uses audience data to determine ratings points deliverys, and tells you how much they will pay per

point. The station either delivers that cost or beats it, or does not get bought. And with so much radio advertising being placed by buying services, there is no opportunity to sell much of anything else on most agency calls for rates.

No radio station today has a sales plan for 2012. The business changes so fast, the competitive array changes so fast, that there is no way to forecast. But we do know there is no money for 55+ from agencies. So nobody is going to program for 55+ in the hopes clients of agencies change their marketing tactics.

The few instances of buys for 35-64 in the past few years were mostly for home equity loans, mortgages and such. That market is totally dead, as are the companies that were using some money in radio.

>That you deflect questions with statistics rather than provide real
>answers.

No, there are realities. Such as the buying service issue. Such as most stations using rep firms, not their own sellers for all but local agency sales. And the fact that agencies practically never change approved budgets and media allocations. Many have tried... a good example being Cox' WDUV in Tampa... #1 for over a decade, but 14th in sales because 90% of the audience is 65+. They have spent nearly 15 years trying, and Cox is a very good company, and they are billing about what a gospel AM daytimer does. They have nearly no agency business. Most of the accounts are Senior Specials at restaurants and such... at very low rates.

> We know, from our own experiences that there are possibilities.
> You deny this. Or worse, don't even acknowledge that this has been

I think I have given you a view of the buying reality. The fact is, staitons don't have access to the clients as a general rule and changing demos established by studies of consumer patterns, return on investment, etc., are de facto impossible because to try is to tell a client that they do not know what they are doing.
>
> For someone in the business of bringing people to your radio
> stations, that would seem to be a self defeating strategy.

Our business is to bring people in who will listen and then to sell the station to advertisers based on the size of that audience. But first, the advertiser has to like the composition of the audience. In my case, talking about 55+ is also a waste of time as there is an insignificant percentage of

potential listeners and zero advertiser interest.

But first, if you want to sell 55+, you have to cater to 55+. Nobody is going to sustain a station for years with low revenue to see if this can be done. Cox has tried, and they got the station so cheap that it makes no sense to change, but 15 years of effort have gotten no results for them... and for many other stations that have aged out of the buy demos.

Nope. It's less. Because all studies show that it takes more impressions to create a sale than among younger demos.

I can't try. There are so few 55+ Hispanics compared to the 18-34 and 18-49 group that there is no way to get even a significant audience. And there is absolutely no buyer interest in the demo.

You also don't seem to recall where you've worked in the past, or what
your job title is. Interesting.

You disprove yourself everytime you give conflicting reports about
your job or past work experience. Someone who can't keep his story
straight should avoid spinning yarns.

Here in central Kentucky, say Lexington, there is a very weak 1KHz het
underneath
a French speaking female and some Spanish Music on 530KHz.

Antenna, Lankford "15' Relay Tuned Vertical", a Kiwa Low Pass (MW
reject) filter
and an R2000 with a 1.8KHz InRad crystal filter in the SSB chain.

I recall perfectly well... and the information has been on my website for more than a decade. As to the job title, I know what it is, too... an industry association got it wrong in a convention program, and dxAss want's to make this appear as some kind of major discovery; I did a panel along with the heads of programming of Clear Channel, Entercom, Radio One and Cumulus for about 3,000 attendees, all of whom knew who I was. It's a matter of public record.

You really need to stop parroting the posts of dxAss,, especially on weekends and the days before and after, when it is apparent that he is in his cups.

You are merely nothing more than a sad little pathological SOB who will lie at the drop of a sombrero.

Prove your previous statements and send all the documents to:

Typical lying asshole who can't prove a damn thing.

Mr. David Frackelton Gleason, you are a lying SOB!

Prove it otherwise.

You can't.

David Gleason's post was brought to you by Tardosilver. Tardosilver is
a true colloidal silver consisting of pure, sterilized water and pure
silver particles. If you are not sure that David's products will work
for you, try a single bottle risk free for 30 days. If you are not
pleased for any reason, you may return the bottle for a full refund of
the purchase price, minus the cost of shipping. This offer is to allow
you to try a product to be certain it will work for you. Please try a
single bottle to be sure the product performs to your satisfaction
before placing quantity orders.

A Google categorisation for filtering Google groups and Usenet
newsgroups for searchers' convenience does not a rule make. Otherwise,
the Google Categories would dictate:
Arts and Entertainment >Radio ---- we can only talk about arts and
entertainment on radio
Usenet : rec.radio ---- let's not use Google, it's Usenet so use the
corresponding technology
Language : English ---- the RHF rule
Activity : High ---- your guess is as good as mine

That just shows how silly it is to say that all postings must be in
English because Google says so. All Google is doing is to categorise
groups by language predominantly used so that you can selectively
search within a language set.

The Google 'About rec.radio.shortwave' has some interesting and
depressing stats:

1. The five busiest years (total number of messages posted) in
descending order:
2004 63771
2005 60627
2002 54664
2001 46774
2006 46008

2. 2007 has tapered off markedly - projecting maybe 33000 messages.

3. The all time highest poster is Cuhulin with over 18000 messages.

4. RHF is overtaking Cuhulin based on postings over the first 7 days
of this month: 134 for RHF vs 97 for Cuhulin. That's approx 20/day
from RHF and 14/day from Cuhulin. At this rate he will catch up in 6
years and they will have posted around 48000 messages apiece! That's

really depressing!

Astonishingly, I cannot find the charter for rec.radio.shortwave
on the web or in google groups archives; I direct your attention
instead to this FAQ entry:

[Last modified: June 30, 1995]

By Ralph Brandi, ralph@mtunp.att.com

Welcome to the rec.radio.shortwave newsgroup. This group was created late in
1989 after a suggestion by Richard Shapiro, in order for those of us who are
interested in the hobby of monitoring radio communications to have a friendly
place to exchange messages, tips, and opinions. If you are interested in this
sort of hobby, then we think that you will be at home here.

This is a set of monthly postings put together to answer some of the more commonly asked basic questions about the hobby. There is a posting explaining some of the basics of shortwave (HF) radio, and one covering medium wave (also known as AM) and FM DXing. There is also one covering scanning the higher frequencies (VHF and up) that appears in the newsgroup rec.radio.scanner. If you find that you have other questions, either following up items mentioned here, or other questions, please post. There are a number of people here with varying degrees of expertise and experience who are more than willing to help. We hope we've anticipated many of the questions the beginner will have. And so, without further ado....

o What is rec.radio.shortwave for?

As stated above this group was created for USENETers to have a place to discuss the radio monitoring hobby. This group is not moderated, however 'serious' arguments and any kind of flame wars are strongly discouraged. That is not to say that genuine disagreement and discussion of differing opinions is not welcome. We only ask that you keep the tone friendly, and in the spirit of international cooperation upon which the hobby is founded.

This group is intended to be a place where ANY radio monitoring topic can and should be discussed. We are happy to hear from posters who listen to any part of the radio or microwave spectrum, from DC to daylight. We discuss topics of almost any kind, ranging from (but not limited to) shortwave broadcasting, DXing small or distant shortwave stations, utility and teletype monitoring, military eavesdropping, station schedules, QSLing sw broadcasters, spectrum usage, equipment design and modifications, antennas, receiver reviews and recommendations, and many more.

Despite what the newsgroup name might imply, we definitely DO NOT limit discussions to shortwave only. Any radio-related topics are welcome. People interested in scanning VHF frequencies may find that the rec.radio.scanner newsgroup more accurately reflects their interests, and people interested in pirate radio may want to check the alt.radio.pirate newsgroup, although this group seems to be more interested in building small FM transmitters than in hearing distant shortwave pirates.

For more in-depth answers to questions you may have, we direct your attention to the postings entitled "Welcome to rec.radio.shortwave (Shortwave)", and "Welcome to rec.radio.shortwave (AM/FM DXing)", depending on where your interests lie. Scanner enthusiasts are also encouraged to read Bob Parnass' excellent monthly FAQ postings on rec.radio.scanner.

FAQ, of course, stands for Frequently Asked Questions. It is considered good form to read the FAQ(s) for a newsgroup before posting to ensure that ones posting is appropriate. You can find FAQs for most newsgroups at ftp://rtfm.mit.edu/pub/ by anonymous ftp, or on WWW at http://www.cis.ohio-state.edu/hypertext/faq/usenet/FAQ-List.html . Look under the following URL for a list of all radio-related FAQs.

http://www.cis.ohio-state.edu/hypertext/faq/usenet/radio/top.html

P.S. For those of you without the patience to look in the appropriate place, the BBC World Service can be reached by e-mail at

worldservice.letters@bbc.co.uk. This has become probably the single
most frequently requested piece of information on rec.radio.shortwave.

I see you can't answer simple questions on the technical terms you use,
which pretty much disproves the BS you have propagated via Usenet and
the web that you have built transmitters and understand how to couple
them to towers. You completely fabricated that stuff.

All you can do for an explanation of field strength is point to the FCC
web site. You can't use your own words to explain the terms.

Faker or poser take your pick.

And the joke is that this was all hashed out in 2003, when "RHF"
felt it was acceptable to have forsale ads here, and used google's
fine print to legitimize his point.

And back then, I took him to task for his google-centric view and
yet he continues with it to this day.

In that thread back then, I even dug up old posts that discussed
this potential newsgroup before it was created.

"RHF" himself has posted it, yet seems to have missed the point.
It's hard to tell if he's taking the name of the newsgroup literally,
or selectively declaring some threads off topic because he's decided
it is.

I've posted something over the years, though I can't remember whether
it was before that 2003 thread, or even if it was the intro or
something else.

Even when I was a kid, "SWLing" was a pretty vague term, something you
sort of knew the meaning of (if you were interested in the topic) yet
```

not so easy to define.

Look in the magazines from decades ago, and you'd see that tuneable police band monitor on top of that shortwave radio, or there'd be a caption such as "He listens to the shortwave bands with his HQ-180, but he's most interested in FM DXing".

"Communications World" would have the White's Radio Log in the back, but would one issue (it was either came out 2 or 4 times a year) would focus on shortwave broadcast, another on "Police Band Monitoring", and another would be about AM broadcast band DXing, and so on, until it had covered the various areas that "SWLing" tended to vaguely define, and then it would repeat.

There was overlap because that's what it was about.

Quite honestly, why would I worry about what anyone on this ng thinks? It's
fun to participate, and for every loon like you and Telamon and the deranged
Steve, there is a worthy debater like Mr. Maus. But in the overall picture

Actually, for several years I had the only OIB in Ecuador, and was

I gave you an explanation, consisting of the context in which broadcast
engineers use the term. Very few are experts in propagation theory, most can
not design a directional array. Our interest in signal contours is based on
insuring management that we are getting all the coverage we are legally
licensed for....

And the fact still remains... and this is where this started... that
listeners do not commonly listen beyond the 10 mv/m contour on AM and beyond
the 64 dbu on FM... based on analysis of ZIP codes where listening to
stations takes place and the available "listenable" stations in each >ZIP
code.

Sure you did...

Did you remotely tune them whilst you were *working* (or visiting, or dreaming

You aren't interested in debate or in anything substantive. If you were, you'd be trying to hold onto your younger listeners instead of posting to usenet. Seriously, you may not realize it, but AM can't go on the way this way forever.

David Gleason would like to remind all RRS posters that the decline of hgh with age, sometimes referred as somatopause, is directly associated with many of the symptoms of aging, including: wrinkles, gray hair, decreased energy and sexual function, increased body fat and cardiovascular disease, osteoporosis, elevation of moods and the reduction of depression, and much more. The good news is that clinical evidence shows that we can dramatically reverse these symptoms with hgh therapy.

HGH, also known as Somatotropin, is the most abundant hormone secreted by the pituitary gland. It is produced at a rate that peaks during adolescence when accelerated growth occurs. Daily hgh secretion diminishes with age to the extent that a 60 year old may secrete less than 25% of the hgh secreted by an average 20 year old

Don't miss out on the Fountain of Youth! Order your HGH today!

Heck, the poor guy can't distinguish the difference between *visiting*, *working at*, *dreaming about* or even *owning* a radio station.

How is he supposed to *fix* radio?

I own a Ten Tec 320D which I like very much, I also own a JRC 535D, Palstar R30CC and numerous Sony's. I am very impressed by the Ten Tec it rates better than the Palstar in most cases and keep up with JRC unit in most instantiates. The thing I like most about it is the computer control, I can with my program for MAC (Mac logger) plus is to use the databases to program unit for either time or station. This is helped me to log more stations, because I alway forget what time so of the rare ones are broadcasting. The Ten Tec is very sensitive also. I originally got it so I could decode DRM transmissions. I am very impressed with Radio New Zealand's offerings. The Sackville relay station in Canada has several different station on 9800KHZ and about 0000 UTC RADIO TRP is broadcast at 20 KBS stereo. At my QTH in Tucson, AZ I have very few drop-outs while listening, as compared to my dial-up internet real-audio /MP3 broadcasts.

Edweenie, I truly feel sorry for you. You were born in 1946, and about the time you entered your teens, '59 or '60, there did not exist any treatment or drugs to cure or arrest the affliction that you have.

No wonder your mother sent you away.

She was a graduate of Wellesley, was she not? (Same school Hillary Clinton graduated from), and of course what one might consider to be a socialite of sorts in Cleveland?

READ: The Unholy Alliance of Neo-Liberal-"Progressives" and Islamofascism
http://www.amazon.com/Unholy-Alliance-Radical-Islam-American/dp/089526076X

Islam enjoys a large and influential ally among the non-Muslims: A new generation of "Useful Idiots," that Lenin identified as those who lived in liberal democracies and furthered the work of communism. This new generation of Useful Idiots also lives in liberal democracies but serves the cause of Islamofascism-another virulent form of totalitarian ideology.

Useful Idiots are na&#65533;ve, foolish, ignorant of facts, unrealistically idealistic, dreamers, willfully in denial or deceptive. They hail from the ranks of the chronically unhappy, the anarchists, the aspiring revolutionaries, the neurotics who are at war with life, the disaffected alienated from government, corporations, and just about any and all institutions of society. The Useful Idiot can be a billionaire, a movie star, an academe of renown, a politician, or from any other segment of the population.

Arguably, the most dangerous Useful Idiot is the "Politically Correct." He is the master practitioner of euphemism, hedging, doubletalk, and outright deception.

The Useful Idiot derives satisfaction from being anti-establishment. He finds perverse gratification in aiding the forces that aim to dismantle an existing order, whatever it may be: an order he neither approves of nor he feels he belongs to.

The Useful Idiot is conflicted and dishonest. He fails to look inside himself and discover the causes of his own problems and unhappiness while he readily enlists himself in causes that validate his distorted perception.

Understandably, it is easier to blame others and the outside world than to examine oneself with an eye to self-discovery and self-improvement. Furthermore, criticizing and complaining-liberal practices of the Useful Idiot-require little talent and energy. The Useful Idiot is a great armchair philosopher and "Monday Morning Quarterback."

The Useful Idiot is not the same as a person who honestly has a different point of view. A society without honest and open differences of views is a

dead society. Critical, different and fresh ideas are the life blood of a living society-the very anathema of autocracies where the official position is sacrosanct.

Even the "normal" spends a great deal more energy aiming to fix things out there than working to overcome his own flaws and shortcomings, or contribute positively to the larger society. People don't like to take stock of what they are doing or not doing that is responsible for the conditions they disapprove.

The Useful Idiot, among other things, is a master practitioner of scapegoating. He assigns blame to others while absolving himself of responsibility, has a long handy list of candidates for blaming anything and everything, and by living a distorted life, he contributes to the ills of society.

The Useful Idiot may even engage in willful misinformation and deception when it suits him. Terms such as "Political Islam," or "Radical Islam," for instance, are contributions of the Useful Idiot. These terms do not even exist in the native parlance of Islam, simply because they are redundant. Islam, by its very nature and according to its charter-the Quran-is a radical political movement. It is the Useful Idiot who sanitizes Islam and misguides the populace by saying that the "real Islam" constitutes the main body of the religion; and, that this main body is non-political and moderate.

Regrettably, a large segment of the population goes along with these nonsensical euphemisms depicting Islam because it prefers to believe them. It is less threatening to believe that only a hijacked small segment of Islam is radical or politically driven and that the main body of Islam is indeed moderate and non-political.

But Islam is political to the core. In Islam the mosque and state are one and the same-the mosque is the state. This arrangement goes back to the days of Muhammad himself. Islam is also radical to the extreme. Even the "moderate" Islam is radical in its beliefs as well as its deeds. Muslims believe that all non-Muslims, bar none, are hellfire bound and well-deserve being maltreated to the utmost.

No radical barbaric act of depravity is out of bounds for Muslims in dealing with others. They destroy precious statues of Buddha, level sacred monuments of other religions, and bulldoze the cemeteries of non-Muslims-a few examples of their utter extreme contempt toward others.

Muslims are radical even in their intrafaith dealings. Various sects and sub-sects pronounce other sects and sub-sects as heretics worthy of death; women are treated as chattel, deprived of many rights; hands are chopped for stealing even a loaf of bread; sexual violation is punished by stoning, and much much more. These are standard day-to-day ways of the mainstream "moderate" Muslims living under the stone-age laws of Shariah.

The "moderate" Islam has been outright genocidal from inception. Their own historians record that Ali, the first imam of the Shiite and the son-in-law

of Muhammad, with the help of another man beheaded 700 Jewish men in the presence of the prophet himself. The prophet of Allah and his disciples took the murdered men's women and children in slavery. Muslims have been, and continue to be, the most vicious and shameless practitioner of slavery. Slave trade, even today, is a thriving business in Islamic lands where wealthy, perverted sheikhs purchase children of the poor from traffickers for their sadistic gratification.

It is a well-established fact that a Jew's word is his bond. The exact opposite is the case with Muslims. Muslims are taught deception and lying in the Quran itself-something that Muhammad practiced during his life whenever he found it expedient. Successive Islamic rulers and leaders have done the same. Khomeini, the founder of the 1979 Iranian Revolution, for instance, rallied the people under the banner of democracy. All along his support for democracy was not a commitment of an honest man, but a ruse of a true Muslim. As soon as he gathered the reign of power, Khomeini went after the Useful Idiots of his time with vengeance. These best children of Iran, having been thoroughly deceived and used by the crafty phony populist-religionist, had to flee the country to avoid the fate of tens of thousands who were imprisoned or executed by the double-crossing imam.

Almost three decades after the tragic Islamic Revolution of 1979, the suffocating rule of Islam casts its death-bearing pal over Iranians. A proud people with enviable heritage is being systematically purged of its sense of identity and forced to think and behave like the barbaric and intolerant Muslims. Iranians who had always treated women with equality, for instance, have seen them reduced by the stone-age clergy to sub-human status of Islamic teaching. Any attempt by the women of Iran to counter the misogynist rule of Muhammad's mullahs is mercilessly suppressed. Women are beaten, imprisoned, raped and killed just as men are slaughtered without due process or mercy.

The lesson is clear. Beware of the Useful Idiots who live in liberal democracies. Knowingly or unknowingly, they serve as the greatest volunteer and effective soldiers of Islam. They pave the way for the advancement of Islam and they will assuredly be among the very first victims of Islam as soon as it assumes power.

Boy, this page seems to be full of b.s.
Did they get this forecast from one of their psychics? Were they high

As long as he remembers to pick it up by the "clean end", which many Liberals believe to be possible.

Ya got proof of that? It never seems to show up in any Callbooks.

Interesting, but I'd be curious to see if he held that call in the late '60's as that is when the reprobate Edweenie claims to have held the call, though it appears to have not shown up in any Callbook at the time.

Not surprising

My guess is we're gonna hear some rap about how "Carlos", "Cesar",
"Maldonado", and "Reinoso" are more "middle names" that Tardo has
"always had" and "chooses to use in some contexts".

Click on the Civil Defense link, about the G.E.Radio with the Meter thingy on the side of the Radio.Sylvania built at one or more similar radios with a neon tube and a compass and a little sundial on top of the Radio, a few other radio companys were interested too.

I own a yellow hand held radiation/counter meter.It looks like the CD V-715 model in that ORAU Museum picture.I bought it for $5.00 at the Goodwill store years ago.I don't think it works, something about something inside of a tube inside of the meter box probally needs to be replaced, I think.

Movie Reviews On The Best And The Worst
http://moviereviewstation.blogspot.com

I recall many years ago when people were saying that movies were a thing of the past, that people would be entertained with the internet and video games. Well, not so! In fact, the movie business (including movie rental) is big business and it's not likely to go away anytime soon.

Let's take a look at the two 500 pound guerillas in the movie rental business: Netflix and Blockbuster. We have a brief description of the programs outlined here:

Netflix launched its online movie rental service in 1999 and currently has more than 3,000,000 customers.

With Netflix you can rent as many movies from the comfort of your home and have them delivered to your door in about 1 business day via U.S. Mail. There are no late fees and no due dates, and shipping is free both ways. Plans range from $9.99-$17.99 plus any applicable tax. When you finish watching a movie, simply put it in its prepaid envelope and mail it back to them. After they receive it, they'll send you another movie.

They has a wide selection of movies - everything from classics to new releases, with 40,000 titles. Their web site is available 24 hours a day and makes finding movies simple and convenient. New customers can try it free for two weeks. You can cancel your membership anytime with no cancellation fees.

Blockbuster now has a very similar online mail delivery movie rental program. Their program started in March 2005 and they have a online movie library with more than 30,000 titles. Their monthly fee is $14.99 (plus applicable taxes) for an unlimited number of movies. You can have up to three out at one time. Return them in the postage-paid envelope and you'll receive others that you have selected. Also as a member, each month Blockbuster give you two ecoupons for free in-store movie or game rentals. You can cancel at anytime.

The up-side of these online, mail delivery rental programs is there are no due dates or late fees, you don't have to go into the store and there are more available selections than the stores carry. The downside is that you have to wait for delivery in the mail.

There was no test at all. Never took a driver's test, either. A properly
processed application for either required no test.

Calls are recycled nearly everywhere. They are not like football jerseys and
they don't get retired.

I had the calls from about 1965 into the late 60's. I really don't remember
if one had to renew with some regularity or not. Licenses were "courtesy"
grants in most cases.

There was no test. Licenses for anything in Ecuador were "actas" on European size legal paper. Of course I have not saved a ham license from the 60's (I don't even have my first FCC 1st ticket) and probably most people don't.

What I am saying is that most anyone who wanted a ham license could ask for one and get it. There is no testing, just some fees and a "fee" for processing. The limiting factor in Ecuador was that the average annual income per household then was less than $1000 a year, and imported ham gear could easily cost $2 thousand or more. Any "luxury" item had as much as 200% of the CIF value plus foreign exchange charges, etc. Not many people could become hams there.

The current holder was not even born in 1965. Mr. Maldonado is a veritable
youngster.

I told you twice that the licensing process did not work that way. You had a sponsor from one of the clubs, you got a license. Or you simply paid a larger fee and you got a license.

a code test at that time, as far as I know.

I actually think Tardo should stick around. He's fairly amusing on

No, there was not. I believe if sponsored by a club member, there were no
requirments. Of course, the requirements changed according to the "license
fee" you paid.

You really have no idea what it was like in Ecuador in the 60's, do you? I
did not have a refrigerator most of my time there. I preferred taking a bus
to most places instead of driving. There were 3 months of summer when two to
three days a week we had power rationing and no electricity from sunrise to
sunset. No cars had automatic transmissions. You took the wiper blades off
your car every time you parket. A first run move was $0.40 for the good
```

seats. In the summer, there was only enough water to bathe ever two to three days. A phone call to the US took two to three days to place, and was booked in advance. A call to another city could take several hours to get. There was no such thing as a home loan or mortgage... houses were bought cash only. 40% of the population spoke Quechua. AM stations were licensed every 20 kHz in the same city. Most AMs did not have towers as antennas. There was no FM station until 1966 in the whole country. Quito's first commercial TV went on the aair in 1965, and a TV set cost more than 20 times the minimum monthly wage in the country. The airport at Quito only ran in daylight hours, so dangerous was it. There was no frozen food section at the supermarket (there was only one supermarket in the whole city of Quito, too). Most food was bought fresh the same day as it was consumed. There were no fast food restaurnats, and no hamburgers or pizzas anywhere. A live in maid cost U$S about $40 a month. Nothing in dealings with the government was processed for free.

No, I just sent an assistant to get it for me. That was SOP. I don't know anyone who took the test, either.

That was a renewal. The original was issued in DC at the old M Street FCC
location in '69 or '70.

Ok, you tell me how many people in Ecuador could afford to be hams?

And anyone in Ecuador who wanted to get out of any requirement could,
easily, with the right donation. That includes tests, which I do not recall
anyone ever even mentioning to me.

You have absolutely no clue how things worked in the 60's in Latin
America... or, specifically, Ecuador. why in the world would one take a test
when they did not have to?

Prove what? A renewal means I had the licence prior to the renewal. The
renewal was issued in '74 at San Juan, meaning the prior one was issued in
1969.

The US State Department has no clue about the workings of 95% of foreign governments. How would they possibly know that one could get, in 1965, a ham license in Ecuador by simply taking care of the right persons? The number of times I saw the US government screw up in Ecuador makes me totally unsurprised that the US is pretty universally hated around Latin America and the world. Your application of US rules and morals to other nations is typical of the attitude that has caused this.

Yeah sure thing. You don't know mathematical or technical terms but you
can tune towers. Give me a break.

If you really were "frequently called on to tune towers" then you must
have had a method. Maybe you could explain this tuning method. There are
always times when you go to tune some circuit or box or tower and it
does not tune up right. Maybe you have a notable example of when things
did not go right and you had to change methods or trouble shoot the
tower/coupling circuits before it would tune up?

Well there is a point we can agree on. That is all you can do. All I
have been asking is for you to put it in your own words. If I can do so
can you.

You gave a very weak "someone else's explanation." I'm not asking hard questions of you. I just want to know whether you understand the terminology you use to make a point. You make many posts to the news group. You should know what you are talking about. I suggest you sit down with an engineer and have him explain them to you.

You have stated this several times and it does not pass the smell test.
Why would any country issue a license to broadcast or transmit without a
proficiency test. The same goes for driving.

Here's a simulated Tardo reply: "You don't know anything about what it
was like in Ecuador in the 60's, do you? We didn't have methods then,
and troubleshooting is an American concept that has no counterpart in
Ecuadorian culture."

It's going to all go over well when people start hearing all this digital crap all over the AM bands. When you can't hear a station 50 miles from you because co channel interference. It will be nice and maybe enough people will get off their asses to care and tell the broadcasting monopolies to shove it.

Honestly, who in the hell wants to listen to most radio broadcasts for music and all that any more. Especially commercialized broadcast radio with all that crap and announcements and BS.

I would rather listen to online radio, SW, even Satellite Radio, versus anything on the radio bands. Our local FM here in KY is total nonsense with boring assed talk show hosts in the morning talking about much of nothing. If you want to listen to music and something decent, buy yourself a Satellite Radio either Sirius or XM and save on buying CDs as well.

That way at least you can listen to some decent music and not that crap that goes for local AM/FM radio these days.

HD is just another attempt to make money off their dying medium since instead of producing things the real person wants to listen to, they trot out the next so called radio personality that tend to be some ill educated jackass that got fired from their last job at BK.

One thing you can say about a lot of those bureaucrats living off the gravy train, they are pretty much rooster suckers if you get the hint. When many Americans aren't getting any sort of healthcare because they can't afford it, it shows the bullshit of the current system. Yes, CONservative aka CONvicts. RHF strikes me as another of their bloodsuckers.

I don't think Edweenie knew too much about Ecuadorian culture in the 60's either. That is perhaps why he got caught with his pants down and was told to leave the country *at gunpoint*.

You wouldn't know what work is if it hit you in the ass. I've never met a bureaucrat who actually put in a fair days labor. Not one and I have ran into quite a few. Its another fraud on the bill paying working class of the country.

That's hilarious. I just ROTFLMAO. You have to wonder what a so called American getting his welfare check is doing in the Phillipines. A country so rancid that it totters in Third World poverty. Muslim extremism, and corrupt that makes even the Repubs and Democrats look like choir boys.

It is interesting to note that these people are always on the defensive for their actions. When you are like DxAss there is a lot to be defensive about. Same goes for the rest of the leeches.

I only understand that you're too stupid to get a real job and make real money!

I won't lose sleep over it though. After all, my bank account swells whilst I
sleep at night.

You should be so lucky.

I didn't see anything racist in his post which is the act of determining
ones race as being inferior to your race. He was making the inference to the
mail order bride syndrome. Of course, you're not smart enough to figure that
out. It's pretty obvious that your lacking in educational background or any
sort of education other than psycho babbling about your so called truths. Or
is should be fruits.Of which being from the wacky west coast state, would
make one miss out on reality.

Was, and may still be a great place to live. I served in the US Navy with many Philipinos who considered it an *honour* to serve in the US Military.

Please do not dishonour their service to our country.

The method for tuning a tower is to design based on wavelength a
theroretical ATU tuning circuit based on line impedance (typically 50 or 52
ohms for coax fed towers) and the calculated base impedence of the tower.
Then, using either the actual transmitter, or an RF signal generator, RF is
fed to the tower throug an OIB and the impedence and reactance are measured.

Frequently you have a close match, and only slight adjustments of the coil
in the ATU are needed (most ATUs use strappable coils, but fixed vacuum
caps) will bring it into match. One of the issues that makes tuning harder
today is the desire to have the tower as broadband as possible. Many older
ATUs had an easy to adjust high Q network, but today most stations want a
broader bandwidth ATU, which makes the best tuning point harder to find.
Many engineers will begin with an OIB read at points a quarter of the way
from each end of the coil's winding.... this gives you an idea of which way
to go to get a match. Once the tuning area is reduced, then "half way
between" steps are usually used.

Most ATUs are not built by station staff. One either provides a measurement
made with an RF generator and a bridge (Some bridges have an RF generator
incorporated) or the description of the tower in electrical degrees at the
frequency and the fabricator, like Kintronics, will ship an ATU built for
the tower.

On directionals, most are designed by consulting engneers, and the phasors
are built by one of two or three fabricators like Kintronics. While not used
in the US, many simple directionals elsewhere are done by means of a dual
coax feed, of equal electrical length, which goes to each of two towers,
with just the spacing in degrees determining directionality.

This does not adress towers tuned by methods other than series fed base fed
towers. There are shunt fed and unipole antennas, both of which are not
insulated from ground at the tower base. And there are direct fed antennas,
mostly foded L's and T's, that are fed without an ATU right off the final
tank circuit of the transmitter, with the vertical component of the L or T

being the radiator and the horizontal portion becomeing a top hat or "top load" to simulate greater electrical height.

My tricks for tower tuning included, 1. do not do it when there is a single cloud. 2. do not do it when there are any atmospherics. 3. wear boots at all times. 4. have a positive indication, such as a light bulb on a long cord, whether the transmitter is plates on or plates off 5. never do this work alone. 6. when I was doing it, I always carried my CEI slide rule for calculations 6. watch out for cattle, goats and, especially, geese. Geese bite.

Actually, after I posted, I went to our engineering office to get the NAB Engineering Handbook, and brought up the simple question "what is mV/m" since it is a daily use term; both of the engineers present gave the same definition I gave you: it expresses the field strength of a signal at a particular point or along a particular contour.

And these are engineers who install and maintain and modify the transmitters for 5 stations (All with HD), two of them with backup sites, 16 studios, network feeds to one 28 station and another 12 station network, dozens of remotes, remote TV studios for out talent who are on TV daily, and all the related routers, processing, redundant STL systems, earthquake and disaster preparedness installations like alternate studios and genny sets as well as a 50 kw 5 tower, 2 pattern directional that is diplexed with another high power AM only 130 kHz higher on the band... all of which use a counterpoise ground that has acres of copper webbing, silver-soldered and clamped, 12 meters above ground!

You don't get it, do you? The alternative to taking a driving test was to
make a gift of money to the appropriate person. It was SOP to put a S/.50
bill inside the license "brevet" which would be extracted as "fine payment"
if stopped; the alternative would be to have one's car impounded.

As to ham licenses, believe it or not, but some countries think that ham
operation is just like CB operation. The license is given to whoever wants
one.

x-band has nothing but electrical noise on it here in Korea. Makes it nice
if I want to have a QRM free frequency for my inhouse transmitter.
Unfortunately, most of the radios I have around here (most around 70-80
years old) don't seem to have that band.. :) Some only go up to 1500..

How clueless are you idiot?

You've failed once again, because you can't grasp that
pathologically changing the subject header. And you still
can't grasp that "doing it your way" is the problem, that there
are community standards for doing this and you either can't be
bothered figuring it out, or don't care.

A subject header is supposed to be descriptive, so people can
decide whether or not it's worth looking at the message, without
actually looking in the message.

Change the subject header without any reference to the previous
subject header, and then the subject header no longer works as
an indicator of what's in the message.

It negates the whole purpose if one has to open the message
to find out what the message is really referring to (ie the subject
header that existed before your dictator mentality kicks in which
makes you incapable of posting a reply without changing the subject
header).

So not only do you still not get that right, but then people have
to scroll 76 lines down, I've deleted all of those 76 lines for
your consideration bozo, in order to see your stupid line
that mentions what the actual subject header is.

I should point out that it is the mark of a troll to put someone's
name in the subject header, unless that person is the subject
of the post. But you aren't doing that, you are doing it because
you can't get the basics of the newsgroup right.

The reality has set in. You do not care about this newsgroup,
you are just part of the problem.

I have never done business in central or south America other than take
vacations there so no I don't get it. The car driver license is a safety
issue and the communications license can be a national security issue
that you would think the governments would want to keep under control. I
can't see them just handing them out for payola.

Nevermind officialdom. I have a good idea how bullshit artists work,

I'd remind you, in the radio context, that General Tire lost some licenses
and had to sell all the others for the RKO radio and TV operations they
owned because they were convicted of doing business in Argentina, Libya and
several other nations on the basis of payoffs to officials. The defense that
"business is only done that way" did not help, as it is in contradiction to
American law... but it illustrates that not much of anything went on in the
60's or 70's in much of the third world without baksheesh.

To a government official in Ecuador making $60 a month, getting $50 for each
expedited driver license is the basis for surviving. Police could not live

without the "tips" that caused a speedy resolution of traffic violations.

Things are not seen from such an altruistic point of view as you expect. Fees to the government are for revenue, not safety or security. "Tips" to employees were an expected token of appreciation and to the contrary, paperwork sat for eons on official's desks. Since there was little payment of income tax, the government got revenue from import taxes and "stamps" on every document, from a marriage license to a new telephone line order. Once the government got those fees, there was not much concern for how the employees might benefit as well..

As to ham licenses, we are talking about a country where, when I asked for the first commercial FM licenses, I was told that there was no system to grant same... but that such a system could be created were I to desire. Worry about ham licenses was non-existent and ham radio considered a quirk of the wealthy for which they should pay, not pass a test. Radio stations were never inspected; I operated HCFV1, licensed to 805 kHz, on 810 for half a decade (to avoid hetting with TWR in Bonaire) and nobody in the government noticed. Had they noticed, a change would have been granted cheerfully for a modest fee.

Ecuadorian travelers, who usually left with empty suitcases one inside another like Russian nesting dolls, returned with thousands of dollars in clothing, toys, gifts, appliances and such. Usually, a few S/.100 bills were placed on the top of the contents inside each bag. Once the bills were harvested, the returning passenger was cleared in customs.

This is good answer, much more than I expected from you.

Quote "Many engineers will begin with an OIB read at points a quarter
of the way from each end of the coil's winding.... this gives you an
idea of which way to go to get a match. Once the tuning area is
reduced, then "half way between" steps are usually used."

This is very telling. Chances are you would not pick up on these two
points unless you actually did the tuning.

OK, maybe I frame questions badly. Radio waves are EM waves where the
volts per meter (V/m) is a measurement of the E field. You could
measure similar for the magnetic field (H/m) since in a far field the

energy is equal in the E and H fields. Since radios waves are the same thing as light waves where photons that have no mass are the carries of or direct these fields. The E field measured as V/m is just a vector and if the terms are squared so that the area is considered perpendicular to the direction of travel and you also take in account the impedance of free space you can then calculate the power of that EM wave per meter squared at some distance from the tower.

(I didn't expect all that from you just some variation the second sentence of the paragraph above.)

Well continuing on with the explanation of how this affects radio reception you can calculate the amount of power a receive antenna will develop by knowing the power per m^2 of the passing EM wave and the area (m^2) the receive antenna influences. Does this make sense to you?

So from this the lines on the broadcast maps are not a boundary where on one side you have good and on the other side poor reception. The energy of the EM wave falls off as a square of the distance in theory (but somewhat more in reality due to other factors) and so these lines do not behave as if they are some kind of demographic line as your posts appear to indicate.

Theoretical hand waving aside the empirical data I posted that you rejected out of hand from an expensive receiver was used by me because it has a good linear power meter. Readings from it show the relative field power received from a single turn interior loop antenna of low gain. In addition I related those readings to a hand held portable radio used indoors. In addition to that I also compared the reception of a car radio. Only good reception on all three counted toward the number of stations I considered as strong noise/interference free stations as measured in broad daylight. My recollection was you stated everyone had on average three stations and I reported something like 11 or 13.

I hope this sheds some light on how your posting behavior looks to me. It's not good and most other people reading the news group are of the same opinion.

According to the FCC broadcast division, if the Feds want to operate a
station in the MW band, they are required to coordinate with the FCC.
Especially in an area like Madison
county what with the nerve agent. Anyone who tunes in to 1640 will not
get local information.
I heard a test Friday on their NOAA WX TX that was relayed via the
Clark County TIS.

Since the Madison County DES has no idea where or why the 1640 station
exists, and because it is carrying the "wrong" NWS audio stream they
doubted the BGAD has anything
to do with it. I have emailed the chief comm officer at the depot
about this. I suspect the
county has jumped the gun with a TIS for their new Battle Field park.
The area the signal
appears to be originating from has been transferred to the county. The
"proper" NWS audio
stream comes from the Lexington NOAA WS station from Lossyville and
the received audio is routed through a local audio "board" to allow
local interruption for emergency or, so far,
test messages.

They were unaware that their licensed TIS on 1610KHz is down and had
been down for
over a year. Apparently they never bother to test some of their
equipment. Given that
every dwelling and business in Madison county has special "NOAA" WX
receivers tuned
to a local low power WX TX I suspect no one in the county even knows
the 1610 signal
exists.

Clark County on the other hand did not receive the special receivers so they use thier
TIS for community service anouncements. The NOAA over ride from Madison EOC
also over rides the community service messages.

FWIW the TIS that is supposed to operate at the I64/I75 junction/split on 530KHz is not
present either.

Tomorrow we plan on checking 3 more listed TIS sites.

It is kind of neat to play detective with simple commercial equipment. Today we drove to the
Clark county TIS with me blindfolded just by me keeping the DX398 nulled and with my wife
following the null. From the Fayette Clark county line it took less then 15 minutes before she
pulled into the parking lot directly below the antenna. She did not know where it was.

I have played hound hunting the fox on 11M(CB), 6M, aero ELT (121.5), 2M, and 70cM but never in the MW band before. It is interesting to note how the noise floor will jump up as you pass certain electrical "things". LED traffic control lights have a distinctive strong signal. And our auto is quiet enough so we can hear other autos and trucks. The other interesting thing is inspite of the inverse square law, double the distance and quarter the signal strength, these low powered MW sources are much more linear then what I experienced on higher frequencies.

We checked out Camp Nelson and like the BGAD the signal does not show a point source
null except from directly across the highway. The slotted coax appears to run from a service building directly out the main drive for a distance of about 400' .

>From the side the signal has a very broad "null". By the time you back up enough for the line source to shrink to a "point" source, you are too far away to receive the signal. It also operates on 1610 and from more then a 1000' away the Clark county signal beats with the desired Camp Nelson signal making nulling interesting.

There's nothing wrong with loving your country not one bit. However, blind obedience to bad rule and bad government is a different story. In fact, you might spend some time researching some of these topics and come with a different view.

I doubt if one broadcast engineer in a thousand could state that. At radio stations, we are talking about 10% theory and 90% practical aplication... if that. It is beyond any practical application, photons and all.

What you have to understand is that the heavey hitting is done by consulting engineers, who will design the directional systems and even put together most FCC applications. The station engineers often do not even install DAs, and are somewhat like the contractor who gets designs from an architect; we do not know why a certain mixs of concreat, or diameter or rebar or specific sort of I-beam is specified, but we know how to build from the design specs and make it work.

Again, what is important to a station engineer is to comply with the license and the rules. DAs must have the right null depth. Occupied bandwidth, harmonic separation, s/n, THD and such must meet FCC requrements. And when all else is done, there must be "good engineering practice" ranging from proper grounding, well dressed cable, interlocks functioning, fences around tower bases, etc.

The objective is keeping the licensed facility operating within the maximum parameters of the license so that management can program and sell advertising and the owners can make a profit. Some of us have built transmitters, exciters, processers, but most of us use stuff right out of texts and the NAB or even ARRL handbooks, not new designs. Those who do create new designs go on to be equipment manufacturers like Frank Foti of processing fame or the late John Pate who created remote control and audio devices after being a CE at WSM, Nashville Network, WERC (where I worked with him) and WMCA.

Our use of signal strength is primarily to know if we are operating legally. Management uses it to know where they can expect, if programming is right, to get audiences... and where they can't.

>
> So from this the lines on the broadcast maps are not a boundary where
> on one side you have good and on the other side poor reception.

If you think I said that, I appologize. I said most measured FM listening, for example, was inside the 64 dBu contour. In fact, 80% is in the 70 dBu contour and another 15% in the area between that and the 64. Obviously, population density is a factor in each area... a rimshot like KQMR and KOMR in Phoenix get about 80% of their listening between the 70 and the 64 because the 70's on each of these cover mostly desert... but the rule stands on the average station... given equal population density, reported listening falls off as the signal falls below 70 dBu and is almost non-existent by the time you get to the 64. Is that clearer?

Also obvious, but apparently not understood is the fact that listening data is granular only to the ZIP code level. Some ZIPS may be bisected by one of these contours. and some may have a 70 dBu in one part and, behind a hill, nothing. So the studies I have done and those I have seen elsewhere tend to take data from multiple ratings periods, such as a year, and look for total diary counts over such a period. And no matter how many years of data you analyze, there is pretty much no listening beyond the signal intensity levels I have mentioned.

This is not a matter of having contours mean that there are abosolutes, like moats in the sky, but that a station will certainly not spend money to put up billboards or do promotional events in areas where the signal is not good enough to get listenership. This is what I mean by programmers and managers looking at signal contours to see where there is potential for audience generation and where all efforts will be useless.

We don't spend a lot of time on photons and light waves. It's knowledge that does not contribute to the business and can really be distracting.

Gee, you mean you have to quadruple the power to double the coverage area? How amazing. I think I learned that when I was about 13. The ﷺpractical application of this is to demonstrate to the non-technical manager (about 99.9% of them) that raising the power by 10% will probably not be cost effective... 50% maybe, depending on population, and by even more, likely. I remember the expectations of the non technical staff at our New York FM when we went from 610 to 660 watts on the ESB... somehow they thought they would get 10% more coverage.

And my point is that there is little listening to many of the stations you cited as recievable. This is because they are not at a level that the average listener finds to be "listenable" and they do not use the stations. You might be interested in a site run by one of the engineering firms (that produces software for coverage contours, interference studies, etc) that shows field strength by ZIP code for the entire USA: There is an enormous correlation between ratings data and these calculated contours in each place.

The only difference is that radio broadcasting is a practical application of technology, not a place where theory is examined daily.

Respecting one's daily labor is much different than respecting the lack of labor done by much of the welfare and government bureaucrat sector of society. Interestingly, despite your obvious disdain for Clinton and Hitlery you do share much in common with them. Because just like them, you rely on the big government trough for your sustenance. A sustenance that is only

obtained by the taxation and rule making of taking what is produced by others.

A production that should benefit themselves and their families and not people too lazy to produce goods, service, and wealth. A much different scenario than you puport to believe in.

Your America is an America of freebies, handouts, and government assistance and intrusion into every facet of personal life. Not a beacon of personal responsibilitiy, hard work, self sacrifice, and self discipline.

Of course, America has been very very good to you. Especially when it was confiscated from the labors of others through non-voting taxation and someone else deciding who was going to be taxed into submission.

When one views your wages and earnings in that scope, one can see you differ very much from the original intent of Americans of which the Founders were. Their intent was to keep what they earned and made for a living. Yours is a process of redistributing wealth and income from those who earn to those who will not earn in most cases.

I don't have a limited life at all. In fact, one that is rich in many ways and not just money. However, one thing that should be noted is that I did not ever qualify for living off of the government teat nor did I ask for anything. That might be another nugget for you to chew on.

Thats a a quite excellent book as well. Have a copy of it myself. However,
one might notice that Fascism, Communism and Corporatism have many
similarities.

3655. David Gleason Presents: Spirit of the Forest Ginseng!!

Folks, David Gleason's ginseng is a very unique and complex plant. In the wild a root can grow for 100 years or more, most roots however mature in 15 to 20 years. Cultivated roots, depending on how and where they grow, need 5 to 10 years to produce quality root.

Most of the ginseng on the market is only three or four years old and has required frequent spraying of synthetic fungicides. This root can be purchased for less than 20 dollars a pound, it requires large quantities and always produces inferior results.

We are growers and buyers of wild and cultivated ginseng from the parking lot of Univision Radio. Ginseng from this parking lot has a reputation for being the best and always commands a premium price.

For our products we select only the best roots purchased directly from the grower or wildcrafter. These roots are then processed with our three stage cold extract process. This method preserves the unique and subtle qualities of ginseng and produces an extract with ginseng compounds that are identical to those found in the actual plant tissues.

Whether you're curious about ginseng and want to try it for the first time or maybe you've tried ginseng before, we urge you to try the real thing.

Ginseng with the special quality we call the Spirit of the Forest

Order Now!!

3656. Try David Gleason's Colloidal Silver!!

I followed the link you gave and got pretty much the same result as I
did for the Radio locator web page I used previously for my zip code
93001.
<http://radio-locator.com/>

Here are the results from the V soft page you gave, which lists +70 dBu
as Strong principal city coverage. 11 stations.

Call Sign dBu mV/m Principal City Frequency
KNX 70.2 3.25 LOS ANGELES 1070
KBKO 71.6 3.79 SANTA BARBARA 1490
KRLA 72.5 4.24 GLENDALE 870
KUNX 73.2 4.59 SANTA PAULA 1400
KFI 74 5.01 LOS ANGELES 640
KZER 76.5 6.71 SANTA BARBARA 1250
KSPN 76.8 6.89 LOS ANGELES 710
KVTA 80.1 10.08 PORT HUENEME 1520
KVEN 86.8 21.92 VENTURA 1450

KKZZ 89.7 30.39 VENTURA 1590
KOXR 90.3 32.62 OXNARD 910

To convert between the two field strength numbers
dBuV = 20*LOG((V/m)/1E-6)

That is a u in dBu and that is a "mu" or micro in dBuV. dBu or dBuV is
relative to 1 uV or 1 micro volt.

Radio Locator maps are labeld as for amusement only. The usable signal range
is about 20% inside the inermost circle, and the directional patterns are
not fully calculated. Many station groups prohibit the use of radio locator
maps because they significantly exaggerate usable coverage, something the
FCC has penalized stations for in the past.

Not a single one of those stations outside your market have enough signal to
generate ratings of any significance... they are well below 10 mV/m. And
only 5 in-market stations have enough signal to do so. KFI gets a small
share, and the other 5 have zero listening in the zip code.

70 dBu is principal city coverage for FM, not for AM.

Where does it say +70 dBu is FM only?

3 mV/m and up is a very strong interference free signal on AM. For KNX I
get -55 dBm or +20 over S9 on the signal strength meter as a reference.
KVTA which meets your 10 mV/m criteria is almost -45 dBm and not quite

+30 over S9. My reception is no different between the two stations. You getting the drift of this?

NOTE TO SELF :

With this Radiodifusión Argentina al Exterior (RAE) Posting.

The Message Count is ~200 for Shortwave Radio Reception
Reports {Stations Heard} posted here on Rec.Radio.Shortwave.

Note : Many {Most} of which are redundant and recurring.

* Maybe about 40 individual Shortwave Radio Stations
heard and reported.

* Maybe about 20 individual Countries heard and reported.

He doesn't care... or perhaps more properly, the suits don't care. He/they
don't care that people on the north Oregon coast preferred to listen to KWJJ
in Portland rather than any of the local stations up until the point were
KWJJ changed formats and calls. They don't care that there are parts of
Portland, OR where local FM is difficult to impossible to get WITHIN THE
CITY LIMITS, so most of the folks in those areas would listen to a Salem
station on 105.3 (the station recently relocated to a hilltop between the
cities for even better coverage of both).

He/they don't give a rats arse that the two most listened to nighttime
signals in the Northwest are KSL and KGO. (KBOI is right up there, too, and
I personally liked to hear KTWO. Also WWL was good and solid.

But those are DX stations, so they really don't matter... the others are
rimshots that a lot of people listen or listened to, despite whatever
Arbitron might say.

The former KRDR (now KMUZ IIRC) in Gresham was a popular country station in
the Portland market, but the city was outside their city grade contours, so
I guess that all those ads for Portland businesses weren't really there..

BAD - I agree DE and the Suits DON'T CARE
For Them It's Sellable Numbers and Station Revenue.

Whatever happen to the concept of Local Business
asking Customers what is their favorite Radio Station(s)
and selecting who they Advertized with from that List ?

I used to get KTWO-AM 1030 kHz here fairly well
at Night but now it is block by a Spanish Language
Religious Radio Station on the same Frequency.
KTWO => http://www.k2radio.com/main.html

The only Spanish Language Religious Radio Station
on 1030 kHz is KJDJ in San Luis Obispo, CA
http://www.radio-locator.com/cgi-bin/finder?call=KJDJ&sr=Y&s=C
-BUT- It is only running 700 Watts at night ? ? ?

Matt:
I use the MACLOGGERDX program to control my Ten Tec 320D with a $19.95
USB to serial converter that I picked up at Walmart and it works very
well. I have two PPC MAC MINIS.
There a Linux programs that you can get under the FINK and X CLASS, but
I still have not been able to make them work. To decode the DRM signals
on short-wave I use the DRM decoder program that I picked up on the Win
Radio site, and the DREAM software that I picked up when I bought my TEN
TEC on the WORLD STATION site it also came with the WORLD STATION
control program, but I rarely use it because I dislike the Windows
operating system. Bought the DRM decoder and Dream software have to be
run on a Windows OS so I still use my old At halon PC for DRM. Now
DREAM also can be run under LINUX but I not able to get it running due
to my Linux ineptitude, maybe one of these days I'll figure it out.
Now that Apple has put out a Core 2 DUO Mac Mini, I think I am going to
save up to buy one for Christmas time and run everything on the Mini
just using the Parraells program for simultaneously running both the MAC
and Windows OS.
The Ten Tec is a good buy, and I glad I bought one.

Made in China
Posted August 6th, 2007 by rabach

a.. Globalization
Fellow Americans,

The time to wake up and quit buying poisoned junk from China is now. Not only has China imported tons of good paying American jobs but they are exporting tainted products. Are they intentionally trying to kill us? Are the corporations that are using or manufacturing goods in China purposely involved in a international conspiracy to kill and demoralize us while using China as the target for blame rather than them?

Over the past few years there has been many goods made in China that have been tainted with lead and other toxins. Recently China has started producing foodstuffs that are used as ingredients in our food products, on occassion they manufacturer the entire product. Will this increase in the future? I certainly hope not and after reading the article I wish for you to join in a boycott against their products.

We can start with a story of a toy sold at WalMart for babies. The crib toy constantly uttered the words "I hate you" to the baby while it was in the crib. However a savvy group of parents realized that their child was being demoralized and possibly psychologically damaged before they could even carry on a simple conversation. A link to a article follows below:

http://www.worldnetdaily.com/news/article.asp?ARTICLE_ID=35633

Next we have the numerous products that are targeted to children containing lead. I will list a couple of the more notable recent examples. First is the example of lead being found in baby bibs. Imagine putting a bib on your child as your parents did for you before every meal. Only a careless and evil person or persons would ever harm a child by not ensuring that the products sold are safe. What is wrong with these Chinese goods and Walmart? A link follows below:

http://www.iht.com/articles/2007/05/03/business/bibs.php

Your child is a little older now and they are off to school. So are you going to waste money in paper bags or just purchase your child a new vinyl lunch box for them to take their lunch to school in? Well while they are in class and their lunch in the locker the lead from the lunch box may be taking its toll. Not only is your baby not safe but your youngster is now having to fight off lead at lunch time. A link follows below:

http://www.cehca.org/lunchboxes.htm

The most recent major recall is with Fisher Price toys. While most are aware of this recent event it is just another example of Chinese made products going awry. Who's to blame, China or Fisher Price? In my opinion both. Regardless of whether Fisher Price has the product made in America or China they have an obligation to the consumer to ensure that their product is safe. A link to an article about this current situation follows below:

http://www.cnn.com/2007/US/08/01/toy.recall.ap/index.html

While we can clearly see that not only are children nowadays exposed to the evils of man in their toys and the toxins placed there by irresponsible corporations our pets are also at stake. The recent pet food recall awoke America to the dangers of Chinese made food ingredients. Should America allow our food to be made in a different country? I will at least assert that they should be required to label any ingredient that is not made in America with the country of origin. In case you had your head in the sand about this situation a link follows below:

http://www.usatoday.com/money/industries/2007-04-26-pet-food-china_N.htm

These incidences of lead and toxins in Chinese products are by far only the tip of the iceberg. In fact this seems to be an everyday event and probably most Americans have some tainted Chinese product in their home right now. For an example of some more products read the article listed below:

http://www.worldnetdaily.com/news/article.asp?ARTICLE_ID=56056

Last, but surely not least, even the health advocates are under attack from the Chinese. Those who are trying to eat nutritous and wholesome foods might be surprised that their products also contain toxins imported from China. Why are these companies so cheap that they cannot produce these ingreidents in America? After all, anyone who has ever bought organic food at a health food store knows that the prices are usually much higher. A recent example occured with the Veggie Booty that contained salmonella. The tainted ingredient was imported from China, the article follows below:

http://www.yourlawyer.com/topics/overview/veggie_booty_salmonella

Americans it is time that we stood our ground and told these giant corporations, like Walmart, that we are not going to purchase their Chinese made products. Not only are they potentially toxic they are often made inferior to similiar products in the past. Your best voice is your money and where you choose to spend it. Why should we continue to support China? Have you not looked out your window lately and seen the gloomy clouds of the economy building into a giant storm? Do you not realize that by supporting corporations who purchase or manufacturer goods in China that we, as Americans, are financing our own destiny? The time is now to act, not later. Ask your congressman or woman to insist that products are properly tested and food ingredients are labeled with the country of origin. We must take a stand not only to protect our loved ones and pets but also to protect America.

I forgot to say that I have not heard the WindRadio WR G303E receiver, so I could not answer that part of the question. Passport does rate them high, but at $600+ I wasn't going to spring for an iffy radio, if I couldn't hear it first. There are no Ham Radio store here in town now, and I rarely make the trip to Phoenix for any reason, although I believe there is a HAM Radio outlet store there.

Chas.Chan,

I will take you word on that -but- can find nothing on the
Flex-Radio website about the Flex-Radio SDR-2500
FLEX-RADIO => http://www.flex-radio.com/

Current Product Inventory and Production Status
for Flex-Radio Systems' Products
http://www.flex-radio.com/Products.aspx?topic=ProdStatus

Flex-Radio lists the FLEX-5000 under their products.
http://www.flex-radio.com/Products.aspx?topic=f5k_features

FlexRadio Systems Product Comparison
http://www.flex-radio.com/Products.aspx?topic=SDR_Feature_Matrix

It is my understanding that the Flex-Radio SDR-1000
is Out-of-Production.
http://support.flex-radio.com/NewInformation.aspx

Flex-Radio's "What's Coming ?" webpage has nothing
on a 'future' Flex-Radio SDR-2500.
http://www.flex-radio.com/News.aspx?topic=whatscoming

Plus I am just a Shortwave Radio Listener (SWL)
so I am only interested in a Receiver and not a
Transceiver like the FLEX-5000.

If they are making a Flex-Radio SDR-2500 Receiver
then I would be very much 'interested' in knowing
more about it. ~ RHF

According to some of the posters at rec.antiques.radio+phono, DeOxit is
Caig's clone of Cramolin Red, made in Germany. Cramolin has been traced
back to an even older product known as Gramolin.

http://groups.google.com/group/rec.antiques.radio+phono/browse_thread/thread/689f96fa84ca1
f87/ab28a582082a2c05?lnk=gst&q=gramolin&rnum=3&hl=en#ab28a582082a2c05

or:

http://tinyurl.com/3yemgm

Cramolin Red is supposed to be a pretty simple product:

"That formula as called out on stick-on labels put on German-made cans is 5%
Oleic Acid, 95% hydrocarbons and propellants."

http://groups.google.com/group/rec.antiques.radio+phono/browse_thread/thread/8c860893bf23c

8c

or:

http://tinyurl.com/3dvvq6

A regular at the antique radio and phono had been selling oleic acid as a
"DeOxit equivalent" product. Caig sicced their lawyer on him:

http://groups.google.com/group/rec.antiques.radio+phono/browse_thread/thread/c7005bda95f1b
e07/23b215b748e73936?lnk=st&q=&rnum=12&hl=en#23b215b748e73936

or:

http://tinyurl.com/2a783g

He is still selling the same stuff, now as "Cease and Desist Contact Cleaner".

Here's a look at the Caig - Cramolin controversy including a quoted letter from Caig:

http://www.pitt.edu/~szekeres/caigcram.htm

I've also used some of the less expensive CRC contact cleaners from the hardware store with good results. CRC Lectra Clean has a powerful flammable solvent which will nicely remove carbonized grease. Even tiny droplets of that stuff will ruin paint and a steady spray will bore a hole right through common plastics such as styrene and ABS. CRC QD contact cleaner is much gentler. Both evaporate quickly and leave little or no residue. CRC 2-26 leaves a thicker film than DeOxit and I don't trust it to try it in pots, but it's been good on switches. 2-26 kept a crummy headphone contact in my Walkman working better than DeOxit.

My last resort cleaner on brass contacts is Tarn-X. I like to work on old radios, and 50 years of age and bad storage can create a corrosion seemingly immune to even the best cleaners. I suppose the cleaners are doing their job, but there's such a bulk of oxidation on the contacts that normal wiping action is often breaking off a new piece of grunge to foul the contact yet again. Tarn-X does a good job of stripping off these oxides, but I fear that stuff will be wicked up into the cloth backing of the Bakelite contact holders and might cause conduction/corrosion problems later, so I give them a good water soaking afterwards followed with plenty of alcohol then CRC QD and DeOxit. I've only had to do this a couple of times and it's worked well.

I do like the Caig products but when I run out, I think I'll try the Cease and Desist stuff.

Coordinate, yes. The FCC is likely aware of the station, but if it
belongs to the military it (probably) doesn't have a FCC license and won't
appear in most FCC databases.

If you have analog TV broadcasts on Band I and/or Band III, yes, you should be able to listen to TV broadcasts in Italy with these radios. They usually don't receive UHF broadcasts.

It should also be noted they don't get *digital* TV broadcasts. Here in the USA, analog TV is to be shut down in 18 months, so the "TV band" function of these radios will stop working in February 2009. (actually the radio will still work, but there will be no stations to listen to!)

Oh, two things. Tried oleic and it cracked my RCA plastic connectors
after two weeks. Won't use cease and desist stuff again - cost me
money and lots of time replacing my RCA sockets in my amp. Oh and

two, if you spent lots of money developing and trademarking a product and someone came along and claimed they had the same product and called it an "exact" replacement - I think you would get hopping mad. CRC and LPS stuff work well as flushing stuff of parts, but Deoxit always seems to make things better - has ALWAYS worked for me.

I have a Ten Tec 320D receiver. It's a tremendous value. Nothing else currently being made--at least that I'm aware of--will give you the bang for the buck that this thing does.

That said, it's not for everyone. There are people who will never be comfortable attaching their receivers to a computer in any way. To some extent I'm one of them. If I'm DXing, in particular, and trying to receive a signal that's very weak or faint, I will (for obvious reasons) not use a receiver that it attached to my computer. Still, the 320D is a fine receiver and I've had a lot of fun with it. And of course, the advantage of the computer connection is the huge selection of filters that some software packages make available as well as the excellent noise reduction that's available in software such as RxPlus. And if you want to decode SSTV, HF fax, PSK, and other digital modes then a 320D is just the ticket.

It's also interesting to have a choice between competing software control programs because moving from one to the other is literally like moving between different receivers. In that sense, when you buy a 320D, you're getting as many receivers as there are control programs.

Of course, in order to use the noise reduction or decode SSTV signals the audio from the receiver has to be processed through your computer's soundcard. This means you end up listening to the radio through the speakers for your computer, and this, in my opinion, stinks. I've tried updating my soundcard by buying a fancy one from Turtle Beach and it definitely helps, but nothing's going to sound as good as just listening to the receiver itself attached to a good external speaker. Or so it seems to me. The 320D also lacks synchronous detection, which means it's not for someone who's primarily interested in program listening.

The 320D will decode DRM broadcasts. I've never used mine for this and am not sure why anyone would. Maybe I'll try it one day, before DRM disappears, just so I can say I did it.

I guess my position is this: I wouldn't want the 320D to be my only or primary receiver, but I've had tons of fun with it and am extremely to have it. And it really is an incredible value. That this receiver costs less than an Eton E1 is just astounding to me. But that's the advantage of the "black box" approach, I guess. You don't have to pay for the big, noisy backlit display and all the little knobs that can fall off, and only pay for the stuff that counts.

The 320D is also built like a tank, and as we all know, metal beats plastic everytime.

The evidence from hundreds of thousands of listening incidents shows that there is essentially no listening outside the 10 mvm in the LA metro. KNX has zero at home or at work audience in your area (your ZIP and contiguous ones) because the signal is not good enough to please listeners.

While most receivers have some sort of AGC circuit, signals below the 10 mV/m range just don't satisfy listeners enough to get listening.

My point comes from the hard facts of actual listening. There is none. Whether a signal is receivable or not, listeners have decided it is not listenable and do not tune in.

Nobody was listening in Portland. The station was losing money. A Portland station can not make money off listening out of the metro, any more than any other station can. Economics requred trying a different format.

While KGO shows up in the Medford book with a 0.4 share, KGO has no measured listening anywhere else in Oregon or Washington. KSL shows listening nowhere but the SLC metro. So much for that lie.

If it gets listening, Arbitron reports it. If it does not, which is what the case is here, they do not.

KMUZ is licensed to a county that is within the Portland MSA. I would, therefore, expect to hear Portland area advertisers on it since it is in the Portland metro and the Portland radio market. Get it? The station is inside the Portland metro!

Reseach shows that even if AM listeners begin listening to a station, and even if they are enthralled with the programming, before they continue they will stop to find out how far away that station is from them. If it is more than 20 miles away, they will stop listening to the station and never listen to it again. They will also often boycott the stations advertisers.

Research shows that most listeners will actively stalk the staff
employees of distant AM stations and, if given half a chance, assault
them.

Steve,

I was going to ask you what you thought of the
TenTec RX-320D as a SWL Program Listeners
Receiver but You have Answered that Question.

Then again I only use AM-Sync about 5% of
the time while Listening to SW Programs.

How did you get around the RCA Jack for the
Antenna Input and what do you use as an
Antenna with it.

I just bought an adapter to solve the antenna jack problem. That's
pretty much the only thing I could do. No big deal though. As for the
antenna, I usually used a Wellbrook ALA-330S.

I don't think it woud be a bad program listening receiver by any
means, and if you don't use synchronous detection a lot then you'd
probably like it more than I do in this respect.

I have endeavored to find common ground with you on the subject of
received signal strength. There is nothing at all weak about the KNX
signal in the city of Ventura so if the demographics you pay attention
to are showing no listening then it must be for another reason. This is
a wake up call to check your assumptions.

Generally, if there is breaking news where do you think I first tune to?
You think maybe KVTA? Nope. It would be KNX at home or in the car since
they have no compulsion against broadcasting it ASAP. KVTA could have a
ball game on or other programming they don't want to interrupt.

I can't use KVTA for anything local and current like traffic on the 101.
At best I can tune to KVTA to find out old news like why am I sitting in
a traffic jam but the news is never timely enough to avoid it.

KNX does me no for traffic either since their traffic coverage does not go far enough in my direction.

The common ground is not between the two of us. There are literally tens of millions of "incidents" of listening measured by Arbitron each year. An incident is defined as a period, from start to finish, where one station is listened to for at least 5 minutes in any quarter hour.

At home and at work listening makes up 70% of all listening, and has the advantage that it is identified by ZIP code in the ratings. Looking at the non-car listening by ZIP code, it is very easy, using an Arbitron program called Map Maker, to plot the listening locations for any station that has any listening at all and to then overlay the coverage contours using as many curves as desired.

What is universally found, whether in Florida or Puerto Rico or Texas or Illinois or California or Nevada or wherever is that, on FM, 80% of listening is inside the 70 dBu curve and 15% more is inside the 64dBu curve. Only 5% is outside the 64 dBu curve, indicating that listeners do not find such a signal either easily receivable on their consumer grade radio or that the signal, if received, is not providing pleasant listening.

Similarly, on AM the bulk of listening is within the 12 mVm contour, and almost all the rest is within the 8 mV/m to 12 mV/M contour, although in some very noisy markets, like LA, the cutoff for most listening is more like 15 mV/m.

KNX gets no ratings in the area you live.

While you, as a DXer, may be more tolerant of noisy signals (I know I am), the average listener is not and that is why KNX has zilch in your area. They can "hear" it but it is not listenable.

Bill - Per Radio Canada International (RCI) :

"In late-1975, RCI adopted a new magazine format which incorporated
many of the previously separate programs into a single program.
http://www.rcinet.ca/rci/en/qui_historique_6.shtml
Among the programs which were left out of this consolidation were two
long-standing productions - the 'Radio Canada Shortwave Club' and

I am not a DXer.

Do you understand english well? What part of KNX is strong, no noise or static do you not understand? I'm not tolerating anything in the way of poor reception. Full quieting no interference on a battery operated portable indoors. Same good reception in the car.

If there is no listenership in the city of Ventura I would say it is because of the programming. Traffic reports during the prim time drive that does not cover Ventura, Oxnard, and Camarillo.

Since you live in the land of fruits and nuts, does RHF also stand for Reaming Homosexual Fairies.

By the way, even when some of the people on here do post on topic despite what differences we DO have, you still spout your horseshit psychobabbling nonsense. It's been going on for years and most people here see it. It's just that a few of us will call you out for being an asshole.

Obviously, focusing on one station is a bad practice. When you look at hundreds of staitons in many, many markets and find that nearly uniformly there is no listening where the signal is below certain parameters, one can conclude that what may be acceptable to you is not acceptable to the vast and wide radio listening public, because they seldom can be seen to exhibit the behaviour you believe they should.

Obviously, if such correlations of signal vs. listening spread across two bands and all formasts, then there is something different about what you expect from the radio, not about listening in general.

The market is named Oxnard / Ventura. The fact that all other out of market stations don't get listening outside the contours I have mentioned makes your one market / one station example irrelevant. When stations of all formats in all kinds of markets perform the same way, you can see that there is nothing format related in this analysis.

The average listener will not tune in an AM signal that is below about 10 mV/m because it does not provide enjoyable listening, irrespective of the format.

Actually, reseach spanning hundreds of thousands AM listeners over a
thiry year period shows conclusively that listeners will always make a
point of determining the distance of any station they hear from their
home. Should this distance prove to be greater than twenty miles,
listener reactions break down as follows:

(1) 15% of listeners will immediately arm themselves and set out to interrupt the station's broadcasts and kill its employees;

(2) 30% of listeners will never listen to the station again. Furthermore they will boycott all of the station's advertisers (they find out who the advertisers are by visiting the station's webpage, since they refuse to listen to the station anymore)

(3) 25% of listeners crouch down by the side of the road and rub gravel into their hair

(4) 20% of listeners develop a paranoid psychosis in which they irrationally believe that others in the home (family, friends, etc.) are listening to the offending station. Listeners suffering from this debilitating condition often stay up all night guarding the AM radios in their home. In some instances, family members have been killed.

(5) 10% clutter their homes with as many flourescent lights, dimmer switches, and other sources of RFI as possible in order to block reception of the offending station by anyone within a 50 ft radius.

I'd be tempted to put "drunken" in front of "trash". The more he drinks

Amen.

The problem is greed. Greed of both management and labor. There is a
never-ending upward spiral that happens when the unions demand more wages
because the cost of living has gone up, 'necessitating' an increase in
prices by the corporations to cover the higher wages... which of course
causes the unions to demand higher wages to meet the cost of living....

Isn't the Tentec a conventional radio that is designed for DRM, rather
than being a software defined radio. For instance, you can't turn the
tentec into a spectrum analyser.

Steve,

Well I have the Grundig Satellit 800-M Radio; Eton E1 Radio
and Icom IC-R75 Receiver all of which have AM-Sync
Detectors; plus the Kenwood R-5000 Receiver without.

My other option besides a SDR is to set-up one of the two
Kenwood R-5000 Receivers with PC Control.

David - Why Yes I Have and I Own a Few Too. ~ RHF

Plus - I even Listen to China Radio International (CRI)
on the Shortwave Radio from time-to-time.

-But- "BS" Post did not include the Words "Radio"
or "Shortwave" in it. {Yes I Word Searched It}

What "BS" Posted was a Cut-and-Paste of someone elses
writting "Made in China" - posted on August 6th, 2007
by rabach in a.. Globalization : Which itself was an
Anti-China Political Rant.

Had "BS" made some personal comments about
Made-in-China Shortwave Radios or Chinese Radios

in general : Hey then that would be somewhere
In-the-Ball-Park for this Newsgroup.

But a Cut-and-Paste 'Political Rant' is nothing more than
an In-Your-Face "Political Rant" and is Off-Topic -wrt-
the generally defined focus of the Rec.Radio.Shortwave
Newsgroup.

The Original Post by "BS" was by-design and attempt to
Get-In-Peoples-Faces as an In-Your-Face Off-Topic Post.

There are many other Newsgroups devoted to Politics
where a Political Rant like this would be both Welcome
and Debated endlessly.

those are my views and that's where i stand ~ RHF

Excellent - thank you for posting the article. Incidentally, don't
expect any help from the kosher CONservative right wingers on the
China issue. Their patriotism is limited to waving the flag at parades
and singing the national anthem. Give up their cheap made in China
crap? Not a chance because that would be substantive instead of
symbolic and actually entail a bit of sacrifice on their behalf.
Personally I've boycotted China goods for years ever since viewing a
video of Chinese animal cruelty taken by a Swiss undercover
investigative team. It can be viewed at
http://www.buyhard.fsnet.co.uk/animalcruelty.htm
Be warned it is very graphic and very disturbing.

He's seen plenty of them but he can't remember it. Senile dementia
is a terrible thing to live with.

His ongoing whining about "off topic" postings is indicative of
obsessive compulsive disorder as well. Interestingly he doesn't seem
to notice the bulk of "off topic" posts are done by his buddies in the
group.

And you don't get the fact that you being such an idiot is
the problem? There are people who could do wonders for
this newsgroup, but you aren't the one. Since you are incapable
of doing this properly, you are just part of the problem.

Getting into arguments with people is not going to fix
the problem, idiot.

You just fan the flames when you (once again) change
the subject header and call someone a fascist. You fan the
flames when you call someone a racist in the subject header.

Because then it appears like you are trying to squelch their
view point. And when it pivots on that, then you will always
lose.

Because then it appears like you are trying to squelch their
view point. And when it pivots on that, then you will always

Since you can't be consistent, all those times you jumped into
the off-topic threads is a good example, then you can't control
the newsgroup.

People are now slapping you back because of your obnoxious
behaviour.

At this point, I suspect people are starting to toss in
things just to annoy you, which is once again the reason
you are cluttering up this newsgroup with your ineptitude.

Note once again, you can't even differentiate between those
of us who don't like the off-topic junk, and those who
don't like you because you are telling them to keep out
the off topic junk.

When we despise your actions here, you have no hope in the world of accomplishing anything.

Note you can't even start a proper discussion, you have to resort to cutting and pasting, and replying to an old post or your own, complete with full quoting of three or four messages.

If you so badly want to run things, then start a "google group" yourself. That requries a dictator, and you'd fit right in. Take the village idiot with you.

I'd be tempted to put "drunken" in front of "trash". The more he drinks
the less "white" he gets.

About RHF, I tend to disagree. He (?) makes excellent posts
marred only by his mis-used sense of patriotism when he comes to
the assistance of certain low-lifes based in his country who are
demonstrating their inferiorities by making scurrilous attacks on the
intelligentsia north of the 49th. k35454.

Since I am a program listener and not a DXer I'm not willing to put up
with noise and interference.

The one example is representative of 7 stations in my list of 11. Only 4
stations are > 10mV/m.

3 to 4 mV/m is enough to drive a crystal radio for good reception.

Your assessment of the > 10mV/m signal level density puts you at odds
with what is on the V soft page for a strong signal.

I don't see a problem receiving all 11 stations on my list. The radio locator and the V soft web pages list them as strong signals. The only way you don't get them on a portable radio is to put them in the antenna null.

Very well said Michael. The self righteous jerk repeatedly turns one insignificant off topic post (one that would have been ignored by all) into a seemingly endless thread.

I hope he heeds your advice and gets a new hobby. It is doubtful though because he appears to be genuinely clueless.

Telamon,

The 'implication' of your remarks is that within 3-5 Years
you will not be an AM/MW Radio Listener at all; because
most of what you use to Listen to on the AM/MW Band
will be obscured by IBOC "HD" Radio Digital {Hash} Noise.

And you along with many more former AM/MW Radio
Listeners will find other sources of Listening Entertainment :
FM Radio; XM/Sirius Satellite Radio; Internet Web-Radio;
iPod; Shortwave Radio; etc.

THE DEATH OF AM/MW RADIO MAY BE NEAR :
The Pallbearers Names are "I" "B" "O" "C" "H" "D"

The RX-320 wasn't designed for DRM, the current "D" model has a slight modification allowing it to be used for DRM. Specifically, the 12 kHz IF was brought out to a connector. Previously, it was not.

The RX-320 is not a conventional radio. It uses a DSP for the IF signal processing and detector. It has no front panel, instead it uses a computer for the user interface.

As the IF and detector are based on software, it does qualify as an SDR.

The RX-320 could be used as a spectrum analyzer. However the controlling computer must tune to each individual frequency in the spectrum and the signal strength meter must be read. This would probably be slow.

The control interface is simple with few available commands. This makes the flexibility rather limited compared to other software defined radios. However, the radio has a rather low price.

Most of this information can be found on the Ten-Tec site.

CraigM - Thank you for your insighful comments.
Now I have more information to consider. ~ RHF

* DRM Potential via 12kHz Jack
* Basic PC Controled Black Box {Radio}
* Software Defined IF and Detector
* Not a True Spectrum Analyzer function
* Limited Control Interface
* Relatively Low Price

They mean a marketing cutoff, absolutely nothing more. Just as sigma
means nothing to him more than a "normal" range, even if what he's
attempting to ananlyze with stats doesn't conform to a normal
distribution.

Mathematics and physics have no meaning to him other than as buzzwords
to be abused for marketing.

Perhaps they are considering what used to be a listenable signal, decades ago, before computers, dimmers and all manner of devices that interfere with AM. The fact is, extensive study shows a simple fact. If a metro area AM does not have a 10 mv/m or greater signal it does not get any appreciable listening.

There is no way to argue with the fact that outside that strong contour, AMs get no significant listening. I doubt VSoft, which does software based on technical calculations, understands the nature of radio listening... in fact, I doubt they are subscribed to Arbitron, even, or, for that matter, even care.

If there is no listening, uniformly, all over the US, then there must be a common factor.

Nobody listens to them. And it is extremely rare to find listening to any under-10 mVm signal anywhere in the metro areas of the US. Period.

Actually, sigma has considerable meaning, as part of my job is running a 50
person research department doing field testing, call center research and
other such projects.

Again, just like signal strengths, once the theoretical criteria have been
met, the real world demands practical applications... programming knows it
is a waste of time trying to reach people beyond a certain contour and in
research we know that all kinds of things ranging from statistical error
ranges to sample sizes are more determined by practicality (cost) than by
theoretical perfection.

Maybe that's because you've restricted your search to toilet stalls
thus far.

For those unfamiliar with Tardo-speak, he's saying it's pointless to
try to reach people more than one toilet stall away.

Here's hoping you find a great big "sample" in the next toilet stall

I don't think you can call a DSP radio an SDR just because the filters
are implemented in a DSP. An SDR would be programmable with a new
mode simply by software update, without modifying any components.

I have two DSP radios, but only one is an SDR.

That's not to diminish the quality of the '320/'320D -- from what I've
seen (and I don't have personal experience) it is a fine radio.

I do have an early WinRadio G303i, and I have to say it is a blast to
play with. You can even run it "tailless" without the SDR component
running to use it with alternate software demodulators.

The WR was a niche-market choice. I already think I have some fine
radios, but I wanted to play with a pure SDR. It's certainly up near
the very good radios but not near the best.

If I was looking for the best bang-for-buck radio available and would
have a computer with me when I used the radio, I'd try out the '320D.

OK - Best Bang-for-the-Buck Aside.

If you had to choose the better of the two Receivers
for pure Shortwave Broadcast Program Listening :
Which one would you choose ?

[ ] TenTec RX-320D Receiver

[ ] WinRadio WR-G303e Receiver

Thanks Mohawk. Not to mention that the equally clueless greedy American consumer is the one hanging in the wind because of their support of corporate America and it's China is good policy. I'm sure they don't want the gravy train to stop either because it would mean they would have to pay American workers real WAGES and not exploit Chinese workers for 50 cents an hour. But most of the clueless jerks don't really produce anything for a living whether it be real goods and services.

Theirs is a paper society that produces nothing of value or real tangible assets. Therefore, it is much like the artificially created housing bubble that is now bursting throughout the country. Housing that is above the means of much of the working class population. Something doesn't fit when real estate is selling for not only 4 times the average workers wages but in some cases many times over that mark.

Sound economics says that a person should only spend 25 maybe 30 percent of their monthly salary on housing. Yet in some of these locales it is pushing 40 and 50 percent.

However, the great facade of the American housing boom is becoming unmasked and shown for what it is. Cheap construction, cheap labor, and shoddy practices. Slapping up houses that are inferior. Condos that won't sell because they have been artificially pumped up by speculation. But to the Republicrats thats all and good as long as they don't have to fit the bill.

As for many of the swine in this NG, I won't cast my pearls before them as some of them are truly deceitful and liars. But I am sure they will wallow in their own filth and face their own condemnation at some point.

With recent high-profile incidents involving dangerous goods imported from China, the American media has finally begun to warn consumers about the dangers of cheaply producing goods in a country hardly known for its strict safety regulations. After spending some time digging through product recall press releases, we've found that the mainstream media is still only reporting the tip of the iceberg when it comes to dangerous products imported from China. Here's a timeline we've created, which shows the huge amount of faulty/dangerous Chinese product scandals so far this year [this list will be regularly updated]:

January 2007

* Toxic Overalls: Samarra Brothers recalled Chinese-manufactured children's two-piece overall sets because the coatings on the snaps in the overalls and shirt contain excessive amounts of lead, posing a serious risk of lead poisoning and adverse health effects to young children.
* Fire Hazard Heaters: Family Dollar Stores recalled 35,000 oscillating ceramic heaters that were found to overheat and smoke, which could pose a fire hazard to consumers.
* Bad Wiring In Fans: Holmes Group recalled about 300,000 Chinese-manufactured oscillating tower fans that were found to have bad wiring that creates a fire hazard.
* Dangerous Candles: Sally Foster recalled over 46,000 sets of imported Tea Lights candles after it was reported that the candles have a clear, plastic shell that can melt or ignite, posing a fire or burn hazard to consumers.
* Dryers With Electrocution Hazard: Metropolis Beauty recalled about 18,000 Travel'N Baby Mini Hair Dryers, which were not equipped with an immersion protection plug to prevent electrocution if the hair dryer falls into water. Electric shock protection devices are required by industry standards for all electric hand-held hair dryers.
* Improperly Wired/Flammable Lamps: Hong Ten Trading recalled about 4,000 electric oil lamps that had power cords that were not correctly secured and had no strain relief on their switch housing. The switch housing was also not flame-retardant, which poses a fire hazard.

February 2007

* Overheating Remote Controls: Best Buy recalled about 10,000 Isignia DVD Player remotes after it was found that improper battery

placement in the remote could result in overheating and present a burn hazard.
* Lead Poisoning Hazard: 115,000 Claudia Jublot children’s rings, which were sold at Big Lots stores, were recalled because they contained dangerous levels of lead.
* Defective Lamps: Currey & Company of Georgia recalled about 2,600 Chinese-manufactured lamps that had defective light sockets, which could pose electrical shock and fire hazards.
* Lead Accessories: Kidsite jewelry sets, which were sold at Kmart stores across America, were recalled for containing high levels of lead.
* Toxic Jackets: Samara Brothers recalled thousands of its outwear jackets for children because the snap closures on the jackets contained excessive amounts of lead, which poses a lead poisoning hazard.
* Lead Bracelets: Imported Chinese bracelets that were sold under the “Ultra Gear” brand were recalled because they contained high levels of lead.
* Hazardous Toy Batteries: JAKKS Pacific recalled over 240,000 battery packs for toy vehicles after dozens of reports of the batteries melting or catching fire.
* Lead Rings: About 280,000 children’s Rachael Rose Kidz rings were recalled after they were found to contain high levels of lead.

March 2007

* Breakable Bike Frames: Target’s made-in-China Triax PK7 and Vertical PK7 bike frames were recalled after it was found that the frames could break rather easily, injuring anyone unlucky enough to be riding such a bike.
* Razor Blades For Kids: Tri Star International recently recalled a made-in-China children’s stationary, which contained a dangerous razor blade.
* Shocking Extension Cords: Dollar Stop Plus recalled 15-foot extension cords that had undersized wiring, and failed to connect properly at the plug and receptacle ends. This poses fire, shock and electrocution hazards to consumers.
* Lead Easels: Discount School Supply recalled Elite about 2,500 5-in-1 Easels after finding that the chalkboard side of the Chinese-manufactured easels contained high levels of lead.
* Lead Necklaces: Children’s necklaces sold at Accessories Palace were recalled because they contained high levels of lead.
* Toxic Paint: Toys R Us recalled over 128,000 Elite Operations toy sets because the paint used by the Chinese manufacturer of the toys contained high levels of lead.
* Lead Mood Necklace: About 47,000 children’s mood necklace imported from China by Rhode Island Novelty were recalled for containing high levels of lead.
* Dangerous Sconces: Home Dectorators recalled about 900 Chinese-produced wall sconces, after finding that many were missing back plates, which exposes consumers to live wires and poses a risk of

electrical shock to consumers changing the light bulb.
* Lead Paint On Baby Toys: Stuffed Fun Balls, which were sold at dollar stores and other discount stores from June 2006 until March 2007, were recalled because the paint used by the Chinese manufacturer of the baby toy contained dangerous levels of lead.

April 2007

* Poison Pet Food: Two Chinese companies intentionally exported contaminated pet food ingredients to the United States, killing hundreds of American pets that ate the food.
* Unhappy Hanukkah: Aviv Judaica Imports recalled its Chanukah Oil Candles sets after it was found that they can become engulfed in flames and melt the plastic cups holding the candles in place, allowing hot wax to leak out, which poses fire and burn hazards to consumers.
* Oil Heater Fire Hazard: Holmes Group recalled about 300,000 of its oil-filled electric heaters after discovering that a poor electrical connection within the Chinese-manufactured heaters could overheat and cause fires.
* Flaming Boomboxes: Coby Electronics recalled over 13,000 USB/MP3/CD boomboxes due to electrical problems that could cause them to overheat and catch fire.
* Collapsing Baby Seats: Infant Bouncer Seats were recalled by Oeuf LLC after reports the seats' metal frame breaking.
* Flammable Baby Clothes: Disney Stores recalled its Baby Einstein Caterpillar Sleepwear and Baby Einstein Duck Sleepwear because of a failure to meet the children's flammability standard, posing a risk of burn injury to children.
* Hazardous Candles: McCormick Distilling Company recalled 60,000 Tequila Rose Strawberry Cream candle sets after finding that the martini glass containing the gel candle can break while the candle is burning, posing fire and burn hazards to consumers.
* Lead Bracelets: A&A Global Industries issued a recall for about 4 million of its Children's Groovy Grabber Bracelets, which were painted with paint that contained high levels of lead.
* Lead Key Chains: Dollar General Merchandising recalled about 400,000 Chinese-manufactured Keychains because they contained high levels of lead.
* Shocking Palm Trees: iObjectSolutions Inc. of Georgia's Chinese-made Pre-lit Palm Trees was found to have electrical problems with its lighting system, which could cause fires or electric shocks.
* Unguarded Blades: Sears warned customers to remove the "Craftsman" logo label from their Chinese-made Craftsman Circular Saws, after it was found that the label could become partially detached, leading to exposure of the saw blade and injury to those operating the saw.

May 2007

* Toxic Fish: It is believed that imported Chinese monkfish was actually deadly puffer fish, a labeling disaster that lead to the hospitalization of at least one person in America.
* Tween's Lead Jewerly: Tween Brands Inc. of New York recalled a set of Chinese-manufactured metal jewelry for children that jewelry contained high levels of lead, which can cause adverse health effects and is toxic if ingested by young children.
* Toxic Drums: The Boyds Collection of Pennsylvania recalled its "Eli's Small Drums and Liberty's Large Drums" when it was found that the paint used by its Chinese manufacturer contained dangerous levels of lead.
* Children's Rings: Cardinal Distributing Company of Maryland recalled its "Children's Turquoise Rings" for containing dangerous levels of lead.
* More Lead Jewelry: Spandrel Sales and Marketing of Arizona recalled 200,000 children's necklaces, bracelets and rings because they contained dangerous levels of lead.
* Collapsing Stools: Cracker Barrel Old Country Store recalled over 2,000 Chinese-manufactured kitchen stools, which had been found to unexpectedly collapse during use.
* Lead Bamboo: Anima Bamboo Collection Games, manufactured by HaPe International Ltd., of Ningbo, China, were recalled when the toys in game sets were found to contain lead paint.
* Hazardous Grills: Grills produced in China by Sagittarius Sporting Goods were recalled after many were found to be missing a hose that connects the grill manifold to its side burner, posing a risk of fires and burn injuries to customers.
* Toxic Jesus Fish: Oriental Trading Company of Nebraska recalled over 130,000 religious fish necklaces for children, which had been found to contain high levels of lead.
* Hazardous Candles: Vivre Royal was forced to recall a set of Chinese-produced candles when it came to light that their exterior coating and decorations were highly flammable.

June 2007

* Kerosene Eyeballs: Gemmy Industries recalled several hundred plastic "Floating Eyeballs" because they contained kerosene, which if broken, presents a chemical hazard to children.
* Deadly Tires: Tire importer Foreign Tire Sales, based in Union, N.J., recalled as many as 450,000 tires after it was reported that the treads on light-truck radials manufactured by Hangzhou Zhongce Rubber Co. in Hangzhou, China, were shoddily manufactured and could separate. Several traffic deaths have been blamed on such tires.
* Tainted Seafood: The FDA detained imports of three types of Chinese fish — catfish, basa and dace — as well as shrimp and eel after repeated testing turned up contamination with drugs unapproved in the United States for use in farmed seafood.
* Toxic Thomas the Tank Engine Toys: American toy company RC2 was forced to recall a series of wooden toys based on the popular children's show after it was revealed that they were painted with dangerously toxic paint.

* Lead Earrings: Accessoriesã*ƒ*»Silver Stud Earring Sets, jewelry for kids that was sold in Kmart stores across America, were recalled after being found to contain dangerous levels of lead.
* Deadly Cribs: American company Simplicity Inc. recently found that the directions for its made-in-China Nursery-In-A-Box crib had been improperly produced. If followed, the Chinese-made directions could cause the crip to come apart and trap/injure babies.
* Poisonous Toothpaste: The FDA recently found that several low-priced toothpastes imported from China contained diethylene glycol, which poisons the liver and kidneys and depresses the central nervous system.
* Lead Necklaces: Geocentral's Butterfly Necklaces for kids were recalled when it was found that the metal clasps on the necklaces contained dangerous levels of lead.
* Unexpected Shattering: Pier 1 Imports recalled over 200,000 Chinese-made glassware pieces after it was found that they can crack or break unexpectedly, posing a laceration hazard to consumers.
* Collapsing Recliners: Rockingham Deluxe Lounge Chairs, imported from China by Rockingham Deluxe Lounge Chairs, were recalled because the chairs can collapse or fall backward due to faulty support brackets or weak frames, posing fall and severe laceration hazards to consumers.

July 2007

* Dangerously Crappy Hammocks: A free-standing hammock manufactured by the Chinese company Danlong Industries has been found to break quite easily, sending anyone unlucky enough to be resting in the hammock to the ground. Several people have reported injuries.
* "Essential" Lead Jewelry: Future Industries of New Jersey recalled their "Essentials for kids" jewelry product line after the Chinese-manufactured jewelry was found to contain dangerous levels of lead.

P.S. I wonder if the clueless ass kissers have ever realized who is going to
pay their Social Security, government benefits, and salaries once much of
the rest of the productive economy is in Red China. I hope they don't expect

much out of the 20s and 30 somethings in this country being economically impoverished by confiscatory taxation, debt servicing, and the loss of productive jobs that create wealth and material prosperity. For some reason, the jobs at most service industry occupations aren't doing that. Which explains why we are in hock up to our eyeballs to Red China and they service our foreign debt as does the Japanese.

Not to mention who is going to finance these decrepit bridges and infrastructure in the US. Or the fact that the overfed idiots in California have to go through electricity blackouts every summer because they can't produce enough electricity for the growing population of illegal immigrants and current residents in CA.

As anyone with a right mind would expect their labor to meet their basic
expenses, thats probably a pretty intelligent thing to do. But most
Americans miss the point when their government prints more money than what
is truly created in the productive economy. Which leads to inflation. Just
like we are currently experiencing in the price rises of foodstuffs and
commodities. While the mass majority of the working population is making
less per year income wise than and with inflation factored in.

Make sure to attack the messenger next time. Although your comments ring hollow as you have little substantive to say other than rehashing the same stupid questions and stupidity you express in most of your posts.

Roadie,

FYI - The Winning Bid was $629 by W4EKU - Who
also had one higher bId that did not get exceeded.

Interestingly enough the prior Auction Listing for
this Kenwood R-5000 Receiver closed at $610
with NO Sale.

And you had to quote a whopping 297 lines of the post you
were replying to in order to add two lines?

And those two lines had nothing of value?

THis is your problem. YOu can't grasp that this is a social
space, admittedly a different social space, and there are
community standards.

One of them is to not quote a previous message in total.
You edit the quote, so there is a bit of context for your
reply. Leaving in all the previous message is generally
as bad as not leaving in any quoting.

Another community standard is that you never post a message
that has more old material than new. So if you actually
had something valuable to add, and it went far longer than
300 lines, then maybe it would be appropriate to leave in
all 297 lines. Though even then, that's debatable.

And another community standard is that you don't reply
merely to say "me too".

And that's basically what you are doing, just like the village
idiot. You aren't posting to add anything of value, you
are posting replies to tell someone "it's not shortwave". You
also seem to be posting merely to run up your count, since even
when you aren't playing dictator, I notice a bunch of message
lately, yes I am paying attention because you are a vermin that
can no longer be ignored, it is of a "me to" nature.

Don't post if you can't reduce what you are quoting.
Don't post if you have nothing of real value to say.

Interestingly that Coby CD boombox was mentioned in that post.

"Only" 59 lines of quoting that time, but then, you have no control over the fact that the message you replied to was short.

Maybe if you spent more time listening to the radio, you wouldn't feel compelled to post here so much.

I would remind you that you thought nothing of when people posted about dog food and famous people dying, and when I slapped them, I pointed out that if they were listening to the radio, they'd already know these things. But you encouraged that off topic junk, when you said "simply preface subject headers with "OT"".

To answer your question. I have a whole slew of SW radios anything from an Eton to Grundig to Sangean. Couple FRG-100, a Drake R8B, and a whole load of other radio equipment to the amateur side of this hobby. In fact, I am talking right now on 20 meters as I write this.

When completed, the highway will run from Mexico City to Toronto, slicing through the U.S. heartland like a dagger sunk into a heifer at the loins and pulled clean to the throat. It will be four football fields wide, an expansive gully of concrete, noise and exhaust, swelled with cars, trucks, trains and pipelines carrying water, wires and God knows what else. Through towns large and small it will run, plowing under family farms, subdevelopments, acres of wilderness. Equipped with high-tech electronic customs monitors, freight from China, offloaded into nonunionized Mexican ports, will travel north, crossing the border with nary a speed bump, bound for Kansas City, where the cheap goods manufactured in booming Far East factories will embark on the final leg of their journey into the nation's Wal-Marts.

And this NAFTA Superhighway, as it is called, is just the beginning, the first stage of a long, silent coup aimed at supplanting the sovereign United States with a multinational North American Union.

Labor Day weekend "your" government opened the highways American taxpayers paid for to Mexican trucks driven by Mexicans. A move that will eliminate the jobs of millions of truck drivers and slash the wages of those who still have a one.

Labor Day weekend of all days. Yet another in your face move by the globalists. But you can't be bothered with all that can you, not with ball games to be watched and beer to be gulped.

Anyway, you got yours right? Social Security checks indexed for inflation, free medicare, etc. Life is real good for you.

So fuck the next generation. *BELCH*

Thanks for the warning. Do you know what sort of plastic the connectors had? The connectors I usually deal with are made with phenolics which are resistant to most common chemicals. I'm not aware of any complaints posted at rec.radio.antique+phono either.

What did you dilute the stuff with?

I have no idea what the development and trademark costs of DeOxit were, but I know Caig is free to sell their product for whatever price they can get. And Caig is doing the sensible thing in protecting their trademark.

Just consider how much Bayer lost when they didn't protect the Aspirin name!

Thanks for the pointer. I've got one in the same condition (purchased new at end of run, upgraded by Kiwa, never used) except I've only had it out of the box twice, once after I got it back from Craig and once a year ago to see that it was okay and stored without batteries.

I'm curious to see what this one sells for.

It closed at no sale because of the reserve. I'm truly puzzled at the attention given the VHF converter. Not that it isn't a good quality unit, but that the coverage is so incredibly limited.

Equally odd is pricing for the so-called Stereo Kenwood receiver.

As a long-time R5000 owner I'm glad to see these prices.

Had some tasty beer from Dogfish Head brewery this weekend too. The
IPA 90 and Raison d' Etre are a good way to wind up a summer season.

It is still a nice radio that at one time was the benchmark for a high
performing feature laden portable radio. If I was in the market for a
full sized portable the Eton E1 would probably get the nod.

Phenolics are much better, except if they get a stress fracture, then
they can obsorb any liquid and crack. I had some old style phone
relays that was washed with a cleaner that had alcohol in it, the
phenolics somehow obsorbed the fluid (alcohol) and it did not
evaporate - the phenolic actually became conductive - my only
explaination was that the alcohol (which is polar) became trapped in
the phenolic.
My connectors, I think were AR or Monster style. I have used some hi-

end stuff that had a clear coating on them (think they were made in Germany) and they cracked from the oleic within a few hours - actually broke apart. Luckily I found out sooner rather than later. So I will stick to using Deoxit, it has gotten me out of so many jams and always seems to amaze me. One of my office techs was having a heck of a time with one of our office computers recently, until finally he treated the video card edge connector with DeoxIt GOLD and has worked flawlessly ever since - and without cracking and killing the patient, :-)
Also was thinking about people giving Caig Labs are hard time about protecting their investment - If I was to copy (use) your name and SS# and claimed it was mine, used it in commerce or solicitations, would you get upset? Duh!

Enjoy, Mike

I'm hearing some very interesting rumors about iBiquity, the company behind terrestrial radio's savior technology HD Radio (just a little refresher, the "HD" doesn't actually stand for "high definition" - funny huh?). Word has it that iBiquity is experiencing so much financial mayhem that they've stopped all projects, both current and future, and are regrouping or possibily worse.

Look, I'm all for competition and all, but with a phenominal tag line like "are you deaf yet?" (listen to campaign spots here and here) who wouldn't bet all their chips on this technology?
Thanks Hurricane Ben!

See, I disagree with that. While I hear your objections, and have heard them before, often at the top of someone's lungs, I've been personally involved in too many meetings where we did, as a radio station, sell directly to an agency, and we did change the parameters of a buy. I"m not saying its easy, but it IS possible. And it does bear fruit...both for the end client and the station, which means it also bears fruit for the agency.

I understand that agencies are too important to get their hands dirty with Radio. They're agencies. Radio is...well, the home of disk jockeys...and perceptually, that's not a positive. One of the many reasons that agencies do the things they do is to throw up walls between themselves and media so that the agency can call the shots. And they're notoriously intractable. And they don't care about anybody's rules. At the Chicago Addy's Leo Burnett used to submit their national McDonald's spots in the local station promo category, where they clearly did not belong. The swept the category.

When threatened with having their submissions denied, in favor of more appropriate categories, there were some behind the scenes conversations in which the word 'budget' was used.

Burnett continued to do things their way unmolested.

I have a clear understanding of what you're saying.

However....if you want to get beyond those walls, you have to find a creative way around them. You can't assault them directly.

We had meetings all over the market with other stations, both in the group and out, and we compared notes. Then I was called into meetings with the local sales mangler to hammer out a strategy. It started with the next cattle call, in which stations were gathered to present their best and most compelling reasons for being on the buy. After more than an hour and a half of statistics, demographics, charts, audio demos, and whatever these stations could bring, our Sales Mangler was up. Without moving from his chair, he tossed out on the table colored 3 X 5 cards with words in block letters on them (I think it was Albertus Bold, actually...one of my personal favorites). Words like "Passion For Excellence." "Personal Power." "Love of Product." "Love of Listeners."

As he tossed out the cards, he said, "These are the things we believe in. We believe in..." out came the card that said 'Results,'

"Results. But above everything else, we believe in no limitations. No obstacles."

And as he tossed out his last card, he looked around the table and said, 'And I'll remind everyone here, that it was our Production Director who singlehandedly stole from everyone in this room, and serviced all by himself, the Omni Superstore account."

They looked at him like he had nine heads. The rep from the agency who'd made the cattle call, said 'What are you from Mars?"

At which point the Sales Mangler got up, said, "call me when you're ready to make some REAL money." And left, to return to the office.

We laughed about that at the station for two days. Until the phone rang, and the agency wanted to talk.

We got on their buys. Through ups and downs, through manglement changes, PD changes, music changes, and severe ratings slumps. And we stayed on the buy.

When the station hit #1, it was converting at 200%+ Sometimes dramatically higher than that. And almost always including demos NOT requested by the agencies.

But it all started with that surreal moment in the conference room of one of the handful of international agencies in Chicago.

We didn't assault the wall directly. That would have been as you say, futile. What we did was the equivalent of whacking the mule in the head with a 2 X 4...we got it's attention. And from there, we made our own pitch.

And we changed the way radio was bought. At least on a limited scale. But it was a start.

When I stole the Omni Superstore account, I did it against the top agencies in town, including the multinationals, AND the in-house agency at Dominick's, which owned Omni. But I got it. Me. Single handedly. With a single spot written in 20 minutes and produced in 10 at the Radio station. And the reason I got the deal and the agencies didn't, is that I was the ONLY one who had ever been in the store. And when I talked to Gary Benson, who was building the franchise, I was the only one who understand what it was he was trying to build. Because I'd been there. And all the figures, all the hundreds of thousands of dollars spent on demos, including having the London Symphony record a jingle, meant nothing. I'd demonstrated that I could produce the result he was looking for.

Getting a client's attention, getting an agency's attention, like getting the attention of a Radio station General Mangler, is often no more difficult than being different enough that you go around the wall.

That's why I say, if your pitch isn't producing results, change your pitch.

In the agency context, that means how you deal with, build relationships with, and how you approach the agency.

In a similar, and related, context, if a spot isn't producing results with 55+, change the pitch. You CAN sell to higher demos. And I understand that lower demos are easier, and less costly to assault. But the higher demos have more ready cash, and they do spend it. Convincing them may require a different effort. May require more of it....but if once you break through, you've tapped into a gold mine. Getting over that hump may require more effort, but once tapped, that reserve of cash comes with new loyalties, and new willingness to do business.

I understand you can't sell 55+ the way you sell 18-34. I'm not disuputing that at all. So you don't. But you don't just give up. We buy. Often the same things. But more often than not, bigger ticket items. You change the pitch. You find a way to sell us that does work. If you're unwilling to do that, we'll take our money and spend it with someone who will. But with an aging population, and declining birth rates, it's something you may wish to consider.

Immutable Law of Marketing says if you get there second, you'll only pick up the scraps.

> Add to that the fact that radio stations, save a few in very large markets,

I understand exactly what you're saying. But my own experience,
again, says that there are ways of getting beyond that wall. Sometimes
it's a matter of building a relationship with someone at the rep firm.
Sometimes, it's a matter of something so absurd that it gets attention.

You're aware of the Wal-Mart story. Sam Walton asked his stores
to give him a 20% increase in profits. 20% increase in a single year at
discount Retail was, at the time, considered impossible. Millions of
dollars in consumer buying research said so.

So, he vowed to do a hula in a grass skirt on Wall Street if his
stores produced a 20% increase in a single year.

They did. He did. And the story has passed into legend.

'Can't be done' is a state of mind. I do understand how difficult
it can be to get somethings done. How difficult it can be to create new
avenues. How difficult it can be to break through walls created
specifically to keep you at bay. But my whole career has been spent
cutting wormholes through 'it can't be done.' I know better.

I know there is a way. Finding it is one challenge. Doing it is
another.

I disagree, here, David. I've been involved. I've seen it done.
I"ve helped do it. And not only in Chicago.

It's not easy. And not every effort is successful. But it can be
done. And it's done every day.

Once again, research is a snapshot of conditions as they exist
pertinent to an array of assumptions. Assumptions that are
scientifically arrived at, perhaps, but assumptions nonetheless. And
assumptions take on an axiomatic inviolability that is accepted as law
within the context of research. However, these assumptions are based on
an average of characteristics applied to individuals, and narrowed
statistically, ignoring wider, and broader variations in human
behaviour, tastes, beliefs, politics and understanding...and a hundred
others.
It's a pretty specific and scientifically arrived at snapshot.
But it's only a snapshot. And like photographs in Life, it's only a
picture of a moment. A product of a myriad of influences that are not
seen, and are not measured in favor of the more easily arrived at
characteristics.

These snapshots are then applied to understand the actions of
the target class and infer the motivations of that class implied by
their actions. This is where the assupmtions get very obvious. Because
no one may know what's in another's heart. What motivates one to take an
action is deeply personal and influenced by things that may not be seen
or measured by research.

Take an example. AM talk formats experience a younger demo
ratings spike after moving to FM. The assumption is that they're
listening now because of the improved audio quality. Which may be true.
Which is likely true. But it's not the only reason.

The new format may be where there was an older, less successful
station, but with some credible ratings. Suddenly there's a new station
there.

Sampling without effort. Some loyalty to the old station.
Hearing something they'd not heard before and enjoying it. Something
they would not have considered listening to but now, enjoy because it's
now where all the with-it listeners are listening. Sampling because
promotion directed their attention, supported by their friends. Hundreds
of reasons.

Whatever they may be, most of them will be based in the
fundaments of FM audio. But that single issue may not be their
motivation. It may be at their core of motivation, in this instance. But
it may not be what moves them to listen.

Research would see this, and infer that if the station on the AM were to sound better that it would move these listeners to sample the station on the AM band.

False assumption leads to an incorrect inference. The improved audio quality, the static free listening, the new content....whatever they enjoy, is already where they are listening. It's where their radios already are. It's where, for more than a generation, they've been conditioned to listen, because AM is history. It's where bad sound and archaic formats, and their father's Oldsmobile has been tuned for decades.

You talk about being Oldsmobiled? Who listens to AM? The same people who didn't buy an Alero, even though it was a cleaner, more stylsh line, with better performance and more comprehensive features. Those same people are not listening to AM because it's AM. They didn't buy an Alero precisely because it was an Oldsmobile. And this has been true of Oldsmobile since the 50's. The same people that didn't buy Oldsmobiles, bought comparable Pontiacs, Chevrolets. They also bought Buicks. They wouldn't even consider an Oldsmobile. Even though it was often a better designed, better built version of the same platform, they chose the equivalent models in other brands. For more money. For less money. But always not buying the Oldsmobile.

Changing the Oldsmobile to look like the Pontiac, Buick or Chevrolet, would not influence the buy. In 1956 Buicks and Oldsmobiles were identical mechanically, and nearly identical cosmetically (thank God I went to the car shows all weekend, eh?) but the same person who bought the Buick wouldn't consider the Oldsmobile. For any reason. Because it was an Oldsmobile.

Similarly to the analogy of AM radio, there was a time Oldsmobile was a giant. But those that bought were not willing to consider another brand. Likewise, non-Olds buyers would not consider an Oldsmobile.

What motivated buyers to buy or not to buy? That is the question. Research could say it was style, mechanicals, price, even the name itself. But it cannot KNOW what really motivates an individual to do anything. It can only infer, based on an array of assumptions applied to a snapshot. And like a photograph, what's out of the reach of the lens is entirely unknown. May only be assumed. But what's out of the reach of the lens most profoundly influences the nature of that within the frame.

Research infers that younger demos will listen to AM if the audio were clearer. Perhaps. But will they sample it? Honestly sample it? Probably not. "Why" is individually determined, and out of the reach of the research snapshot. But the ones who will not listen to AM now, will not listen, simply because you improve the audio (debatable given IBOC performance I've experienced). It's their father's radio. It's unhip. It's bad sound. Whatever the reason, there's nothing that will get them to sample AM.

Now, your argument that with a bandplan change and side by
side AM/FM sampling will be easier, and often unavoidable...Even less
likely they'll move to AM...And even if the FCC mandates a continuous
bandplan for broadcast, they'll still not sample AM because side by side
with FM, even AM HD still sounds less robust, less clean, with more
artifacts, and more reception anomalies.

The research snapshot may suggest and assume a lot of things.
But it's actively in denial of the big Oldsmobile logo stamped across AM
radio.

The point is exactly about income. It's about sales,
accessing the disposable income of those who have the most of it. If
it's too much work to access that well of disposable cash, then when the
free cash you're scooping up off the ground starts to run thin, where do
you turn for sales?

More importantly, you don't want to be telling the Boomer
generation that they're easily ignored because their inconvenient to
serve. Don't do us any favors.

If your pitch doesn't work, change the pitch. You keep
saying what can't be done. Look at possibilities. There's nothing that
can't be done. These things are done every day.

Radio stations pitch clients every day. Every day. That's
what the Sales staff is for. If a station ONLY accepts agency buys, you
telling me you have no Sales staff.

If we have contact,
> it is when working with the marketing department after the sale on a

So you have said. And yet, you seem unwilling to find the
way to build the relationship that would circumvent that wall between
Radio and the client. And yet, I've seen it done, effectively, most of
my career.

Every Day.

That's where your superiour knowledge and experience comes
in. Accepting 'can't' because someone waving a check has said it, isn't
Leadership. It isn't even Management.

Nothing is 'can't.' There are always possibilities. It's
your job as Manglement and Sales to make that pitch. Accepting the
snapshot only guarantees that you'll live within the confines of the
snapshot. The future is finding what's outside the frame.

So, you're in this for the quick kill. And the listeners be
damned? That doesn't sound like someone who's dedicated his life to the
business. In this country or others.

Radio as it exists today, is only for today. A future will
be in embracing possibilities instead of seeing only obstacles.

Embracing possibilities happens every day.

Stan Freberg demonstrated three decades ago that you can
sell anything on radio. It's the most visual of electronic media.

Trying new things isn't tilting windmills. Accepting
'can't' on it's face, however, can make it seem that way.

My own experience is directly contrary to this. Radio
stations present to agencies every day. The ones that get on the buys
most consistently create relationships with agencies that transcend the
walls erected to separate them.

Nothing is engraved in stone, unless you accept that it is.
Again, I've seen radio stations influence buys every day.

Mel Karmazin said, and repeatedly, I might add, that
revenues are commonly linked to ratings. They're not. A station can
always outperform it's ratings. Always. And it does so through high
expectations, and retaining control of it's inventory, And by believing

in possibilities instead of obstacles.

The hallmark of a salesperson is the ability to overcome
objections. To overcome obstacles. Accepting the futility of an agency
policy isn't part of that.

That's how Karmazin stations overperformed their ratings,
their markets and converted at 200% and higher.

Living in the Third Circle doesn't get you there.

Accepting 'can't' produces no results. And in an ever
competitive marketplace where there is, after all, only a 100 revenue
share, results matter. Possibilities produce results.

Correction....you BELIEVE there's no money from agenices
for 55+. You just haven't found a way to tap it, yet. Because you accept
that you can't try.

So nobody

No, these are perceptions. You've been told this can't be
done. I've seen it not only done, but done every day.

Such as the buying service issue. Such as most

Again, perceptions. If you accept them, they become what
you believe to be realities. They do not become realities themselves. If
you're not succeeding at selling this, then change you pitch.

No one's denying that there are more desirable demos. But
to claim that the desireable demos are the only demos is nonsense. Dare
I say, unmotivated.

Just more of blind patriotism or more likely blind stupidity. Laughable that anyone from the US would even bad mouth Canada. Especially when Canada has a quality of life much similar to the US if not better in several key indicators. Plus much less bottom feeder trash than exists in Western Michigan.

Better watch it RF, the newsgroup Douchebag and his associates are wanting to censor what you posted. It's not about shortwave but remember that RHF and Dx Douche will be trying to run you off. However, I'm not going anywhere.

Hi guys, Long time no talk.
I hope all is well. I haven't been following this HD radio subject
so I have a question about it.
Will I still be able to pick up the same stations with my old analog radios
if they go HD?

Hi again

So long as the stations aren't too far away, but expect to hear a lot

Hi Steve.

So all my 11 analog radios are now "junk"? Will we now be "forced" to buy a HD radio and the price of even the best analog equipment not sell as high as they used to? Analog is soon to be dead??

Oh I don't know about that. For one thing, I don't think HD AM is
going to be around for too long. I suspect it'll go the way of AM
stereo, so you might just have to wait it out.

Lucky - If your are 'lucky' Yes.

[Where you Live and Listen and the Distance
to each AM/MW Radio Station's Transmitter
is important.]

AM/MW "HD" RADIO :
But may be not -if- what you like to Listen to the
AM/MW Radio is beyond the 10mv/m Contour.

Example : KSFO-AM 560 kHz in the SF Bay Area
http://www.radio-locator.com/cgi-bin/finder?call=KSFO&sr=Y&s=C
Predicted daytime coverage area for KSFO 560 AM, San Francisco, CA
http://www.radio-locator.com/cgi-bin/pat?call=KSFO&service=AM&status=L&hours=D
* Prior to "HD" AM/MW Radio you could generally hear
Analog KSFO out to the Purple Line {Distant Zone}
* Now with "HD" AM/MW Radio you will most likely only be
able to hear Analog KSFO out to the Red Line {Local Zone}
- - - Within the 10mv/m Contour.

THE BIG DIFFERENCE IN AM/MW RADIO WILL BE AT
NIGHT FOR THE MOST PART DXING WILL BE GONE.
Predicted Nighttime* coverage area for KSFO 560 AM, San Francisco, CA
http://www.radio-locator.com/cgi-bin/pat?call=KSFO&service=AM&status=L&hours=N
* Prior to "HD" AM/MW Radio you could generally
hear Analog KSFO at Night out to the Purple Line
{Distant Zone} and Beyond into "The DX Zone" . . .
* Now with "HD" AM/MW Radio you will most likely
only be able to hear Analog KSFO at Night out to
the Red Line {Local Zone}
* No More "DX" AM/MW Radio at Night.

RESULT - AM/MW "HD" Radio will make all {both
Analog and Digital} AM/MW Radio Listening 'local'.
- - - Especially at Night.

FM "HD" RADIO :
-WRT- FM "HD" Radio for the most part Analog FM Radio
has always been a 'local' Broadcast Media : So unless
you live on the Fringes of the FM Analog or Digital Signal
you will still hear all {both Analog and Digital} the FM Radio
Stations that you hear now.

Example : KQED-FM 88.5 MHz in the SF Bay Area
http://www.radio-locator.com/cgi-bin/finder?call=KQED&sr=Y&s=C
Predicted coverage area for KQED 88.5 FM, San Francisco, CA
http://www.radio-locator.com/cgi-bin/pat?call=KQED&service=FM&status=L&hours=U
* Prior to "HD" FW Radio you could generally hear
Analog KQED out to the Purple Line {Distant Zone}
* Now with "HD" FW Radio you will most likely only be
able to hear Analog KQED out to the Red Line {Local Zone}
- - - Within the 60 dBu Contour
http://www.fcc.gov/fcc-bin/FMTV-service-area?x=FM257373.html

Rather than posting messages with vague unsupported claims why don't
you give us the details. Where did you read the rumors, who wrote
them and most importantly what specifically was written (or spoken).

Here read through my blog:

http://hdradiofarce.blogspot.com/

HD Radio is nothing but a farce and the HD channels are only 1% the
power-levels of the analog channels. Besides, you can listen on-line
for free at clearchannelmusic.com./hdradio, but try slacker.com,
instead.

I have Posted arond 524 Shortwave Related Messages about
SWL News and Information; including Shortwave Antennas.

Plus, I have Posted many useful and informative replies
to Questions about Shortwave Radios and Listening by
others here too.

While BS, you seem only to Post and Reply to cause
Hate and Discontent and have post nothing related to

- HD Radio is nothing but a farce and the HD channels
- are only 1% the power-levels of the analog channels.

The FCC setting the HD Digital Signal Level at 1%
of the the Analog Radio's ERP Power Output is the
one clear problem that I have experienced living here
beyond the AM/MW 10 mv/m and FM 60 dBu Contours.

All I see is the Blinking Blue Light and hear Digital Hash.

I don't think this will work.
He used radio frequency to break up water and then the hydrogen burns
up to turn back into water.
Sounds like he is going in circle. No net energy should come from
this. What maybe beneficial is producing hydrogen using sea water
instead of natural gas like what is currently done.

The cunundrum or Catch 22 is that any station that tries to program for
older demos starts off with no advertising opportunities except local direct
and a few local agencies that are willing to look for some different
solutions. The agency business that makes or breaks stations in larger
metros will, if anything is possible, take years to work on.
>
> I understand that agencies are too important to get their hands dirty

The big reason is that agencies make money on creative and that means print
and TV production, not on radio spots. In addition, radio is costly to buy
and that means that a buying service is often employed... and that is where
no changes in media specs ever happen.

But you are addressing creative. The creative is a joint deal with the
client, where the agency does have considerable leeway.
The demos, though, come from the client in most cases. Or are worked out
with the agency as part of designing the campaign.

In this case, you were close enough to effect format acceptance. Try that
with demos, though.

As long as you had enough in demo numbers to justify the buy, the agency is happy. Agencies routinely buy news / talk, but they get a price that is only for the 25-54 component, and meets the CPP goals. It does not matter that there may be more 55+... they just want to come in at a price they set for the demo.

That was a fortunate and unusual occurance. Most agency business comes from out of town agencies, visited by the station reps. occasionally, the station GSM or GM will go on calls in each market, but generally they meet with the media director at the highest level. The media director has very little demo changing power.

Again, agency accounts (the clients) have done cost of sale evaluations and the main reason they don't buy is the conversion cost. THis is why 18-34 is so important. This is why our group is so excited about being the number one TV net 18-34 in the last Nielsens... that is where the money is... where brand preferences are formed.

As I said, in my case it does little good. I've been talking in generalizations for all stationns in all markets, mostly. But for Hispanic, 18-34 and 18-49 are THE demos as this sector is not ageing and, in fact, has only small population numbers in the over 50 demos.... not enough for a dedicated 40+ radio station to get any kind of salable numbers.

Absurd works. Years ago, a major textile company had a sign in the
President's office: "It it's about advertising, I am not in." I went to a
hardware store and bought one of those mini doors that lock companies use to
show off knobs and locks. I had "what does it take to open your door" and
our group logo stenciled on it, and sent it by messenger. The next day, I
got a call, an appointment and a sale.

The real issue is that access to clients is dangerous... many agencies view
it as betrayal, and it costs you. And so many clients are in cities you can
not afford to travel to all the time.
> I disagree, here, David. I've been involved. I've seen it done. I"ve

Nice if you are in a city where many clients are also located. But
impractical... the real solution is to have groups like the RAB or an ad hoc
group of stations catering to 50 and over do a conserted effort. Most
agencies will not look at one ageing station in one market. Those stations,
particularly oldies, news talk, etc., should do this. But I see no evidence
that they ever do.

Research today is often based on actual observance of families, in the home,
like reality shows. Qustions are asked at the end about why certain things
were done, such as purchases, menu decisions, etc. It is very in depth and
very expensive. But when companies combine this data with sales data, they
spot the correlations and that is how they develop marketing plans for many
consumer products.

The in-homes overcome most of these objections.

In most cases we are looking at, it's the same station moved to FM... like KTAR in Phoenix or the KSL situation in SLC or WTOP in DC... or small markets like WNLS in Talahassee. First book, the 35-54 show up. Neever had them before, and then they stay. No format change, no competitive influence.

But it was an Olds. The brand had an image of being "the last car you will ever buy." It was one step away from a hearse. But the Olds was a good car, as good as many American cars. AM sounds crappy, and did way before NRSC and such. Whether we blame the receiver manufacturers or the change to FM does not matter. When the same listeners like the same programming on FM, but shun it on AM, it means the band is old, decrepit and it sounds bad.

This is the hope of some that promote HD for AM. It is a last-ditch effort.... I encourage it, because all HD radios will have AM as well and there is a chance that some decent signal AMs may slow down the erosion.
>

Actually, 55+ includes, mostly, retired people. And that is where you see the scary figures on how many people live only on social security, and about a million have moved to Mexico because they can not afford to live in the US. Look at income figures overall for 55+ and only a small percentage have any significant savings. And most have very little discretionary income.

Direct sellers pitch the client. But most direct money is at lower rastes
and with higher maintenance. Agency accounts are serviced more than they are
sold. But the money is worth it.

I had three sellers for the top billing station in market #13. We tried
direct sales, but we got mostly no pay and slow pay and low rates. The
clients with money went to agencies. We led the market in revenues and power
ratio, because we did not spend on lost causes.

Again, this is for someone else to do. We don't have a 55+ population to
serve, and the average age of our sector is in the mid to low 20's. So we
have to deal with getting 18-24 on the general market agency buys, because
we have no 55+ to offer.

I think that is true Urban Legend. Appetite appeal is so critical to come
campaigns that radio, if use, supports recall at POP, not sales.

Stations that outperform give a specific desirable demo with little
spillage, like all sports. They get the power ratios that are close to 1:1.
CHR gets 0.7 or 0.8 to one because advertisers don't want the teens. And so
on.

I am pretty sure that in 15 years, WDUV has tried every technique
immaginable. None have worked so far.

Right. Clear is cash flowing in a significant manner, and they feel the
market undervalues them. That is why they are going private.

iBiquity is private for the same reason many companies want to stay private:
they do not want to live the quarterly harassment of earnings reports,
Sarbox, and running the business to please Wall Street. It allows more long
range planning, and less knee jerking to the street.

I don't know, having never used the '320D. The G303 is a great little receiver. Its UI is wonderful. The downside is you have to have a virtual soundcard mixer to bring the audio out to a recording program, a problem you won't have with the '320D.

There are multiple UIs for the '320D, *and* the G303 UI will run on a computer without the radio installed in "demo" mode. That may be a big deciding factor.

As for noise... the internal PCI card that is the G303i is extremely well shielded and I have absolutely no problems whatsoever with computer noise. If you still need/want the radio far away, that's possible with both the external G303 and the 320D.

Oh, the G303 is heavily dependent on the quality of your soundcard(s) and speakers. Mine are pretty good, so a strong signal can be a real pleasure to listen to.

"HD Hypocrisy"

"Here's a few more reasons why only iBiquity and a few clueless radio group heads could make a big thing out of HD radio tagging... The very damn radio stations that broadcast in HD offer no programming worth listening to. HD Radio is a virtual sewer of formats owners don't want on their terrestrial frequencies and other assorted garbage that no one sane would listen to -- let alone spend money for new radios -- tagging or not."
